The Politics of Place A History of Zoning in Chicago Lake Claremont Press Only in Chicago Can Zoning Be Epic... Chicago is renowned for its distinctive skyline, its bustling Loop business district, and its diverse neighborhoods. How the face of Chicago came to be is a story of enterprise, ingenuity, opportunity--and zoning. Until now, however, there has not been a book that focuses on the important, often surprising, role of zoning in shaping the 'The City that Works.' "The Politics of Place: A History of Zoning in Chicago" reviews the interplay among development, planning, and zoning in the growth of the Gold Coast, the Central Area, and, more recently, massive 'Planned Developments'; such as Marina City, Illinois Center, and Dearborn Park. It tells the story of bold visions compromised by political realities, battles between residents and developers, and occasional misfires from City Council and City Hall. What emerges is a fascinating, behind-the-scenes inspection of the evolving character of the city's landscape. Schwieterman and Caspall recount the many planning innovations that have originated in Chicago, the complexities and intrigue of its zoning debates, and the recent adoption of a new zoning ordinance that promises to affect the city's economy and image for years to come. Today's Chicago Blues Lake Claremont Press Profiles dozens of Chicago's blues musicians; discusses the city's blues history; and offers tips on clubs, radio stations, record labels, grave sites, and places of interest to blues fans. A Field Guide to Gay & Lesbian Chicago Lake Claremont Press The first and only book to give gay and lesbian travelers the inside scoop on gay-friendly accommodations, shopping, sports, recreation, music, theater, dining, and nightlife in the Windy City. This chatty, opinionated guide to gay life and culture is written by longtime gay-neighborhood-dwelling Chicagoans for residents and visitors. Photos. City Rules How Regulations Affect Urban Form Island Press City Rules offers a challenge to students

and professionals in urban planning, design, and policy to change the rules of city-building, using regulations to reinvigorate, rather than stifle, our communities. Emily Talen demonstrates that regulations are a primary detriment to the creation of a desirable urban form. While many contemporary codes encourage sprawl and even urban blight, that hasn't always been the case—and it shouldn't be in the future. Talen provides a visually rich history, showing how certain eras used rules to produce beautiful, walkable, and sustainable communities, while others created just the opposite. She makes complex regulations understandable, demystifying city rules like zoning and illustrating how written codes translate into real-world consequences. Most importantly, Talen proposes changes to these rules that will actually enhance communities' freedom to develop unique spaces.

Chicago's Block Clubs How Neighbors Shape the City University of Chicago Press Whether focused on flower gardens, street crime, or aesthetic conformity, urban block clubs are unusual quasi-institutions that can establish or maintain a neighborhood's appearance, social dynamics, and quality of life. But what is a block club? And how does it function? Is it a definable institution, with codifiable practices and expectations, or is it merely an assemblage of like-minded citizens who happen to live near one another? What makes one such group effective and long-lasting, while most evaporate after a few years of communal activity? These are some of the questions that Amanda Seligman addresses in her deeply researched study.

A Cook's Guide to Chicago Where to Find Everything You Need and Lots of Things You Didn't Know You Did Lake Claremont Press This expanded and updated edition of the local bestseller takes food lovers and serious home cooks on a tasty romp into Chicago's secret culinary corners to find everything they never knew they needed. Includes information on over 2,000 ingredients, little-known stores and grocers, helpful hints, and recipes.

Chicago Union Station Indiana University Press A history of the Midwestern transportation hub and its impact on the city and the region, plus stunning photographs of the station's architecture. More than a century before airlines placed it at the center of their systems, Chicago was already the nation's transportation hub—from Union Station, passengers could reach major cities on the Atlantic, Pacific and Gulf coasts as well as countless points in between. Chicago's history is tightly linked to its railroads. Railroad historian Fred Ash begins in the mid-1800s, when Chicago dominated Midwest trade and was referred to as the "Railroad Capital of the World." During this period, swings in the political climate significantly modified the relationship between the local government and its largest landholders, the railroads. From here, Ash highlights competition at the turn of the twentieth century between railroad companies that greatly influenced Chicago's urban landscape. Profiling the fascinating stories of businessmen, politicians, workers, and immigrants whose everyday lives were affected by the

bustling transportation hub, Ash documents the impact Union Station had on the growing city and the entire Midwest. Featuring more than one hundred photographs of the famous beaux art architecture, Chicago Union Station is a beautifully illustrated tribute to one of America's overlooked treasures. "The book includes more than 100 illustrations, a quarter of which are in color—but the real value is in author Ash's narrative; he's devoted decades to the study of terminals in the Railroad Capital, and it shows in this marvelous work." —Classic Trains "The station's history is thoughtfully revealed alongside concurrent economic and political events unfolding in Chicago at given points in time, thus providing the reader with a deeper understanding of why certain station milestones occurred when they did and the way they did." —The Michigan Railfan

