VISUAL ANTHROPOLOGISTS AT WORK

University of Texas Press **Early in its history, anthropology was a visual as well as verbal discipline. But as time passed, visually oriented professionals became a minority among their colleagues, and most anthropologists used written words rather than audiovisual modes as their professional means of communication. Today, however, contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream. Digital media, small-sized and easy-to-use equipment, and the Internet, with its interactive and public forum websites, democratize roles once relegated to highly trained professionals alone. However, having access to a good set of**

tools does not guarantee accurate and reliable work. Visual anthropology involves much more than media alone. This book presents visual anthropology as a work-in-progress, open to the myriad innovations that the new audiovisual communications technologies bring to the field. It is intended to aid in contextualizing, explaining, and humanizing the storehouse of visual knowledge that university students and general readers now encounter, and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes. Concentrating on documentary photography and ethnographic film, as well as lesser-known areas of study and presentation including dance, painting, architecture, archaeology, and primate research, the book's fifteen contributors feature populations living on all of the world's continents as well as within the United States. The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings.

THE PRONUNCIATION OF ENGLISH

Cambridge University Press This edition of *The Pronunciation of English* incorporates the final results of Daniel Jones' lifelong study of English pronunciation usage. It is the standard work on English phonetics and the name of its author will, in the words of Professor A. C. Gimson, 'remain in linguistic history as the great authority on the pronunciation of British English in the twentieth century'. The *Pronunciation of English* was written originally as a detailed description of the phonetics of English, presented from the point of view of the native English-speaking student. However, it soon established itself as a standard textbook in universities where English is a foreign language, because it provides in a lucid and authoritative manner the basic information needed by foreign students of the language. Most of the book is devoted to a descriptive account of English pronunciation. This is followed by illustrative texts in phonetic transcription of Received Pronunciation and several regional varieties, Scottish and American pronunciation and reconstructions of Shakespearian and Chaucerian speech.

HANDBOOK OF DESCRIPTIVE LINGUISTIC FIELDWORK

Springer Science & Business Media *The Handbook of Descriptive Linguistic Fieldwork* is the most comprehensive reference on linguistic fieldwork on

the market bringing together all the reader needs to carry out successful linguistic fieldwork. Based on the experiences of two veteran linguistic fieldworkers and advice from more than a twenty active fieldwork researchers, this handbook provides an encyclopedic review of current publications on linguistic fieldwork and surveys past and present approaches and solutions to problems in the field, and the historical, political, and social variables correlating with fieldwork in different areas of the world. The discussion of the ethical dimensions of fieldwork, as well as what constitutes the “typical” linguistic fieldwork setting or consultant is explored from multiple perspectives relevant to fieldwork on every continent. Included is information omitted in most other texts on the subject such as the collection, representation, management, and methods of extracting grammatical information from discourse and conversational data as well as the relationship between questionnaire-based elicitation, text-based elicitation, and philology, and the need for combinations of these methods. The book is useful before, during and after linguistic field trips since it provides extensive practical macro and micro organization and planning fieldwork tips as well as a handy sketch of major typological features for use in linguistic analysis. Comprehensive references are provided at the end of each chapter as resources relevant to the reader's particular interests.

WOMEN AND WORK IN SOUTH ASIA

REGIONAL PATTERNS AND PERSPECTIVES

Routledge **Women's work is central to the social and economic aspirations of the countries of South Asia. Their contribution to agriculture, industry and services is critical. However, planners and policy makers frequently ignore women's economic roles, drawing simplistic conclusions from inadequate data. Women and Work in South Asia provides a cross-cultural perspective on research on women's work in South Asia. Integrating macro and micro analysis, Asian and Western contributors analyse the inadequacies of official statistics and explore, through case studies, the cultural and socio-economic position of women at work in the region.**

CAUSATIVES AND CAUSATION

A UNIVERSAL -TYPOLOGICAL PERSPECTIVE

Routledge **Causatives and Causation is the first comprehensive study of causative constructions found in the world's languages. This important new research, based on a data base of more than 600 languages, not only investigates fully the richness and variety of causative types, but also presents an alternative perspective to the traditional typological approach. The new typology enables a better understanding of how the human mind cognizes causation and how this is reflected in language. Causatives and Causation is also an important attempt to integrate language typology with diachrony by constructing a diachronic model of causative affixes on the basis of this new typology. Drawing on the theoretical insight of Role and Reference Grammar, this book provides a case study of the causative constructions in Korean, providing additional support for both the proposed new typology and the diachronic model. It also examines the pragmatic foundations of causatives, an important but previously unexplored area of study.**

ATLAS OF WORLD CULTURES

University of Pittsburgh Pre **The publication of Murdock's Ethnographic Atlas in 1967 marked the first time that descriptive information on the peoples of the world—primitive, historical, and contemporary—had been systematically organized for the purposes of comparative research. In this volume, Murdock has completely revised this work, selecting 563 societies that are most fully and accurately described in ethnographic literature. The identification of each society gives its geographical coordinates and date, its identifying number in the Ethnographic Atlas, and an indication of whether it is included in the Human Relations Area Files or the Standard Cross-Cultural Sample. In addition, bibliographical references are offered for each society. The information and suggested research techniques will be of value to comparativists in anthropology, history, political science, psychology and sociology. Most importantly, it offers a simple method for choosing a valid sample of the world's known societies for cross-cultural**

research.

A HISTORY OF CHRISTIANITY IN INDIA

THE BEGINNINGS TO AD 1707

Cambridge University Press Christians form the third largest religious community in India. How has this come about? There are many studies of separate groups: but there has so far been no major history of the three large groups - Roman Catholic, Protestant and Thomas Christians (Syrians). This work attempts to meet the need for such a history. It goes right back to the beginning and traces the story through the ups and downs of at least fifteen centuries. It includes careful studies of the political and social background and of the non-Christian reactions to the Christian message. The narration is non-technical and should present few difficulties to the thoughtful reader; the more technical matters are dealt with in notes and appendices. This book will be of interest to all students of Church History and will also prove fascinating to many who are concerned with the development of Christianity as a world religion and in the dialogue between different forms of faith.
