Oxidative Stress in Lung Diseases

Volume 1

Springer Nature This first volume of the comprehensive, two-volume work on oxidative stress in lung disease introduces the molecular mechanisms, and the role of oxidants in the progression of different lung diseases. The lungs of humans and animals are under constant threat from oxidants from either endogenous (e.g. in situ metabolic reactions) or exogenous sources (e.g. air pollutants). Further, oxidative stress causes the oxidation of proteins, DNA and lipids, which in turn generates secondary metabolic products. The book consists of sections, each focusing on different aspects of oxidant-mediated lung diseases. As such it is a unique reference resource for postgraduate students, biomedical researchers and also for the clinicians who are interested in studying and understanding oxidant-mediated lung diseases. The second volume will incorporate other aspects of oxidant-mediated lung diseases, including prevention and therapeutics.

Cry Baby

The Sunday Times bestselling thriller that will have you on the edge of your seat

Hachette UK 'One of the great series of British crime fiction' --- THE TIMES Pre-order Mark Billingham's pulse-racing new Tom Thorne thriller, THE MURDER BOOK, now! It's 1996. Detective Sergeant Tom Thorne is a haunted man. Haunted by the moment he ignored his instinct about a suspect, by the horrific crime that followed and by the memories that come day and night, in sunshine and shadow. So when seven-year-old Kieron Coyne goes missing while playing in the woods with his best friend, Thorne vows he will not make the same mistake again. Cannot. The solitary witness. The strange neighbour. The friendly teacher. All are in Thorne's sights. This case will be the making of him . . . or the breaking. The gripping prequel to Mark Billingham's acclaimed debut, Sleepyhead, Cry Baby is the shocking first case for one of British crime fiction's most iconic detectives. 'Cry Baby is the perfect prequel to send us back to revel in Tom Thorne's twenty years. As if we needed reminding how good Mark Billingham is' VAL MCDERMID 'Tom Thorne is one of the most credible and engaging heroes in contemporary crime fiction. Mark Billingham is a master of psychology, plotting and the contemporary scene - making the Thorne novels the complete package. Twenty years in and better than ever' IAN RANKIN 'Mark Billingham is one the biggest names in crime fiction and one the genre's most formidable talents' PETER JAMES 'Billingham is always a must read' HARLAN COBEN

Time of Death

Open Road + Grove/Atlantic Two British police detectives take on a case close to home: “One of the most consistently entertaining, insightful crime writers working today” (Gillian Flynn). One of Entertainment Weekly’s “10 Great Summer Thrillers” Tom Thorne is on holiday with his girlfriend, DS Helen Weeks, when two girls are abducted in Helen’s hometown in Warwickshire. When a body is discovered and a man is arrested, Helen recognizes the suspect’s wife as an old school friend, and reluctantly returns home for the first time in twenty-five years to lend her support. As his partner faces up to a past she has tried desperately to forget and a media storm engulfs the town, Thorne becomes convinced that, despite overwhelming evidence of his guilt, the police have got the wrong man. There is still an extremely clever killer on the loose—and a missing girl who Thorne believes might still be alive . . . “Some ingenious forensic footwork. What is most impressive about the novel, however, is the astute observation of the beleaguered Bates family, who turn in on themselves as the inhabitants of the town turn on them.” —The Guardian

A Line to Kill

from the global bestselling author of Moonflower Murders

Random House 'EASILY THE GREATEST OF OUR CRIME WRITERS' Sunday Times ***BY THE BESTSELLING AUTHOR OF MOONFLOWER MURDERS*** 'The murders are elaborate, the clues opaque and the mystery seemingly unsolvable, until Hawthorne steps in with customary aplomb and explains all. As a mystery, this book is immensely satisfying. But as a meta-story - an extravagant, knowing satire ... knowing send-up of the author himself; and a homage to the Golden Age of mystery - it is pure delight.' NEW YORK TIMES Private Investigator Daniel Hawthorne and the writer Anthony Horowitz have been invited to a literary festival on the island of Alderney to talk about their new book. Very soon they discover that dark forces are at work. Alderney is in turmoil over a planned power line that will cut through it, desecrating a war cemetery and turning neighbour against neighbour. And the visiting authors seem to be harbouring any number of unpleasant secrets. When the festival's wealthy sponsor is found brutally murdered, Alderney goes into lockdown and Hawthorne knows he doesn't have to look too far for suspects. There's no escape. The killer is still on the island. And there's about to be a second death . . .

'This is crime fiction as dazzling entertainment' SUNDAY TIMES 'Witty, wry, clever, a fabulous detective story and perfect summer reading' KATE MOSSE 'Funny, intriguing, thrilling and thought-provoking: a marvellous mystery' ADAM HAMDY 'A golden-age whodunnit on steroids' KIRKUS REVIEWS 'My favourite literary hero at the moment is Anthony Horowitz' SHARI LAPENA

Something to Hide

A Lynley Novel

Penguin An Instant New York Times Bestseller! Detective Sergeant Barbara Havers and Detective Inspector Thomas Lynley are back in the next Lynley novel from #1 New York Times bestselling author Elizabeth George. When a police detective is taken off life support after falling into a coma, only an autopsy reveals the murderous act that precipitated her death. She'd been working on a special task force within North London's Nigerian community, and Acting Detective Superintendent Thomas Lynley is assigned to the case, which has far-reaching cultural associations that have nothing to do with life as he knows it. In his pursuit of a killer determined to remain hidden, he's assisted by Detective Sergeants Barbara Havers and Winston Nkata. They must sort through the lies and the secret lives of people whose superficial cooperation masks the damage they do to one another.