A Chicago Tavern A Goat, a Curse, and the American Dream Lake Claremont Press Chicago newspaperman Rick Kogan plunks down at a barstool at the Billy Goat Tavern and tells the tales of the city landmark, which became a haven for newspaper reporters, policemen, politicians, and anyone else drawn to the hospitality and showmanship of hardworking William "Billy Goat" Sianis and his often antic, uniquely comforting establishment. The story begins in the summer of 1934, when a baby goat fell off a truck and limped into a tavern owned by Greek immigrant William Sianis, and a Chicago icon was born. Later, when he and one of his goats were barred from entering Wrigley Field during the 1945 World Series, the Cubs' eventual loss to Detroit fueled a legend as enduring as their fans' "Wait 'til next year" mantra. Kogan writes about some of the regulars, visitors, employees, and luminaries found at the tavern, including columnist Mike Royko and the young stars who immortalized the tavern in the Saturday Night Live "Olympia Diner" skit—John Belushi, Bill Murray, and Don Novello—and discusses Sam Sianis, Billy's nephew and the current owner. Let the Goat In! In the summer of 1934, a baby goat fell off a truck, limped into a tavern owned by Greek immigrant William Sianis, and a Chicago icon was born. The Billy Goat Inn became a haven for newspaper reporters, policemen, politicians, and anyone else drawn to the hospitality and showmanship of hardworking "Billy Goat" Sianis and his often antic, uniquely comforting establishment. But did Billy jinx the Cubs? When he and one of his goats were barred from entering Wrigley Field during the 1945 World Series, the Cubs' eventual loss to Detroit fueled a legend as enduring as their fans' "Wait 'til next year" mantra. Today there are seven Billy Goat Taverns, including one in Washington, D.C., and Billy's nephew, Sam Sianis--a celebrity in his own right--oversees what Illinois Senator Dick Durbin called "a national institution." Rick Kogan's affectionate tale plunks you down at a barstool next to some of the Billy Goat's regulars, visitors, employees, and such luminaries as columnist Mike Royko, and those young stars--John Belushi, Bill Murray, and Don Novello--who immortalized Sam and the tavern in the Saturday Night Live Olympia Diner ("Cheezborger, Cheezborger! No fries . . . chips!") skits. "I remember . . . I miss . . .," someone will say, and names and faces begin to float through the tavern

air. . . In these echoes Kogan lets you see and hear why taverns remain essential social focal points and lets you understand what makes a Chicago original. **A Better Way to Zone Ten Principles to Create More Livable Cities** Island Press Nearly all large American cities rely on zoning to regulate land use. According to Donald L. Elliott, however, zoning often discourages the very development that bigger cities need and want. In fact, Elliott thinks that zoning has become so complex that it is often dysfunctional and in desperate need of an overhaul. **A Better Way to Zone** explains precisely what has gone wrong and how it can be fixed. **A Better Way to Zone** explores the constitutional and legal framework of zoning, its evolution over the course of the twentieth century, the reasons behind major reform efforts of the past, and the adverse impacts of most current city zoning systems. To unravel what has gone wrong, Elliott identifies several assumptions behind early zoning that no longer hold true, four new land use drivers that have emerged since zoning began, and basic elements of good urban governance that are violated by prevailing forms of zoning. With insight and clarity, Elliott then identifies ten sound principles for change that would avoid these mistakes, produce more livable cities, and make zoning simpler to understand and use. He also proposes five practical steps to get started on the road to zoning reform. While recent discussion of zoning has focused on how cities should look, **A Better Way to Zone** does not follow that trend. Although New Urbanist tools, form-based zoning, and the SmartCode are making headlines both within and outside the planning profession, Elliott believes that each has limitations as a general approach to big city zoning. While all three trends include innovations that the profession badly needs, they are sometimes misapplied to situations where they do not work well. In contrast, **A Better Way to Zone** provides a vision of the future of zoning that is not tied to a particular picture of how cities should look, but is instead based on how cities should operate. **From Boom to Bubble How Finance Built the New Chicago** University of Chicago Press How does a building boom happen? Who inflates a real-estate bubble and why? What causes companies to move from seemingly usable office space into new quarters only blocks away? Rachel Weber digs into these questions and more in her detailed analysis of Chicago's downtown development during the "Millennial Boom" (1998-2008). Weber shows what happens when the real estate industry, financial markets, and public planning all operate at warp speed to build new structures and destroy older ones. She draws on years of interviews with real estate actors across the country, participant observation in a secretive sector, analyses of financial and development data, as well as the history of the appraisal, brokerage, and real estate finance professions. As a result, Weber's book is an unprecedented historical, sociological, and geographic look at how markets and urban change actually happen. **Producing Local Color Art Networks in Ethnic Chicago** University of Chicago Press In big cities, major museums and elite galleries tend to dominate our idea of the art world. But beyond the cultural core ruled by these moneyed institutions and their

