STRATEGIES TO IMPROVE CARDIAC ARREST SURVIVAL

A TIME TO ACT

National Academies Press Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. *Strategies to Improve Cardiac Arrest Survival* examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of *Strategies to Improve Cardiac Arrest Survival* provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

2015 AMERICAN HEART ASSOCIATION GUIDELINES

UPDATE FOR CPR AND ECC

ARRHYTHMIA INTERPRETATION

ACLS PREPARATION AND CLINICAL APPROACH

Mosby A unique combination of arrhythmias and ACLS (Advanced Cardiac Life Support) in a single authoritative resource, this book facilitates recognition and interpretation of the most frequently encountered cardiac rhythms in ACLS and emergency cardiac care. It also covers aberrant conduction and pediatric rhythms.

WHY STUDY HISTORY?

London Publishing Partnership Considering studying history at university? Wondering whether a history degree will get you a good job, and what you might earn? Want to know what it's actually like to study history at degree level? This book tells you what you need to know. Studying any subject at degree level is an investment in the future that involves significant cost. Now more than ever, students and their parents need to weigh up the potential benefits of university courses. That's where the *Why Study* series comes in. This series of books, aimed at students, parents and teachers, explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study. Each book sets out to enthuse the reader about its subject and answer the crucial questions that a college prospectus does not.

CARDIO-ONCOLOGY

THE CLINICAL OVERLAP OF CANCER AND HEART DISEASE

Springer Co-edited and written by an interdisciplinary team of experts in oncology and cardiology, this book is a clinically useful resource on these overlapping topics: • Cardiac complications in patients receiving cancer therapy • The treatment of cancer in patients with cardiovascular disease • The treatment of cardiovascular disease in patients with cancer When relevant to medical practice, epidemiology and basic science are also included in the discussion and each chapter is written by an oncologist and a cardiologist. Additionally, the chapters follow a similar format to make the book truly interdisciplinary, user-friendly, and clinically applicable to specialists and non-specialists who care for patients with both cancer and cardiovascular disease.

2020 AMERICAN HEART ASSOCIATION GUIDELINES

FOR CPR AND ECC

AN INTRODUCTION TO CLINICAL EMERGENCY MEDICINE

Cambridge University Press Fully-updated edition of this award-winning textbook, arranged by presenting complaints with full-color images throughout. For students, residents, and emergency physicians.

THE MGH REVIEW OF CRITICAL CARE MEDICINE

Lippincott Williams & Wilkins The field of critical care medicine is evolving quickly. To prepare for certification and refresh their knowledge, today's practitioners need a concise multidisciplinary review that focuses on the core areas of critical care. Ideal for critical care fellows, critical care nurses, residents, and practitioners who spend time in the ICU. This book employs brief chapters on focused topics to help readers review core areas and test their knowledge. Features: Broad scope addresses all major topics in adult critical care with contributions from experts in a range of disciplines. Concise chapters based on commonly referenced topics make the review easy to navigate. Focused discussions are based on patient presentation and are structured to include common causes, initial management strategies, pathophysiology, differential diagnosis, management, and outcomes. Incisive review questions (3.10 per topic) include answers and explanations to help readers understand the "how" and "why" behind each answer. Staff of MGH and its sister institutions provide consistent terminology and presentation throughout the review.

2020 HANDBOOK OF EMERGENCY CARDIOVASCULAR CARE FOR HEALTHCARE PROVIDERS (INTERNATIONAL ENGLISH)

20-2872

ACLS FOR EXPERIENCED PROVIDERS

MANUAL AND RESOURCE TEXT

The required student text for the classroom-based Advanced Cardiovascular Life Support for Experienced Providers (ACLS EP) course, and an important reference for Instructors. Full-color softcover, 480 pages, 8 1/2" x 11," plus the ACLS EP Systematic Approach Pocket Reference Card and the 2-card Advanced Cardiovascular Life Support (ACLS) Pocket Reference Card Set (90- 1012). Based on 2010 American Heart Association Guidelines for CPR and ECC.

MANAGEMENT OF ACUTE PULMONARY EMBOLISM

Springer Science & Business Media This practical volume highlights traditional, novel, and evolving aspects of the diagnosis and treatment of pulmonary embolism (PE). The contributors comprise an international team of experts. Important aspects of diagnosis, risk stratification, and differential treatment of patients with PE are presented in a concise, yet comprehensive manner. Emphasis is placed on specific issues related to PE, including pregnancy, cancer, thrombophilia, and air travel.

