TAX ADMINISTRATION 2021 COMPARATIVE INFORMATION ON OECD AND OTHER ADVANCED AND EMERGING ECONOMIES

This report is the ninth edition of the OECD's Tax Administration Series. It provides internationally comparative data on aspects of tax systems and their administration in 59 advanced and emerging economies. The publication presents the results of the 2020 International Survey on Revenue Administration (ISORA), a multi-organisation international survey to collect national-level information and data on tax administration governed by four partner organisations: CIAT, the IMF, IOTA and the OECD. As with the previous survey round, the Asian Development Bank (ADB) also participated in ISORA 2020 along with the four partner organisations. The publication is structured around nine chapters that examine and comment on tax administration performance and trends up to the end of the 2019 fiscal year, and it includes a variety of examples supplied by tax administrations to highlight recent innovations and good practices. The publication also has two annexes containing all the ISORA 2020 data, which form the basis of the analysis in the report, as well as the details of the administrations that participated in this publication.

ADVANCED ANALYTICS FOR BETTER TAX ADMINISTRATION PUTTING DATA TO WORK

PUTTING DATA TO WORK

[OECD Publishing](#) This report highlights the key opportunities and challenges in establishing, operating, or improving advanced analytics functions in tax administrations. The report provides practical examples of how administrations are currently utilising advanced analytics, and discusses key topics.

GREEN TAXATION IN EAST ASIA

[Edward Elgar Publishing](#) "The broad sweep of "green taxation" pollution, carbon, resource and land taxes, and tax incentives for environmental goals makes it complex to analyse. Green Taxation in East Asia is a timely and valuable comparative contribution to an expanding literature. Its scholarly country studies show how green taxes aim to modify behaviour, correct externalities, regulate, or raise revenue. As environmental policy and tax policy move closer together, green taxes become feasible, but are always, as the editors say, "shaped by local political, economic and social circumstances"." Miranda Stewart, University of Melbourne, Australia "In today's world, environmental challenges grow apace and the impact of taxation measures on these will prove critical. Green Taxation in East Asia addresses those challenges. It draws on world-wide experiences (including those from North America and the EU) by analysing and critiquing how green taxation can inform, develop and implement environmental policies in East Asia (and beyond). This is not a sterile tax debate. The authors of this work, all leading scholars in their respective jurisdictions, combine economic, social and local political perspectives on what should work and what should not. The debate is too important to ignore in a world where Kyoto seems a long way from Washington, the fragrant harbour is no longer, and even in the lands down-under, long white clouds and pristine beaches are no longer taken for granted. Taxation is not a panacea for curing environmental ills; but it is, as this book admirably shows, part of the answer." Andrew Halkyard, University of Hong Kong "The right of East Asia to grow its economy and provide its citizens with living standards enjoyed elsewhere is as undeniable as the risk to the global environment from this growth. A volume that contrasts current initiatives in China and Hong Kong to reduce that risk with lessons from international experience presented by leading international experts from four continents, is more than just timely; it can make a key contribution to the development of contemporary thinking on taxation and the environment. This work fits the bill perfectly." Rick Krever, Monash University, Australia "The authors of the jurisdictional chapters in this book are, of necessity, more focussed on analyzing the interaction, today between taxation (and related fiscal measures) and the environment. From these studies it is clear that a great deal is amiss in the way this interface works at present across all the jurisdictions under review. But this research also shows positive steps being taken and great scope for further, positive tax policy development. We can see from this research how smart policy innovation can start right now and also how it can build better foundations for the introduction of more comprehensive, globally effective policy frameworks such as those advanced by Hansen and Sandor. Time is of the essence. The scholarship in this volume shows that lawyers and tax experts are engaged in finding solutions. Can green taxation make a difference? The answer is a resounding "yes"." From the foreword by Christine Loh The core concern of this book is the potential use of taxation and related measures to foster climate-helpful, large-scale change within East Asia. The contributing authors examine key issues such as how Greater China, for instance, confronts severe environmental problems which are a

direct product of several decades of remarkable economic growth. The detailed analysis in this book identifies a range of green taxation guidelines for East Asia as it seeks to drive down striking levels of environmental degradation and tackle the climate change challenge. Addressing an important need in the public policy debate, this book will appeal to academics, students, government policymakers, regulators and practitioners in environmental law, taxation law and policy, as well as, comparative environmental law and comparative taxation law and policy. Public policy commentators and journalists with an interest in the above areas will also find this book worthwhile and informative.

COMPARATIVE INFORMATION ON OECD AND OTHER ADVANCED AND EMERGING ECONOMIES

OECD Publishing This is a unique reference source of high level comparative information on aspects of tax administration system design and practice covering the world's major revenue bodies.

INTRODUCING AN ADVANCE TAX RULING (ATR) REGIME

International Monetary Fund Advance tax rulings are a common feature of mature tax systems. The tax systems of the United States, the United Kingdom, the Netherlands, Germany, Australia, and South Africa all have established ruling practices. Taxpayers can obtain an advance tax ruling in nearly all OECD member countries. Increasingly, many non-OECD countries are also offering advance tax rulings. An advance tax ruling regime seeks to promote clarity and consistency regarding the application of the tax law for both taxpayers and the tax authority. However, there are also inherent risks associated with the proliferation of granting confidential advance tax rulings which are not published or otherwise reported. This Tax Law IMF Technical Note focuses on designing an advance tax ruling regime in the nature of private tax rulings.