patrons are vibrant, local communities of artists and art lovers operating beneath the high-culture radar. *Producing Local Color* is a guided tour of three such alternative worlds that thrive in the Chicago neighborhoods of Bronzeville, Pilsen, and Rogers Park. These three neighborhoods are, respectively, historically African American, predominantly Mexican American, and proudly ethnically mixed. Drawing on her ethnographic research in each place, Diane Grams presents and analyzes the different kinds of networks of interest and support that sustain the making of art outside of the limelight. And she introduces us to the various individuals—from cutting-edge artists to collectors to municipal planners—who work together to develop their communities, honor their history, and enrich the experiences of their neighbors through art. Along with its novel insights into these little examined art worlds, *Producing Local Color* also provides a thought-provoking account of how urban neighborhoods change and grow.

Legislative History of the Federal Airport Act: Public Law 377, Chapter 251, 79th Congress, 2nd Session: House action Houses for a New World Builders and Buyers in American Suburbs, 1945-1965 Princeton University Press The fascinating history of the twentieth century's most successful experiment in mass housing While the work of Frank Lloyd Wright, Richard Neutra, and their contemporaries frequently influences our ideas about house design at the midcentury, most Americans during this period lived in homes built by little-known builders who also served as developers of the communities. Often dismissed as "little boxes, made of ticky-tacky," the tract houses of America's postwar suburbs represent the twentieth century's most successful experiment in mass housing. *Houses for a New World* is the first comprehensive history of this uniquely American form of domestic architecture and urbanism. Between 1945 and 1965, more than thirteen million houses—most of them in new ranch and split-level styles—were constructed on large expanses of land outside city centers, providing homes for the country's rapidly expanding population. Focusing on twelve developments in the suburbs of Boston, Philadelphia, Chicago, and Los Angeles, Barbara Miller Lane tells the story of the collaborations between builders and buyers, showing how both wanted houses and communities that espoused a modern way of life—informal, democratic, multiethnic, and devoted to improving the lives of their children. The resulting houses differed dramatically from both the European International Style and older forms of American domestic architecture. Based on a decade of original research, and accompanied by hundreds of historical images, plans, and maps, this book presents an entirely new interpretation of the American suburb. The result is a fascinating history of houses and developments that continue to shape how tens of millions of Americans live. Featured housing developments in *Houses for a New World*: Boston area: Governor Francis Farms (Warwick, RI) Wethersfield (Natick, MA) Brookfield (Brockton, MA) Chicago area: Greenvview Estates (Arlington Heights, IL) Elk Grove Village Rolling Meadows Weathersfield at Schaumburg Los Angeles and Orange

