Advanced Accounting

John Wiley & Sons **Advanced Accounting** delivers an in-depth, comprehensive introduction to advanced accounting theory and application, using actual business examples and relevant news stories to demonstrate how core principles translate into real-world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension, while highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in-depth end-of-chapter questions, promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing students to build a skill set based on up-to-date practices. With a student-oriented pedagogy designed to enhance comprehension, promote engagement, and build real-world understanding, this user-friendly book provides an essential foundation in current advanced accounting methods and standards.

Cost Accounting Problems (With Full Solutions)

Classification of Services in the Digital Economy

Springer Science & Business Media **The classification of services in the digital economy proves critical for doing business, but it appears to be a particularly complex regulatory matter that is based upon a manifold set of issues. In the context of the General Agreement on Trade in Services (GATS), when the services classification scheme was drafted in the early 1990s, convergence processes had not unfolded yet and the internet was still in its infancy and not a reality in daily life. Therefore, policy makers are now struggling with the problem of regulating trade in electronic services and are in search of a future-oriented solution for classifying them in multilateral and preferential trade agreements. In late fall 2011, the authors of this study were mandated by the European Union, Delegation to Vietnam, in the context of the Multilateral Trade Assistance Project 3 (MUTRAP 3), to work out a report clarifying the classification of services in the information/digital economy and to assess the impact of any decision regarding the classifications on the domestic and external relations policy of Vietnam, as well as to discuss the relevant issues with local experts during three on-site visits.**

Concepts and Practice

South-Western Pub **The most reader-friendly text on the market, Advanced Accounting 8e brings real-world accounting topics to the student's level, presenting advanced concepts and issues in a flexible, step-by-step approach. This is the only advanced book that completely separates the following three major concepts dealt with in the consolidations area: (1) the general concept of consolidating, (2) the concept of a non-controlling interest, and (3) the change or no change in basis of accounting concepts for business combinations. Separating these concepts makes it much easier for students than having to simultaneously learn multiple concepts.**