Albert and Jakobiec's Principles and Practice of Ophthalmology

Volume 2

Springer Keeping up to date with advances in comprehensive ophthalmology and in the ophthalmic sub-specialties is extremely difficult because of the accelerating rapidity with which new information and technology become available and the diminishing time and opportunity for practitioners and trainees to read and learn. The first edition of Albert and Jakobiec's Principles and Practice (1994) was conceived with the idea of utilizing an electronic, updated version in which the chapters were revised by the chapter authors on an annual or semi-annual basis, but the technology was not sufficiently advanced to achieve this goal. Subsequent editions (2000 and 2008) were organized by Saunders and the last published by Elsevier (of which Springer has obtained the complete rights to move forward with the 4th edition, see attachment). The third edition sold 1950 copies since 2009-2012 plus 21 copies of the ebook were sold in that time. From 2012-2015, 422 copies were sold. The monthly online usage numbers up through 2016 were approximately 3300 views (includes chapter views and downloads). All of these numbers came courtesy of Dr. Albert, via his former Elsevier editor, Russell Gabbedy and Dr. Albert's royalty statements. For more than two decades, this text has provided its readers with authoritative and comprehensive coverage of all facets of ophthalmology, written and edited by a group of authors who represented a "Who's Who" in ophthalmology. By using Springer's Meteor platform, with its ability to allow authors and editors access to updating their chapters online annually/semi-annually, and with the recruitment of select chapter authors, this work's usefulness as the standard text in ophthalmology will be maintained and expanded upon by Springer. Back Cover Copy Draft text: The 4th edition of this comprehensive and authoritative text is written by hundreds of the most distinguished authorities from around the world and edited by three leaders in the field, providing today's best answers to every question that arises in ones ophthalmology practice. Richly illustrated with thousands of high quality, full color, clinically-relevant images, Albert and Jakobiec's Principles and Practice of Ophthalmology, 4th Edition covers every scientific and clinical principle in ophthalmology, ensuring that the reader will always be able to find the guidance needed to diagnose and manage patients' ocular problems and meet today's standards of care. Written for practicing ophthalmologists and trainees, this book delivers in-depth guidance on new diagnostic approaches, operative techniques, and treatment options, as well as coherent explanations of every new scientific concept and its clinical importance. The 4th edition will prove to be the source every practicing clinician needs to efficiently and confidently overcome any clinical challenge they may face. Updates include new chapters on anterior and posterior segment diseases, as well as chapters more focused on treatment, plus thousands of new, high-quality, color images and illustrations, updated references, and information on the most cutting-edge technology used by clinicians in their practices today. Additionally, readers will enjoy the same, user-friendly, full-color design they remember from the previous edition, complete with many at-a-glance summary tables, algorithms, boxes, and diagrams that allow the reader to locate the assistance needed more rapidly than ever. "I am familiar with the book and well recognized authors and Editors. The book in its current form is encyclopedic. Could be more focused on treatment. Long duration between 3rd and the 4th edition necessitates almost complete rework. The proposal hits on the key aspects for a successful textbook. The unique advantages are its name recognition (20 yrs of legacy) and established track record. Would support the proposal." Dr. Arun Singh, Cleveland Clinic, Department of Ophthalmology (Springer's EiO series editor and regular Springer volume editor): - I shared these comments with the VE's and they have acknowledged that all chapters will be re-worked in one way or another (from basic, updated references to complete re-writes of chapters and updated, clinically relevant, full-color photos). "...This has always been a very authoritative and prestigious text with encyclopedic knowledge from prestigious authors and contributors. It has served, in the past, as a standard approach for all residents in training, as well as comprehensive ophthalmologists and people in allied fields. Formerly, optometrists did not purchase books, but they do now. My Retinal Atlas is a good example of how they are trying to understand the ophthalmic principles and practices to enhance their profession. One addition to the new version would be imaging...anterior and posterior segment diseases. This would be essential to allow a broad interest and comprehensive training and learning experience." - Dr. Lawrence Yannuzzi, MD, President The Macula Foundation, Professor of Clinical Ophthalmology, Columbia University (current Springer Volume Editor). - I shared these comments with the VE's and they agreed to add the anterior and posterior segment diseases (and had been planning on it) Reviews of the last edition: "The reference by which other ophthalmology texts are judged." — Archives of Ophthalmology "The current standard in comprehensive ophthalmology textbooks." — JAMA "A magnificent encyclopedic work...A ready source of

information when getting ready to perform a seldom-done surgical procedure or when stumped with an unusual clinical problem." — Survey of Ophthalmology "This is a wonderful set of volumes with top quality in their coverage of current ophthalmology, a valuable addition to the library of all ophthalmologists." Graefe's Archive for Clinical and Experimental Ophthalmology, September 2009 "In 1994, Daniel M. Albert and Frederik A. Jakobiec produced the first edition of this award-winning and esteemed masterwork, which is used by the ophthalmic community worldwide as reference. The third edition... is a 4-volume, 5502-page update of this magnificent encyclopedic work. A highpoint of this new edition is the website access...this is a wonderful set of volumes with top quality in their coverage of current ophthalmology, a valuable addition to the library of all ophthalmologists." - Springer: Graefes Arch Clin Exp Ophthalmol (2009) 247:1437-1438

Affective Health and Masculinities in South Africa

An Ethnography of (In)vulnerability

Routledge Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
