### Cross-Cultural Marketing

### Theory, Practice and Relevance

*Routledge* **Cross-cultural marketing is an important element of the contemporary business environment. Many conventional accounts of the topic have conflated cross-cultural and cross-national marketing, but in this groundbreaking, new book, Burton argues that these generalizations have little meaning given the extent of multiculturalism in many societies. Given the importance of new emerging markets in the Far East, Middle East, Asia and Latin America, this book raises important questions about the applicability of existing marketing theory and practice, which was originally developed using the model of Western society. An extensive range of cross-cultural marketing issues is addressed, including: Cross-cultural consumer behaviour Cross-cultural management practice Promotional strategies Product development Distribution Marketing research methods Cross-cultural Marketing offers a new, more complex and sophisticated approach to the important challenges for existing marketing theory and practice and their continued relevance for stakeholders. As such, it is an invaluable text for students of international and cross-cultural marketing, as well as for practitioners who wish to assess new developments in the field.**

## Cross-Cultural Analysis

### The Science and Art of Comparing the World's Modern Societies and Their Cultures

*SAGE* **Cross-Cultural Analysis** is the sequel to *Culture's Consequences*, the classic work published by Geert Hofstede, one of the most influential management thinkers in today's times. Hofstede's original work introduced a new research paradigm in cross-cultural analysis: studying cultural differences through nation-level dimensions (complex variables defined by intercorrelated items). This paradigm has been subsequently used by hundreds of prominent scholars all over the world and has produced solid results. This new text takes the next step: It critically examines in one comprehensive volume the current, prevalent approaches to cross-cultural analysis at the level of nations that have been developed since Hofstede's work, offering students and researchers the theoretical and practical advantages and potential pitfalls of each method. The book is structured into four distinct parts. Parts I and II focus on the main theoretical and statistical issues in cross-cultural analysis using Hofstede's approach and the different research methods now associated with it. Part II consists of presentations of all well-known (and some lesser known) large-scale cross-cultural studies since Hofstede's work that have explained cross-cultural variation in terms of dimensional models. Part III summarizes the main conclusions to be drawn from the presentations in Part II and I explains how the proposed models have contributed to our practical understanding of cross-cultural diversity.

## Understanding Chinese and Western Cultures

*Taylor & Francis* The title is a collection of essays centering on the topic of intercultural communication between Chinese and Western cultures by Tang Yijie, one of the most renowned philosophy scholars in China. Comprised of five parts, the author discusses how Chinese culture should modernize itself through borrowing from Western culture premised on a self-awareness of Chinese culture per se. The book begins by critiquing theories of the so-called clash of civilizations and new empires and argues for the coexistence of cultures and a global consciousness instead. Chapters in the second part revisit contemporary Chinese culture in transition and call for the cultural integration of China and the West, with China defined in both its ancient and modern guises. By providing reflections on the cultural trends of the 1980s and 1990s, the third part illustrates the inevitable growth of diversified cultural development while analyzing cases of cultural dialogue in history, philosophy and religion. The fourth part demonstrates the significance of culture diversity and interaction while the fifth provides thoughts and reflections on some real-life cultural issues. This title will appeal to all levels of readers interested in Chinese culture, cross-cultural studies and topics of cultural pluralism.

## Cultural Influences on the Process of Strategic Management

# Using Scenario Planning for Decision Making in Multinational Corporations

*Springer Nature* This unique book is positioned at the crossroads of strategic management and international business. Based on an in-depth literature review, the author empirically assesses the widely shared, implicit assumption that strategic management processes can be globally applied in a standardized, i.e., culture-free, manner. So far, a variety of tools have also been recommended but without incorporating cultural differences. As many organizations observe that this ethnocentric view is more an illusion than reality, strategic management research has started to focus on the cultural sensitivity of its theories, tools, and processes to provide practitioners in a multicultural setting with adequate know-how and tools. To foster long-term decision-making despite uncertainty, scenario planning is frequently applied by practitioners. Up until today, scenario planning has however gained little attention from the academic community. Through this book, the author presents a newly developed framework for strategic management that combines the cultural value scale to test the cultural sensitivity of the long-term planning tool called "scenario planning." The different process steps of scenario planning have been individually examined for their sensitivity toward the cultural dimensions of uncertainty avoidance and long-term orientation. The investigation is based on a unique, global set of management consultants working for a leading professional service firm. The results of this research show the cultural sensitivity of scenario planning, with different degrees of the process steps and the tested cultural dimensions.

### Transnationalizing Inequalities in Europe

### Sociocultural Boundaries, Assemblages and Regimes of Intersection

*Taylor & Francis* Unequal life-chances became a key feature of cross-border migration to, and within, the enlarged Europe. Combining transnational, intersectional and cultural-sociological perspectives, this book develops a conceptual tool to analyse patterns, contexts and mechanisms of these cross-border inequalities. This book synthesizes the theories of social boundaries and of intersectionality, approaching cross-border relations as socially generated and as an inherent element of contemporary social inequalities. It analyses the mechanisms of cross-border inequalities as 'regimes of intersection' relating spatialized cross-border inequalities to other types of unequal social relations (in terms of gender, ethnicity/race, class etc.). The conceptual arguments are supported by empirical research on cross-border migration in Europe: migration of scientists and care workers between Ukraine and Germany. This book integrates the analysis of space - including cross-border categories of global and transnational - into intersectionally-informed studies of social inequalities. Broadly, it will appeal to scholars and students in the areas of sociology, political sciences, social anthropology and social geography. In particular, it will interest researchers concerned with transnational and global social inequalities, the interplay of the categories 'gender', 'ethnicity' and 'class' on the one hand and global and transnational relations on the other, theories of space and society, and migration and mobility in Europe.