MOSBY'S EMERGENCY & TRANSPORT NURSING EXAMINATION REVIEW

Elsevier Health Sciences This valuable study resource provides a thorough, comprehensive review for the Certified Emergency Nurse (CEN) exam - and it's the only review book that also helps readers prepare for the Certified Flight Registered Nurse (CFRN) and Flight Paramedic Certification (FP-C) exams. No other resource provides both a review of content as well as over 1,400 questions and a CD-ROM with 3 practice tests. Each chapter features questions with answers and rationales for every question - explaining the "why" behind every answer. Packed with all the essential information needed for a complete review, it includes a new section on critical care, a new chapter on bioterrorism, and new content on conscious sedation issues, RSI, airway management, and safety training. The Transport section now includes new content on CAMTS standards and transport operations. Over 1,400 questions with rationales and references offer excellent preparation for the CEN, CFRN, and FP-C exams. A practice CD-ROM includes 3 sample exams with answers and rationales, and automatic grading helps users assess their mastery of the material. A content outline of must-know topics is provided, followed by practice questions, answers, rationales, and references. New guidelines and medications currently being used for BLS, ACLS, and PALS are discussed. New chapters have been added on Invasive Interventions, Pharmacology, Invasive Monitoring, Bioterrorism, CAMTS Standards, and Transport Operations. Updated and expanded content addresses emerging infectious diseases, CISM for emergency and transport staff, CAMTS standards and transport operations, conscious sedation issues, RSI, airway management, safety training, and age-related changes and differences (pediatric and geriatric).

THE PRESENCE OF THE PAST

POPULAR USES OF HISTORY IN AMERICAN LIFE

Columbia University Press Some people make photo albums, collect antiques, or visit historic battlefields. Others keep diaries, plan annual family gatherings, or stitch together patchwork quilts in a tradition learned from grandparents. Each of us has ways of communing with the past, and our reasons for doing so are as varied as our memories. In a sweeping survey, Roy Rosenzweig and David Thelen asked 1,500 Americans about their connection to the past and how it influences their daily lives and hopes for the future. The result is a surprisingly candid series of conversations and reflections on how the past infuses the present with meaning. Rosenzweig and Thelen found that people assemble their experiences into narratives that allow them to make sense of their personal histories, set priorities, project what might happen next, and try to shape the future. By using these narratives to mark change and create continuity, people chart the courses of their lives. A young woman from Ohio speaks of giving birth to her first child, which caused her to reflect upon her parents and the ways that their example would help her to become a good mother. An African American man from Georgia tells how he and his wife were drawn to each other by their shared experiences and lessons learned from growing up in the South in the 1950s. Others reveal how they personalize historical events, as in the case of a Massachusetts woman who traces much of her guarded attitude toward life to witnessing the assassination of John F. Kennedy on television when she was a child. While the past is omnipresent to Americans, "history" as it is usually defined in textbooks leaves many people cold. Rosenzweig and Thelen found that history as taught in school does not inspire a strong connection to the past. And they reveal how race and ethnicity affects how Americans perceive the past: while most white Americans tend to think of it as something personal, African Americans and American Indians are more likely to think in terms of broadly shared experiences--like slavery, the Civil Rights Movement, and the violation of Indian treaties." Rosenzweig and Thelen's conclusions about the ways people use their personal, family, and national stories have profound implications for anyone involved in researching or presenting history, as well as for all those who struggle to engage with the past in a meaningful way.

