A few years ago, Erica Heller realized how universal the longing is for one more moment with a lost loved one. It could be a parent, a sibling, a mentor, or a friend, but who wouldn't love the opportunity to sit down, break bread, and just talk? Who wouldn't jump at the chance to ask those unasked questions, or share those unvoiced feelings? In *One Last Lunch*, Heller has asked friends and family of authors, artists, musicians, comedians, actors, and others, to recount one such fantastic repast. Muffie Meyer and her documentary subject Little Edie Beale go to a deli in Montreal. Kirk Douglas asks his father what he thought of him becoming an actor. Sara Moulton dines with her friend Julia Child. The Anglican priest George Pitcher has lunch with Jesus. And Heller herself connects with her father, the renowned author Joseph Heller. These richly imagined stories are endlessly revealing, about the subject, the writer, the passage of time, regret, gratitude, and the power of enduring love. **Trauma A Social Theory** [John Wiley & Sons](#) In this book Jeffrey C. Alexander develops an original social theory of trauma and uses it to carry out a series of empirical investigations into social suffering around the globe. Alexander argues that traumas are not merely psychological but collective experiences, and that trauma work plays a key role in defining the origins and outcomes of critical social conflicts. He outlines a model of trauma work that relates interests of carrier groups, competing narrative identifications of victim and perpetrator, utopian and dystopian proposals for trauma resolution, the performative power of constructed events, and the distribution of organizational resources. Alexander explores these processes in richly textured case studies of cultural-trauma origins and effects, from the universalism of the Holocaust to the particularism of the Israeli right, from postcolonial battles over the Partition of India and Pakistan to the invisibility of the Rape of Nanjing in Maoist China. In a particularly controversial chapter, Alexander describes the idealizing discourse of globalization as a trauma-response to the Cold War. Contemporary societies have often been described as more concerned with the past than the future, more with tragedy than progress. In *Trauma: A Social Theory*, Alexander explains why. **Miller and Freund's Probability and Statistics for Engineers** For an introductory, one/two semester, junior/senior level course in Probability and Statistics or Applied Statistics for engineering, physical science, and mathematics students.
