OPEN ACCESS AND THE HUMANITIES

CONTEXTS, CONTROVERSIES AND THE FUTURE

Cambridge University Press *If you work in a university, you are almost certain to have heard the term 'open access' in the past couple of years. You may also have heard either that it is the utopian answer to all the problems of research dissemination or perhaps that it marks the beginning of an apocalyptic new era of 'pay-to-say' publishing. In this book, Martin Paul Eve sets out the histories, contexts and controversies for open access, specifically in the humanities. Broaching practical elements alongside economic histories, open licensing, monographs and funder policies, this book is a must-read for both those new to ideas about open-access scholarly communications and those with an already keen interest in the latest developments for the humanities. This title is also available as Open Access via Cambridge Books Online.*

THE AOPA PILOT

VOICE OF GENERAL AVIATION

A GUIDE TO THE PREVENTIVE CONSERVATION OF PHOTOGRAPH COLLECTIONS

Getty Publications *A resource for the photographic conservator, conservation scientist, curator, as well as professional collector, this volume synthesizes both the masses of research that has been completed to date and the international standards that have been established on the subject.*

ENCOURAGING COLLECTIONS MOBILITY

A WAY FORWARD FOR MUSEUMS IN EUROPE

ICOM CODE OF ETHICS FOR MUSEUMS

Icom *Contains minimum standards of professional practice and performance for museums and their staff.*

MODERN ROBOTICS

Cambridge University Press *A modern and unified treatment of the mechanics, planning, and control of robots, suitable for a first course in robotics.*

FLYING MAGAZINE**73 MAGAZINE FOR RADIO AMATEURS****THE UNESCO TRAINING MANUAL FOR THE PROTECTION OF THE UNDERWATER CULTURAL HERITAGE IN LATIN AMERICA AND THE CARIBBEAN**

UNESCO Publishing

CQ**THE RADIO AMATEURS' JOURNAL****AIRCRAFT RADIO SYSTEMS**

Pitman Publishing

ARRL'S VHF DIGITAL HANDBOOK

American Radio Relay League *Without complicated "owners manual" jargon, ARRL's VHF Digital Handbook presents the material through a unique how-to approach and friendly, conversational style. Readers will understand how to set up and operate their equipment and software, and make the best use of their VHF digital station.--Book cover.*

POWER ELECTRONICS DESIGN**A PRACTITIONER'S GUIDE**

Elsevier *This book serves as an invaluable reference to Power Electronics Design, covering the application of high-power semiconductor technology to large motor drives, power supplies, power conversion equipment, electric utility auxiliaries and numerous other applications. Design engineers, design drafters and technicians in the power electronics industry, as well as students studying power electronics in various contexts, will benefit from Keith Sueker's decades of experience in the industry. With this experience, the author has put the overall power electronics design process in the context of primary electronic components and the many associated components required for a system. The seeming complexity of power electronics design is made transparent with Keith Sueker's simple, direct language and a minimum reliance on mathematics. Readers will come away with a wealth of practical design information that has hundreds of explanatory diagrams to support it, having also seen many examples of potential pitfalls in the design process. * A down-to-earth approach, free of complex jargon and esoteric information. * Over 200 illustrations to clarify discussion points. * Examples of costly design goofs will provide invaluable cautionary advice.*

NATURAL ORGANICS REMOVAL USING MEMBRANES

PRINCIPLES, PERFORMANCE, AND COST

CRC Press *Natural Organics Removal Using Membranes: Principles, Performance, and Cost* provides a unique combination of important new data and operational parameters on the role of membranes in removing natural organic materials during water treatment. It examines and compares the three pressure-driven membrane processes of choice-ultrafiltration, microfiltration, and nanofiltration-in removing natural organics, including disinfection by-products and compounds implicated as carcinogens. After presenting a detailed investigation of natural organics, the text follows with a careful analysis of the efficiencies and operating conditions of the main membrane processes, including discussions of costs and fouling. This reference book introduces membranes in water treatment and shows how various methods can be compared with regard to improving process design, reducing fouling, and selecting the most suitable process, given a variety of source water parameters. The book contains a most comprehensive literature survey on membranes, one that should be of great value to all investigators of membranes in drinking water.

THE CONSERVATION OF ARTIFACTS MADE FROM PLANT MATERIALS

Getty Publications *This teaching guide covers the identification, deterioration, and conservation of artifacts made from plant materials. Detailed information on plant anatomy, morphology, and development, focusing on information useful to the conservator in identifying plant fibers are described, as well as the processing, construction, and decorative techniques commonly used in such artifacts. A final chapter provides a thorough discussion of conservation, preservation, storage, and restoration methods. This is a valuable resource to conservators and students alike.*