CARDIOPULMONARY CRITICAL CARE

W B Saunders Company Provides current insights into critical abnormalities of the heart and lungs. The 3rd Edition includes chapters on microcirculation, regional distribution of blood flow, methods of increasing oxygen delivery, septic shock, environmental lung injury, and the effects of high pressure environments. Much more focused toward the critical care aspects of cardiopulmonary disorders. Emphasizes the growing knowledge of the chemical basis for tissue injury and the role that inflammatory mediators play in cardiocirculatory failure in chapters on asthma, sepsis, respiratory distress, and septic shock. Provides brand-new chapters on the effects of injury in unusual situations such as diving and high altitude. Discusses modern concepts in the treatment of myocardial infarction, arrhythmias, adult respiratory distress syndrome, sepsis, pneumonia, and much more. Reviews the effects of various ventilatory modes on pulmonary and circulatory function. FEATURES: Divides content into three sections: the pathophysiologic basis of cardiorespiratory failure, general principles of treating patients with cardiac, circulatory, and respiratory failure, and the clinical care of specific cardiac, circulatory, and respiratory diseases encountered in critical care. Discusses current topics of importance, including the role of cytokines in acute pulmonary injury, the biochemical basis of myocardial function, the control of cardiac output in normal and abnormal situations, oxygen transport and utilization, pulmonary mechanics in critical care, intensive care radiology, invasive and noninvasive treatment of acute and chronic respiratory failure, and more.

PEDIATRIC EDUCATION FOR PREHOSPITAL PROFESSIONALS

Jones & Bartlett Learning Pediatric Education for Prehospital Professionals (PEPP) represents a comprehensive source of prehospital medical information for the emergency care of infants and children.

EMERGENCY AIRWAY MANAGEMENT

Cambridge University Press Thoroughly updated to reflect best current practice, this book guides the trainee through every aspect of a challenging clinical scenario.

THE ESC TEXTBOOK OF INTENSIVE AND ACUTE CARDIOVASCULAR CARE

Oxford University Press, USA The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association (ACVC) of the ESC. Cardiovascular diseases (CVDs) are a major cause of premature death worldwide and a cause of loss of disability-adjusted life years. For most types of CVD early diagnosis and intervention are independent drivers of patient outcome. Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients. This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care, not only cardiologists but also critical care specialists, emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues, cooperation among professionals, and interaction with other specialities in medicine. SECTION 1 focusses on the definition, structure, organisation and function of ICCU's, ethical issues and quality of care. SECTION 2 addresses the pre-hospital and immediate in-hospital (ED) emergency cardiac care. SECTIONS 3-5 discuss patient monitoring, diagnosis and specific procedures. Acute coronary syndromes (ACS), acute decompensated heart failure (ADHF), and serious arrhythmias form SECTIONS 6-8. The main other cardiovascular acute conditions are grouped in SECTION 9. Finally SECTION 10 is dedicated to the many concomitant acute non-cardiovascular conditions that contribute to the patients' case mix in ICCU. This edition includes new chapters such as low cardiac output states

and cardiogenic shock, and pacemaker and ICDs: troubleshooting and chapters have been extensively revised. Purchasers of the print edition will also receive an access code to access the online version of the textbook which includes additional figures, tables, and videos to better to better illustrate diagnostic and therapeutic techniques and procedures in IACC. The third edition of the ESC Textbook of Intensive and Acute Cardiovascular Care will establish a common basis of knowledge and a uniform and improved quality of care across the field.

CARDIOPULMONARY RESUSCITATION

Springer Science & Business Media An in-depth review by leading authorities of the latest therapies and techniques for rescuing persons in cardiac arrest. The authors explore the physiology behind current state-of-the-art clinical resuscitation and translate it into practical bedside recommendations, clinical tips, and expert techniques. Topics of interest include the epidemiology of sudden death, management of ventilation, chest compression technique training, public access defibrillation, drug delivery during CPR, the latest drug therapies, and cardiac arrest in disease, pregnancy, drowning, lightning strike, and trauma. The authors also review the major ongoing research in resuscitation science that will likely affect the next set of international resuscitation guidelines.

ACSM'S GUIDELINES FOR EXERCISE TESTING AND PRESCRIPTION

Lippincott Williams & Wilkins The flagship title of the certification suite from the American College of Sports Medicine, ACSM's Guidelines for Exercise Testing and Prescription is a handbook that delivers scientifically based standards on exercise testing and prescription to the certification candidate, the professional, and the student. The 9th edition focuses on evidence-based recommendations that reflect the latest research and clinical information. This manual is an essential resource for any health/fitness and clinical exercise professional, physician, nurse, physician assistant, physical and occupational therapist, dietician, and health care administrator. This manual give succinct summaries of recommended procedures for exercise testing and exercise prescription in healthy and diseased patients.