This book is an economic history of the Chicago metropolitan area from the 1820s to the present. It examines the city in its Midwestern region and compares it to the other major cities of the North. This book uses theories of the economics of location and other economic models to explain much of Chicago's history. Chicago maintained its status as the second-largest city through the first decades of the 20th century, but rapid growth shifted to the Sunbelt following World War II. Since the 1950s the city's history can be divided into four distinct periods; growth with suburbanization (1950-1970), absence of growth, continued suburbanization, and central city crisis (1970-1990), rebound in the 1990s, and financial crisis and deep recession after 2000. Through it all Chicago has maintained its position as the economic capital of the Midwest. The book is a synthesis of available literature and public data, and stands as an example of using economics to understand much of the history of Chicago. This book is intended for the college classroom, urban scholars, and for those interested in the history of one of world's foremost urban areas. Chicago Skyscrapers, 1871-1934 University of Illinois Press For more than a century, Chicago's skyline has included some of the world's most distinctive and inspiring buildings. This history of the Windy City's skyscrapers begins in the key period of reconstruction after the Great Fire of 1871 and concludes in 1934 with the onset of the Great Depression, which brought architectural progress to a standstill. During this time, such iconic landmarks as the Chicago Tribune Tower, the Wrigley Building, the Marshall Field and Company Building, the Chicago Stock Exchange, the Palmolive Building, the Masonic Temple, the City Opera, Merchandise Mart, and many others rose to impressive new heights, thanks to innovations in building methods and materials. Solid, earthbound edifices of iron, brick, and stone made way for towers of steel and plate glass, imparting a striking new look to Chicago's growing urban landscape. Thomas Leslie reveals the daily struggles, technical breakthroughs, and negotiations that produced these magnificent buildings. He also considers how the city's infamous political climate contributed to its architecture, as building and zoning codes were often disputed by shifting networks of rivals, labor unions, professional organizations, and municipal bodies. Featuring more than a hundred photographs and illustrations of the city's physically impressive and beautifully diverse architecture, Chicago Skyscrapers, 1871-1934 highlights an exceptionally dynamic, energetic period of architectural progress in Chicago. Chicago A Biography University of Chicago Press Chicago has been called by many names. Nelson Algren declared it a "City on the Make." Carl Sandburg dubbed it the "City of Big Shoulders." Upton

Sinclair christened it “The Jungle,” while New Yorkers, naturally, pronounced it “the Second City.” At last there is a book for all of us, whatever we choose to call Chicago. In this magisterial biography, historian Dominic Pacygatraces the storied past of his hometown, from the explorations of Joliet and Marquette in 1673 to the new wave of urban pioneers today. The city’s great industrialists, reformers, and politicians—and, indeed, the many not-so-great and downright notorious—animate this book, from Al Capone and Jane Addams to Mayor Richard J. Daley and President Barack Obama. But what distinguishes this book from the many others on the subject is its author’s uncommon ability to illuminate the lives of Chicago’s ordinary people. Raised on the city’s South Side and employed for a time in the stockyards, Pacyga gives voice to the city’s steelyard workers and kill floor operators, and maps the neighborhoods distinguished not by Louis Sullivan masterworks, but by bungalows and corner taverns. Filled with the city’s one-of-a-kind characters and all of its defining moments, *Chicago: A Biography* is as big and boisterous as its namesake—and as ambitious as the men and women who built it. The *Affordable Housing Reader* Taylor & Francis This second edition of *The Affordable Housing Reader* provides context for current discussions surrounding housing policy, emphasizing the values and assumptions underlying debates over strategies for ameliorating housing problems experienced by low-income residents and communities of color. The authors highlighted in this updated volume address themes central to housing as an area of social policy and to understanding its particular meaning in the United States. These include the long history of racial exclusion and the role that public policy has played in racializing access to decent housing and well-serviced neighborhoods; the tension between the economic and social goals of housing policy; and the role that housing plays in various aspects of the lives of low- and moderate-income residents. Scholarship and the COVID-19 pandemic are raising awareness of the link between access to adequate housing and other rights and opportunities. This timely reader focuses attention on the results of past efforts and on the urgency of reframing the conversation. It is both an exciting time to teach students about the evolution of United States’ housing policy and a challenging time to discuss what policymakers or practitioners can do to effect positive change. This reader is aimed at students, professors, researchers, and professionals of housing policy, public policy, and city planning. *The Working Man's Reward Chicago's Early Suburbs and the Roots of American Sprawl* Oxford University Press Between the 1860s and 1920s, Chicago's working-class immigrants designed the American dream of home-ownership, viewing homes as a consumer-oriented respite from work and a productive space they hoped to control. Spurred by ideas about the gendered respectability of domesticity, early city planning and land economics, Chicagoans helped create America's suburbanization. *The Voluntary City Choice, Community, and Civil Society* University of Michigan Press Challenges the orthodoxy that

insists government alone can improve community life

The Urbanism of Frank Lloyd Wright Princeton University Press This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city. Stunningly comprehensive, *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism. Neil Levine places Wright's projects, produced over more than fifty years, within their historical, cultural, and physical contexts, while relating them to the theory and practice of urbanism as it evolved over the twentieth century. Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City. Rather, Levine reveals Wright's larger, more varied, interesting, and complex urbanism, demonstrated across the span of his lengthy career. Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods, mainly in Chicago, and continuing through projects from the 1920s through the 1950s for commercial, mixed-use, civic, and cultural centers for Chicago, Madison, Washington, Pittsburgh, and Baghdad, Levine demonstrates Wright's place among the leading contributors to the creation of the modern city. Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis. Lavishly illustrated with drawings, plans, maps, and photographs, this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives. *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come.