TAX ADMINISTRATION 2015 COMPARATIVE INFORMATION ON OECD AND OTHER ADVANCED AND EMERGING ECONOMIES

COMPARATIVE INFORMATION ON OECD AND OTHER ADVANCED AND EMERGING ECONOMIES

OECD Publishing Tax Administration 2015 is a comprehensive survey of tax administration systems, practices and performance across 56 advanced and emerging economies (including all OECD, EU, and G20 members).

HONG KONG TAXATION

LAW AND PRACTICE, 2018-19 EDITION

The Chinese University of Hong Kong Press The book covers the major areas of Hong Kong taxation--Profits Tax, Salaries

Tax, Property Tax, Personal Assessment and Stamp Duty as well as a general overview of international tax issues and how they pertain to Hong Kong. It explains the principles and practice of Hong Kong taxation law together with the relevant Court and Board of Review decisions and contains numerous practical examples. The new edition includes legislative changes up to 31 July 2018 as well as the latest developments pertaining to the OECD's Base Erosion and Profit Shifting (BEPS) project and the proposed measures to be adopted by Hong Kong; the principles and practice of Hong Kong taxation law together with the relevant Court and Board of Review decisions and contains numerous practical examples. The new edition includes legislative changes up to 31 July 2018 as well as the latest developments pertaining to the OECD's Base Erosion and Profit Shifting (BEPS) project and the proposed measures to be adopted by Hong Kong.

GLOBAL TRENDS IN VAT/GST AND DIRECT TAXATION

SCHRIFTENREIHE ISTR BAND 93

Linde Verlag GmbH Recent developments in direct taxes and VAT/GST Taxes - in general - have become the topic of broad legal and policy discussions. VAT and GST are often said to be the fiscal success story of the 20th century, as almost all developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing, European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The contributions in this book make a legal comparison of the recent developments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.

ADVANCED INTRODUCTION TO INTERNATIONAL TAX LAW

SECOND EDITION

Edward Elgar Publishing This Second Edition provides an updated and succinct, yet highly informative overview of the key issues surrounding taxation and international law from Reuven Avi-Yonah, a leading authority on international tax. This small but powerful book surveys the nuances of the varying taxation systems, offering expert insight into the scope, reach and nature of international tax regimes, as well as providing an excellent platform for understanding how the principles of jurisdiction apply to tax and the connected tools that are used by countries in imposing taxes. It includes new material on BEPS, the EU Anti Tax Avoidance Package, and the US Tax Cuts and Jobs Act.

DICTIONARY OF INTERNATIONAL BUSINESS TERMS

Global Professional Publishi With nearly 5000 terms, this is a practical summary of modern business language designed for those studying or conducting international commerce.

THE DELICATE BALANCE

TAX, DISCRETION AND THE RULE OF LAW

IBFD Few aspects of revenue law generate stronger feelings than the exercise of discretionary power by tax administrations. A delicate balance often needs to be struck between the legitimate needs of revenue authorities and the equally legitimate interests and rights of taxpayers. On the one hand, the executive and administration need to have sufficient capacity to apply the law; on the other, there is a need to maintain the principle of the rule of law that it is the elected legislature, and not the executive or tax administration, that establishes tax burdens. The chapters in this volume explore that delicate balance. The Delicate Balance - Tax, Discretion and the Rule of Law considers the critical questions that arise from the intersections of tax, discretion and the rule of law in modern common and civil law jurisdictions: What do we mean by tax discretion and how does it vary in conceptual and practical terms in different tax regimes? -What role should discretion play in tax systems that operate under the rule of law and how large should that role be? -What are the legal, political, institutional and other constraints that can prevent abuse of discretion? -To what extent can, and should, the legislature safely delegate discretionary powers to tax administrations?

BUSINESS TRAVELER INTERNATIONAL

WHO'S THE FAIREST OF THEM ALL?

THE TRUTH ABOUT OPPORTUNITY, TAXES, AND WEALTH IN AMERICA

Encounter Books President Obama has declared that the standard by which all policies and policy outcomes are judged is fairness. He declared in 2011 that "we've sought to ensure that every citizen can count on some basic measure of security. We do this because we recognize that no matter how responsibly we live our lives, any one of us, at any

moment, might face hard times, might face bad luck, might face a crippling illness or a layoff." And that, he says, is why we have a social safety net. He says that returning to a standard of fairness where anyone can get ahead through hard work is the "issue of our time." And perhaps it is. This book explores what it means for our economic system and our economic results to be "fair." Does it mean that everyone has a fair shot? Does it mean that everyone gets the same amount? Does it mean the government can assert the authority to forcibly take from the successful and give to the poor? Is government supposed to be Robin Hood determining who gets what? Or should the market decide that? The surprising answer: nations with free market systems that allow people to get ahead based on their own merit and achievement are the fairest of them all.