HANDBOOK FOR MARINE RADIO COMMUNICATION 5E

Taylor & Francis *This new edition explains the GMDSS rules, regulations and procedures. The book contains the regulations drawn from the International Telecommunication Union (ITU) and it is a useful teaching aid for GMDSS topics thoroughly updated to explain: significant changes in operating procedures to GMDSS, improvements to communication equipment and the new opportunities they provide, including: Automatic Identification Systems (AIS), Inmarsat Fleet services amendments to GMDSS radio maintenance certificate. Also expanded to include sections on use of radio for: piracy and armed robbery attacks at sea, medical advice and assistance, Mede Vac; and contains updated and extended contact details of important organisations relevant to GMDSS.*

THE FUTURE OF THE BAMİYAN BUDDHA STATUES

HERITAGE RECONSTRUCTION IN THEORY AND PRACTICE

Springer Nature This Open Access book explores heritage conservation ethics of post conflict and provides an important historical record of the possible reconstruction of the Bamiyan Buddha statues, which was inscribed in the UNESCO World Heritage List in Danger in 2003 as “Cultural Landscape and Archaeological Remains of the Bamiyan Valley”. With the condition that most surface of the original fragments of the Buddha statues were lost due to acts of deliberate destruction, this publication explores a reference point for conservation practitioners and policy makers around the world as they consider how to respond to on-going acts of destruction of cultural heritage. Whilst there has been an emerging debate to the ethics and nature of heritage reconstruction, this volume provides a plethora of ideas and approaches concerning the future treatment of the Bamiyan Buddha statues. It also addresses a number of fundamental questions on potential heritage reconstruction: how it will be done; who will decide; and what it should be done for. Moreover when it comes to the inscribed World Heritage properties, how can reconstructed heritage using non-original materials be considered to retain authenticity? With a view to serving as a precedent for potential decisions taken elsewhere in the world for cultural properties impacted by acts of violence and destruction, this volume introduces academic researches, experiences and observations of heritage conservation theory and practice of heritage reconstruction. It also addresses the issue not merely from the point of a material conservation philosophy but within the context of holistic strategies for the protection of human rights and promotion of peace building.

DIGITAL LIBRARIES AND ARCHIVES

7TH ITALIAN RESEARCH CONFERENCE, IRCDL 2011, PISA, ITALY, JANUARY 20-21, 2011. REVISED PAPERS

Springer This book constitutes the thoroughly refereed proceedings of the 7th Italian Research Conference on Digital Libraries held in Pisa, Italy, in January 2011. The 20 revised full papers presented were carefully reviewed and cover topics of interest such as system interoperability and data integration; formal and methodological foundations of digital libraries; semantic web and linked data for digital libraries; multilingual information access; digital library infrastructures; metadata creation and management; search engines for digital library systems; evaluation and log data; handling audio/visual and non-traditional objects; user interfaces and visualization; digital library quality.

COMPUTERS & ELECTRONICS

GREEK AND ROMAN TEXTILES AND DRESS

AN INTERDISCIPLINARY ANTHOLOGY

Oxbow Books Twenty chapters present the range of current research into the study of textiles and dress in classical antiquity, stressing the need for cross and inter-disciplinary study in order to gain the fullest picture of surviving material. Issues addressed include: the importance of studying textiles to understand economy and landscape in the past; different types of embellishments of dress from weaving techniques to the (late introduction) of embroidery; the close links between the language of ancient mathematics and weaving; the relationships of iconography to the realities of clothed bodies including a paper on the ground breaking research on the polychromy of ancient statuary; dye recipes and methods of analysis; case studies of garments in Spanish, Viennese and Greek collections which discuss methods of analysis and conservation; analyses of textile tools from across the Mediterranean; discussions of trade and ethnicity to the workshop relations in Roman fulleries. Multiple aspects of the production of textiles and the social meaning of dress are included here to offer the reader an up-to-date account of the state of current research. The volume opens up the range of questions that can now be answered when looking at fragments of textiles and examining written and iconographic images of dressed individuals in a range of media. The volume is part of a pair together with Prehistoric, Ancient Near Eastern and Aegean Textiles and Dress: an interdisciplinary anthology edited by Mary Harlow, Cécile Michel and Marie-Louise Nosch

CONSERVATION RESEARCH IN LIBRARIES

Walter de Gruyter GmbH & Co KG Conservation research in libraries is a rapidly growing field. This book places analysis within its context in conservation and provides examples of how this expensive resource can be used. Through a series of case studies, it describes major analytical procedures, including visualization, molecular, elemental and separation techniques as well as chemical tests. It is thus a suitable reference work for library conservators and curators. Please note: Despite careful production of our books, sometimes mistakes happen. Unfortunately, the authorship for some chapters wasn't

correct in the original publication. Chapter 5 was written by Andrew Beeby and David Howell as co-author, chapter 6 by Kelly Domoney and David Howell as co-author, and chapter 9 is authored by Anita Quye. This will be corrected. We apologize for the mistake.