The City Reader Routledge The sixth edition of the highly successful *The City Reader* juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning old and new. *The City Reader* is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series. This edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as compact cities, urban history, place making, sustainable urban development, globalization, cities and climate change, the world city network, the impact of technology on cities, resilient cities, cities in Africa and the Middle East, and urban theory. The new edition places greater emphasis on cities in the developing world, globalization and the global city system of the future. The plate sections have been revised and updated. Sixty generous selections are included: forty-four from the fifth edition, and sixteen new selections, including three newly written exclusively for *The City Reader*. The sixth edition keeps classic writings by authors such as Ebenezer Howard, Ernest W. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs, and Louis Wirth, as well as the best contemporary writings of, among others, Peter Hall, Manuel Castells, David Harvey, Saskia Sassen, and Kenneth

Jackson. In addition to newly commissioned selections by Yasser Elshestawy, Peter Taylor, and Lawrence Vale, new selections in the sixth edition include writings by Aristotle, Peter Calthorpe, Alberto Camarillo, Filip DeBoech, Edward Glaeser, David Owen, Henri Pirenne, The Project for Public Spaces, Jonas Rabinovich and Joseph Lietman, Doug Saunders, and Bish Sanyal. The anthology features general and section introductions as well as individual introductions to the selected articles introducing the authors, providing context, relating the selection to other selection, and providing a bibliography for further study. The sixth edition includes fifty plates in four plate sections, substantially revised from the fifth edition.

Urban Ecology An International Perspective on the Interaction Between Humans and Nature Springer Science & Business Media Urban Ecology is a rapidly growing field of academic and practical significance. Urban ecologists have published several conference proceedings and regularly contribute to the ecological, architectural, planning, and geography literature. However, important papers in the field that set the foundation for the discipline and illustrate modern approaches from a variety of perspectives and regions of the world have not been collected in a single, accessible book. Foundations of Urban Ecology does this by reprinting important European and American publications, filling gaps in the published literature with a few, targeted original works, and translating key works originally published in German. This edited volume will provide students and professionals with a rich background in all facets of urban ecology. The editors emphasize the drivers, patterns, processes and effects of human settlement. The papers they synthesize provide readers with a broad understanding of the local and global aspects of settlement through traditional natural and social science lenses. This interdisciplinary vision gives the reader a comprehensive view of the urban ecosystem by introducing drivers, patterns, processes and effects of human settlements and the relationships between humans and other animals, plants, ecosystem processes, and abiotic conditions. The reader learns how human institutions, health, and preferences influence, and are influenced by, the others members of their shared urban ecosystem.

Original. Building a Housewife's Paradise Gender, Politics, and American Grocery Stores in the Twentieth Century Univ of North Carolina Press