ACUTE PULMONARY EMBOLISM

A CHALLENGE FOR HEMOSTASIOLOGY

Springer Science & Business Media The value of echocardiography in the diagnostic work-up of patients with suspected acute pulmonary embolism.- New developments in the thrombolytic therapy of venous thrombosis.- Mechanism of blood coagulation. Newer aspects of anticoagulant and antithrombotic therapy.MR-angiography in the diagnosis of pulmonary embolism.Scintigraphy-ventilation/perfusion scanning and imaging of the embolus.- Clinical course and prognosis of acute pulmonary embolism.- The molecular mechanisms of inherited thrombophilia.

EAT LIKE A PIG, RUN LIKE A HORSE

HOW FOOD FIGHTS HIJACKED OUR HEALTH AND THE NEW SCIENCE OF EXERCISE

Simon and Schuster There is no magic pill. There is no perfect diet. Could it be that our underlying assumption—that what we're eating is making us fat and sick—is just plain wrong? To address the rapid rise of "lifestyle diseases" like diabetes and heart disease, scientists have conducted a whopping 500,000 studies of diet and another 300,000 of obesity. Journalists have written close to 250 million news articles combined about these topics. Yet nothing seems to halt the epidemic. Anastacia Marx de Salcedo's *Eat Like a Pig, Run Like a Horse* looks not just to data-driven science, but to animals and the natural world around us for a new approach. What she finds will transform the national debate about the root causes of our most pervasive diseases and offer hope of dramatically reducing the number who suffer—no matter what they eat. It all began with her own medical miracle—she has multiple sclerosis but has discovered that daily exercise was key to keeping it from progressing. And now, new research backs up her own experience. This revelation prompted Marx de Salcedo to ask what would happen if people with lifestyle illnesses put physical activity front and center in their daily lives? *Eat Like a Pig, Run Like a Horse* takes us on a fascinating journey that weaves together true confessions, mad(ish) scientists, and beguiling animal stories. Marx de Salcedo shows that we need to move beyond our current diet-focused model to a new, dynamic concept of metabolism as regulated by exercise. Suddenly the answer to good health is almost embarrassingly simple. Don't worry about what you eat. Worry about how much you move. In a few years' time, adhering to a finicky Keto, Paleo, low-carb, or any other special diet to stay healthy will be as antiquated as using Daffy's Elixir or Dr. Bonker's Celebrated Egyptian Oil—popular "medicines" from the 1800s—to cure disease. And just as the 19th-century health revolution was based on a new understanding that the true cause of malaria, tuberculosis, and cholera was microorganisms, so the coming 21st-century one will be based on our new understanding that exercise is the only way to metabolic health. Fascinating and brilliant, *Eat Like a Pig, Run Like a Horse* is primed to usher in that new era.

RAPID INTERPRETATION OF EKG'S

AN INTERACTIVE COURSE

Cover Publishing Company A caption explains the concept illustrated on each page, and a few simple sentences reinforce the concept with interactive ("programmed") learning, which links to the following page. --from publisher description.

ECG INTERPRETATION

Lippincott Williams & Wilkins Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography.

FLIP AND SEE ECG

W.B. Saunders Company This resource aims to make interpreting ECGs more interesting, teaching recognition and interpretation in under two hours. It guides readers from the basics of anatomy and physiology through understanding and interpreting the electrocardiogram. It helps readers get to know 260 different ECG rhythms by creating them themselves. Users draw and answer questions right in the book, following a range of hands-on instructions.

PEDIATRIC RESUSCITATION

W B Saunders Company Pediatric Resuscitation is reviewed in this issue of *Pediatric Clinics of North America*, guest edited by Drs. Steve Schexnayder and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

THE SIGNIFICANCE OF THE FRONTIER IN AMERICAN HISTORY

Penguin UK This hugely influential work marked a turning point in US history and culture, arguing that the nation's expansion into the Great West was directly linked to its unique spirit: a rugged individualism forged at the juncture between civilization and wilderness, which - for better or worse - lies at the heart of American identity today. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

ACLS - 2011

THE ACLS/ARRHYTHMIA POCKET BRAIN BOOK

EKG Press New (2011) ACLS Guidelines are out. Now in its 4th Edition -- this ACLS Pocket Brain Book integrates new AHA recommendations into a practical, clinical approach to arrhythmias and cardiac arrest. Features a user-friendly RAPID-Find contents on inside cover and amp; centerfold, updated algorithms/drugs/treatment protocols/modalities (including a new section on capnography), and a concise review of rationale for the new ACLS guidelines (including what determines survival? Which treatments work?).

