PEDIATRIC NURSE PRACTITIONER CERTIFICATION REVIEW GUIDE

PRIMARY CARE

Jones & Bartlett Publishers "**The Pediatric Nurse Practitioner Certification Review Guide presents information and current standards of practice for Nurse Practitioners (NP) in the pediatric primary care setting. One major change is the certification for PNPs will only be offered by PNCB instead of both PNCB and American Nurses Credentialing Center (ANCC). PNCB has changed their blueprint. The current content outline is based on our 2017-18 Job Task Analysis (JTA) research. This routine, required research ensures that exam content accurately represents current pediatric primary care nurse practitioner practice in the U.S. The revised book would focus on the current blueprint, released Sept 2018**"--

THE FUTURE OF NURSING

LEADING CHANGE, ADVANCING HEALTH

[National Academies Press](#) **The Future of Nursing** explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