Supermarkets are a mundane feature in the landscape, but as Tracey Deutsch reveals, they represent a major transformation in the ways that Americans feed themselves. In her examination of the history of food distribution in the United States, Deutsch demonstrates the important roles that gender, business, class, and the state played in the evolution of American grocery stores. Deutsch's analysis reframes shopping as labor and embeds consumption in the structures of capitalism. The supermarket, that icon of postwar American life, emerged not from straightforward consumer demand for low prices, Deutsch argues, but through government regulations, women customers' demands, and retailers' concerns with financial success and control of the "shop floor." From small neighborhood stores to huge corporate chains of supermarkets, Deutsch traces the charged story of the origins of contemporary food distribution, treating topics as varied as everyday food purchases, the sales tax, postwar celebrations and critiques of mass consumption, and 1960s and 1970s urban insurrections. Demonstrating connections between women's work and the history of capitalism, Deutsch locates the origins of supermarkets in the politics of twentieth-century consumption. The City Cultures Reader Psychology Press From Simmel and Burgess, to Zukin, Fainstein and Soja this title presents classic and contemporary writing on the culture of cities. Themes include: culture and technologies; everyday lives; contesting identity; boundaries and transgressions; utopias and dystopias, and possible urban futures. The New Chicago A Social and Cultural Analysis Temple University Press For generations, visitors, journalists, and social scientists alike have asserted that Chicago is the quintessentially American city. Indeed, the introduction to The New Chicago reminds us that "to know America, you must know Chicago." The authors boldly announce the demise of the city of broad shoulders and the transformation of its physical, social, cultural, and economic institutions into a new Chicago. In this wide-ranging book, twenty scholars, journalists, and activists, relying on data from the 2000 census and many years of direct experience with the city, identify five converging forces in American urbanization which are reshaping this storied metropolis. The twenty-six essays included here analyze Chicago by way of globalization and its impact on the contemporary city; economic restructuring; the evolution of machine-style politics into managerial politics; physical transformations of the central city and its suburbs; and race relations in a multicultural era. In elaborating on the effects of these broad forces, contributors detail the role of eight significant racial, ethnic, and immigrant communities in shaping the character of the new Chicago and present ten case studies of innovative governmental, grassroots, and civic action. Multi-faceted and authoritative, The New Chicago offers an important and unique portrait of an emergent and new 'Windy City'. American and German experts from different fields (for example historians, geographers, architects, journalists or Americanists) join our 'guided tours' through Chicago and Hamburg. They introduce the reader to the sister cities as migration magnets and spaces of different interests. They discuss challenges and chances of urban life, city planning, safety measures or media cities within an Atlantic context. The volume includes contributions in German as well as English. Claudia Schnurmann is a researcher at the Department of History at the University of Hamburg (Germany). Iris Wigger is a researcher at the School of Sociology at University College in Dublin (Ireland). **New Developments in the Brewing Industry The Role of Institutions and Ownership** Oxford University Press, USA Institutions and ownership play a central role in the transformation and development of the beer market and brewing industry. Institutions set the external environment of the brewery through both formal requirements and informal acceptance of company operations by the public. On the other hand, owners and managers adapt to these external challenges while following their own strategic agenda. This book explores the implications of this dynamic for the breweries, discussing how changes in institutions have contributed to the restructuring of the industry and the ways in which breweries have responded, including a craft beer revolution with a surge in demand of special flowered hops, a globalization strategy from the macro breweries, outsourcing by contract brewing, and knowledge exchange for small sized breweries. Structured in two parts, with a focus on institutions (Part I) and ownership (Part II) respectively, this book examines the link between institutions and governance in one of the most dynamic and innovative industries. **Zoning Рипол Классик Planning The Chicago Tribune Tower Competition Skyscraper Design and Cultural Change in the 1920s** University of Chicago Press In 1922, the Chicago Tribune sponsored an international competition to design its new corporate headquarters. Both a serious design contest and a brilliant publicity stunt, the competition received worldwide attention for the hundreds of submissions—from the sublime to the ridiculous—it garnered. In this lavishly illustrated book, Katherine Solomonson tells the fascinating story of the competition, the diverse architectural designs it attracted, and its lasting impact. She shows how the Tribune used the competition to position itself as a civic institution whose new headquarters would serve as a defining public monument for Chicago. For architects, planners, and others, the competition sparked influential debates over the design and social

functions of skyscrapers. It also played a crucial role in the development of advertising, consumer culture, and a new national identity in the turbulent years after World War I. *Small Business Problems in Urban Areas Hearings Before Subcommittee No. 5, Eighty-ninth Congress, First Session, Pursuant to H. Res. 13* *The U.S. City in Transition* Springer Nature The U.S. city is undergoing constant change. In the East and Midwest, most cities were founded as trading posts on waterways. They boomed during the industrial era and reached their population peak in the mid-20th century, before suburbanization and deindustrialization caused them to decline in importance. Traces of decay were everywhere, and the prognosis for the future was conceivably poor. As Barbara Hahn shows in her book, this trend now seems to have been broken: Things are looking up again for the US city. Some of the former industrial cities have succeeded in structural change. In the south and west of the country, cities have developed into new growth centers. However, not all cities are benefiting from this positive development, and many continue to shrink at an alarming rate. As the author points out, similar processes such as neoliberalisation, deregulation, privatisation and gentrification can be observed in all cities, regardless of their location and level of development. Due to the large number of didactically prepared graphics, the book is suitable as a study read for students and scholars. The characteristics of the U.S. city, which are elaborated on the basis of current examples, as well as the illustrative photos also illustrate the change of the U.S. city to the interested reader.