THE COMPREHENSIVE TEXTBOOK OF HEALTHCARE SIMULATION

Springer Science & Business Media The Comprehensive Textbook of Healthcare Simulation is a cohesive, single-source reference on all aspects of simulation in medical education and evaluation. It covers the use of simulation in training in each specialty and is aimed at healthcare educators and administrators who are developing their own simulation centers or programs and professional organizations looking to incorporate the technology into their credentialing process. For those already involved in simulation, the book will serve as a state-of-the-art reference that helps them increase their knowledge base, expand their simulation program's capabilities, and attract new, additional target learners. Features: • Written and edited by pioneers and experts in healthcare simulation • Personal memoirs from simulation pioneers • Each medical specialty covered • Guidance on teaching in the simulated environment • Up-to-date information on current techniques and technologies • Tips from "insiders" on funding, development, accreditation, and marketing of simulation centers • Floor plans of simulation centers from across the United States • Comprehensive glossary of terminology

TEXTBOOK OF NEONATAL RESUSCITATION

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140+ new full-color photographs replacing most line drawings

GETTING THE WORD OUT

ACADEMIC LIBRARIES AS SCHOLARLY PUBLISHERS

SHALL I TAKE UP FARMING?

PEDIATRIC ADVANCED LIFE SUPPORT STUDY GUIDE

Jems Publishing Company Updated to reflect the new 2005 emergency cardiovascular care guidelines! Popular author, Barbara Aehlert, incorporates both prehospital and hospital management of pediatric emergencies. In a concise, easy-to-read outline format, it provides the most essential information a provider needs. It is also the approved text for the American Safety & Health Institute's (ASHI) pediatric advanced life support course. For more information on ASHI courses, call 800-246-5101 or visit www.ashinstitute.org. Instructor resources available; contact your sales representative for details. An outline format featuring bulleted lists, concise tables, and a user-friendly writing style makes this comprehensive text incredibly easy to read and understand. A Pretest and a Posttest consisting of multiple choice, true/false, fill in the blank, and essay questions tests readers' overall comprehension of the material. Updated to reflect the new 2005 emergency cardiovascular care guidelines. PALS Pearl Boxes help readers apply information covered in the text to real-life clinical situations. Sidebars contain additional information relevant to the topics covered in the chapter, giving readers an opportunity for further learning. A laminated quick reference card gives practitioners easy access to critical information in the field or hospital. This convenient card includes essential information regarding respiratory and heart rates, blood pressure, basic life support interventions, Glasgow Coma Scale, airway size and equipment selection for intubation corresponding to the Broselow Resuscitation Tape, several pediatric algorithms, and pain assessment tools.

POPOL VUH

THE MAYAN BOOK OF THE DAWN OF LIFE

eBookIt.com Popol Vuh, the QuichÃ© Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the QuichÃ© Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new illustrations.

INVITED PAPERS AND SELECTED CONTINUING EDUCATION

ECG POCKET BRAIN ESSENTIALS (5TH EDITION-2011)

EKG Press Now in its 5th Edition -- the ECG-2011 Pocket Brain has been expanded and greatly enhanced from its previous edition. Aimed for beginning, novice and experienced interpreters. User-friendly format preserved. * ALL content updated with addition of 12 new pages and over 20 new illustrative figures and tracings. New pages on AV blocks: Brugada syndrome; Acute MI; Torsades. Expanded coverage of tachycardia; MI diagnosis when there is BBB; RVH.

BASIC LIFE SUPPORT (BLS) PROVIDER HANDBOOK

The Save a Life Initiative has just released its newest course: Basic Life Support. This manual is based on the 2015-2020 Basic Life Support guidelines published by the American Heart Association. The Basic Life Support (BLS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Basic Life Support Certification or Recertification Course. It serves as the primary training material for BLS Certification and Recertification courses. Although it is primarily intended for professionals to use during their courses, the handbook was also created to serve as daily resource material for health care professionals. Information covered in the handbook includes Basic Life Support instruction for adults and children, AED usage, airway obstruction and rescue breathing techniques, and more. Specific Algorithms for BLS and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.
