A Topical Approach to Life-Span Development

McGraw-Hill Education **Connect with John Santrock's Topical Approach to Lifespan Development and connect with success. Informed and driven by research. At McGraw-Hill, we have spent thousands of hours with you and your students, working to understand the key needs and concerns you face in the Human Development course. The most common topics raised include managing the vast amount of content inherent to a Lifespan course and ensuring the dependability of the assigned material - is it current and accurate? The result of this research is John Santrock's A Topical Approach to Lifespan Development, 7e. Santrock ensures students complete and understand the assigned material in a number of ways: Santrock's hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students' learning and performance. McGraw-Hill's LearnSmart increases students' efficiency in studying by identifying what they know and don't know and provides immediate remediation, helping them to learn the material they are struggling with. The connections theme continues in the 7th edition, showing students the different aspects of lifespan development and helping them to better understand the concepts. This recurring theme of connections - Developmental Connections, Topical Connections, Connecting Development to Life, Connecting with Careers, and Connections through Research - ties together concepts from across chapters to reinforce the learning process and connect the material to students' everyday lives and future aspirations. McGraw-Hill's Milestones video and assessment program helps bring the course material to life, so your students can witness real children developing over time. And of course, all of this material is informed by our unique board of expert contributors - a who's who of developmental psychology - who ensure the material is as accurate and up-to-date as possible.**

Life Span Human Development

Cengage AU The third edition of Life Span Human Development helps students gain a deeper understanding of the many interacting forces affecting development from infancy, childhood, adolescence and adulthood. It includes local, multicultural and indigenous issues and perspectives, local research in development, regionally relevant statistical information, and National guidelines on health. Taking a unique integrated topical and chronological approach, each chapter focuses on a domain of development such as physical growth, cognition, or personality, and traces developmental trends and influences in that domain from infancy to old age. Within each chapter, you will find sections on four life stages: infancy, childhood, adolescence and adulthood. This distinctive organisation enables students to comprehend the processes of transformation that occur in key areas of human development. This text also includes a MindTap course offering, with a strong suite of resources, including videos and the chronological sections within the text can be easily customised to suit academic and student needs.

Frameworks, Accounts and Strategies

Routledge This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

With Macmillan's superior content delivered by LaunchPad (comprehensive course) or Achieve Read & Practice (e-book + online homework), Kathleen Berger's breakthrough text tells a compelling story of life-span development via a topically organized approach. This is not a reorganized iteration of another Berger textbook, but rather a fully reconceived first edition exploring human development topic by topic. But as always with Berger, it is exceptionally accessible and compelling, distinguished by an engaging narrative voice, wide-ranging cultural perspective, and an emphasis on relating universal themes to students' own lives. The LaunchPad option for this book offers a variety of engaging activities including Data Connections (a hands-on approach to understanding research data, Visualizing Development, (which explores important concepts through a combination of media), and Developing Lives (where students to "raise" a virtual child from newborn to teenager).

Human Development: A Life-Span View

[Cengage Learning](#) Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Lives in Context

SAGE Publications Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, *Lifespan Development: Lives in Context* offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.