METADATA AND SEMANTIC RESEARCH

14TH INTERNATIONAL CONFERENCE, MTSR 2020, MADRID, SPAIN, DECEMBER 2-4, 2020, REVISED SELECTED PAPERS

Springer Nature This book constitutes the thoroughly refereed proceedings of the 14th International Conference on Metadata and Semantic Research, MTSR 2020, held in Madrid, Spain, in December 2020. Due to the COVID-19 pandemic the conference was held online. The 24 full and 13 short papers presented were carefully reviewed and selected from 82 submissions. The papers are organized in the following tracks: metadata, linked data, semantics and ontologies; metadata and semantics for digital libraries, information retrieval, big, linked, social and open data; metadata and semantics for agriculture, food, and environment, AgroSEM 2020; metadata and semantics for open repositories, research information systems and data infrastructures; digital humanities and digital curation, DHC 2020; metadata and semantics for cultural collections and applications; european and national projects; knowledge IT artifacts (KITA) in professional communities and aggregations, KITA 2020.

THE ENGINEERING DESIGN OF SYSTEMS

MODELS AND METHODS

John Wiley & Sons New for the third edition, chapters on: Complete Exercise of the SE Process, System Science and Analytics and The Value of Systems Engineering The book takes a model-based approach to key systems engineering design activities and introduces methods and models used in the real world. This book is divided into three major parts: (1) Introduction, Overview and Basic Knowledge, (2) Design and Integration Topics, (3) Supplemental Topics. The first part provides an introduction to the issues associated with the engineering of a system. The second part covers the critical material required to understand the major elements needed in the engineering design of any system: requirements, architectures (functional, physical, and allocated), interfaces, and qualification. The final part reviews methods for data, process, and behavior modeling, decision analysis, system science and analytics, and the value of systems engineering. Chapter 1 has been rewritten to integrate the new chapters and updates were made throughout the original chapters. Provides an overview of modeling, modeling methods associated with SysML, and IDEF0 Includes a new Chapter 12 that provides a comprehensive review of the topics discussed in Chapters 6 through 11 via a simple system – an automated soda machine Features a new Chapter 15 that reviews General System Theory, systems science, natural systems, cybernetics, systems thinking, quantitative characterization of systems, system dynamics, constraint theory, and Fermi problems and guesstimation Includes a new Chapter 16 on the value of systems engineering with five primary value propositions: systems as a goal-seeking system, systems engineering as a communications interface, systems engineering to avert showstoppers, systems engineering to find and fix errors, and systems engineering as risk mitigation The Engineering Design of Systems: Models and Methods, Third Edition is designed to be an introductory reference for professionals as well as a textbook for senior undergraduate and graduate students in systems engineering. Dennis M. Buede, PhD, has thirty-nine years' experience in both the theoretical development and engineering application of systems engineering and decision-support technologies. Dr. Buede has applied systems engineering methods throughout the federal government. He has been a Professor at George Mason University and Stevens Institute of Technology, and is currently President of Innovative Decisions, Inc. He is a Fellow of the International Council on Systems Engineering (INCOSE). William D. Miller is an Executive Principal Analyst at Innovative Decisions, Inc. and Adjunct Professor at the Stevens Institute of Technology. Mr. Miller has forty-two years' experience as an engineer, manager, consultant, and educator in the conceptualization and engineering application of communications technologies, products and services in commercial and government sectors. He is a 48-year member of the IEEE, the former Technical Director of INCOSE and the current Editor-in-Chief of INSIGHT.

PROCEEDING OF INTERNATIONAL CONFERENCE ON COMPUTATIONAL SCIENCE AND APPLICATIONS

ICCSA 2019

Springer Nature The book consists of high-quality papers presented at the International Conference on Computational Science and Applications (ICCSA 2019), held at Maharashtra Institute of Technology World Peace University, Pune, India, from 7 to 9 August 2019. It covers the latest innovations and developments in information and communication technology, discussing topics such as soft computing and intelligent systems, web of sensor networks, drone operating systems, web of sensor networks, wearable smart sensors, automated guided vehicles and many more.

URUSHI

PROCEEDINGS OF THE URUSHI STUDY GROUP, JUNE 10-27, 1985, TOKYO

Getty Publications *An in-depth examination of the Far Eastern lacquerware known as urushi, this book considers the art historical and scientific viewpoints and presents the priorities for urushi's preservation and conservation. These are the proceedings of the Urushi Study Group meeting held in Japan.*

MEMBRANE BIOLOGICAL REACTORS

THEORY, MODELING, DESIGN, MANAGEMENT AND APPLICATIONS TO WASTEWATER REUSE

IWA Publishing *In recent years the MBR market has experienced unprecedented growth. The best practice in the field is constantly changing and unique quality requirements and management issues are regularly emerging. Membrane Biological Reactors: Theory, Modeling, Design, Management and Applications to Wastewater Reuse comprehensively covers the salient features and emerging issues associated with the MBR technology. The book provides thorough coverage starting from biological aspects and fundamentals of membranes, via modeling and design concepts, to practitioners' perspective and good application examples. Membrane Biological Reactors focuses on all the relevant emerging issues raised by including the latest research from renowned experts in the field. It is a valuable reference to the academic and professional community and suitable for undergraduate and postgraduate teaching in Environmental Engineering, Chemical Engineering and Biotechnology.*
