Energy and Water Development Appropriations for 2013: Witnesses

Energy and Water Development

Fy2013 Appropriations

Createspace Independent Pub The Energy and Water Development appropriations bill provides funding for civil works projects of the Army Corps of Engineers (Corps), for the Department of the Interior's Bureau of Reclamation (Reclamation) and the Department of Energy (DOE), and for a number of independent agencies. President Obama's FY2013 budget request for Energy and Water Development was released in February 2012. For FY2013 the level of overall spending will be a major issue. The Budget Control Act of 2011 (BCA, P.L. 112-25) contained an overall discretionary spending cap for FY2013 of \$1.047 trillion. On March 29, 2012, the House passed a budget resolution (H.Con.Res. 112) that caps spending at a lower level, \$1.028 trillion. The Senate has not passed a budget resolution, but on April 19 the Senate Appropriations Committee allotted subcommittee funding levels that totaled the \$1.047 trillion cap in the BCA. The difference between overall spending caps is reflected in differences in spending proposals for Energy and Water Development programs. The Administration's request for FY2013 was \$33.684 billion. On April 25, the House Appropriations Committee reported out H.R. 5325 (H.Rept. 112-462), with a total of \$32.156 billion. The Senate Appropriations Committee reported out S. 2465 (S.Rept. 112-164) on April 26, funding Energy and Water Development programs at \$33.432 billion. On June 6 the House passed H.R. 5325 by a vote of 255-165, with some amendments. On September 28, 2012, President Obama signed into law the Continuing Appropriations Resolution, 2013 (P.L. 112-175). The act continues appropriations until March 27, 2013, for Energy and Water Development programs at 0.612% above the FY2012-enacted levels, with two exceptions: DOE's Nuclear Weapons Activities program is funded at an annual rate of \$7.577 billion, the amount requested for FY2013, instead of the FY2012 rate of \$7.214 billion, and the Nuclear Nonproliferation program was increased by \$100 million over the FY2012 level of \$2.296 billion to fund domestic uranium enrichment R&D. In addition, issues specific to Energy and Water Development programs included: the distribution of appropriations for Corps (Title I) and Reclamation (Title II) projects that have historically received congressional appropriations above Administration requests; alternatives to the proposed national nuclear waste repository at Yucca Mountain, Nevada, which the Administration has abandoned (Title III: Nuclear Waste Disposal); and proposed FY2013 spending levels for Energy Efficiency and Renewable Energy (EERE) programs (Title III) that are 25% higher in the Administration's request than the amount appropriated for FY2012.

Programs?; How Much of FA Dollars are Spent on U.S. Goods?; (4) What Exec. Branch Agencies Administer FA Programs?; What are the Different Forms in Which FAs is Provided?; How Much FA is Provided as Loans and How Much as Grants?; What are Some Types of Loans?; (5) What Congressional Committees Oversee FA Programs?; What are the Major FA Legislative Vehicles?

United Nations System Funding

Congressional Issues

DIANE Publishing The debate over U.N. funding focuses on several questions, including: (1) What is the appropriate level of U.S. funding for U.N. system operations and programs? (2) What U.S. funding actions are most likely to produce a positive continuation of U.N. system reform efforts? For more than 60 years, the U.S. has been the single largest financial contributor to the U.N. system, supplying in recent years 22% of most U.N. agency budgets. This report tracks the process by which Congress provides the funding for U.S. assessed contributions to the regular budgets of the U.N, its agencies, and U.N. peacekeeping operations, as well for U.S. voluntary contributions to U.N. system programs and funds. Basic info. is provided to help the reader understand this process. Illus.

Analytical perspectives

National Nanotechnology Initiative (NNI)

Overview, Reauthorization, and Appropriations Issues

DIANE Publishing Nanotechnology (NT) -- a term encompassing the science, engineering, and applications of sub-micron materials -- involves the harnessing of unique physical, chemical, and biological properties of nanoscale substances in fundamentally new and useful ways. The economic and societal promise of NT has led to substantial and sustained investments by governments and co. around the world. In 2000, the U.S. launched the world's first national NT program. From FY 2001 through FY 2010, the fed. gov't. invested \$12.4 billion in nanoscale science, engineering, and technology through the NNI. Contents of this report: Intro.; Overview; NNI; Selected NNI Reports and Assessments; NT Legislation in the 111th Congress. Illus. A print on demand report.

Closing Yucca Mountain

Litigation Associated with Attempts to Abandon the Planned Nuclear Waste Repository

DIANE Publishing Passed in 1982, the Nuclear Waste Policy Act (NWPA) was an effort to establish an explicit statutory basis for the Dept. of Energy (DoE) to dispose of the nation's most highly radioactive nuclear waste. The NWPA requires DoE to remove spent nuclear fuel from commercial nuclear power plants and transport it to a permanent geologic repository. In 1987, Congress designated Yucca Mountain, NV (YM), as the repository. Contents of this report: Intro.; Establishing a Permanent Geologic Repository for High-Level Nuclear Waste and Spent Nuclear Fuel; YM and the Obama Admin.; Blue Ribbon Comm. on America's Nuclear Future; Withdrawal of the YM Construction License; NRC Halts YM License Review; The Future of YM. A print on demand report.

Operating Under a Continuing Resolution

A Limited Assessment of Effects on Defense Procurement Contract Awards

RAND Corporation As described in this report, the authors developed an empirical basis for exploring policy issues pertaining to Department of Defense operations under a continuing resolution at the start of a fiscal year, which has become the norm in recent years.
