**Matters of Opinion Talking About Public Issues** [Cambridge University Press](#) *Matters of Opinion offers an interesting insight into 'public opinion' as reported in the media, asking where these opinions actually come from, and how they have their effects. Drawing on the analysis of conversations from focus groups, phone-ins and broadcast interviews with members of the public, Greg Myers argues that we must go back to these encounters, asking questions such as what members of the public thought they were being asked, who they were talking as, and whom they were talking to. He reveals that people don't carry a store of opinions, ready to tell strangers; they use opinions in order to get along with other people, and how they say things is as important as what they say. Engaging and informative, this book illuminates debates on research methods, the public sphere and deliberative democracy, on broadcast talk, and on what it means to participate in public life.* **The Spiritual Writings of Amir 'Abd al-Kader** [SUNY Press](#) *A selection of writings by a great nineteenth-century Sufi Shaikh in the direct lineage of Ibn 'Arabi.* **Fallout** *All he wanted was a distraction- what he got was trouble- named Tully. As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable. Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted in Yanni Raz regaining his health and becoming a self-made millionaire after migrating from his native Israel to the United States. Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yanni learned reliable principles and the skills necessary for success. Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by storytelling across the media landscape. You'll learn about integrity in business, asset diversification, and many other life tips that thousands of people learn from Yanni on a daily basis. It is time to become fearless and lead a powerful life. With Yanni's new book Unstoppable, you can do just that.

**The Modern Soccer Coach: Position-Specific Training** In recent years, player development has been a hot topic in the soccer world. With more pressure on coaches to win than ever before, the modern game seems to be less about actual players and more about tactical systems. Press of Mississippi](#) *Autobiography* has seen enormous expansions and challenges over the past decades. One of these expansions has been in comics, and it is an expansion that pushes back against any postmodern notion of the death of the author/subject, while also demanding new approaches from critics. *Drawing from Life: Memory and Subjectivity in Comic Art* is a collection of essays about autobiography, semiautobiography, fictionalized autobiography, memory, and self-narration in sequential art, or comics. Contributors come from a range of academic backgrounds including English, American studies, comparative literature, gender studies, art history, and cultural studies. The book engages with well-known figures such as Art Spiegelman, Marjane Satrapi, and Alison Bechdel; with cult-status figures such as Martin Vaughn-James; and with lesser-known works by artists such as Frédéric Boilet. Negotiations between artist/writer/body and drawn/written/text raise questions of how comics construct identity, and are read and perceived, requiring a critical turn

towards theorizing the comics' viewer. At stake in comic memoir and semi-autobiography is embodiment. Remembering a scene with the intent of rendering it in sequential art requires nonlinear thinking and engagement with physicality. Who was in the room and where? What was worn? Who spoke first? What images dominated the encounter? Did anybody smile? Man or mouse? Unhinged from the summary paragraph, the comics artist must confront the fact of the flesh, or the corporeal world, and they do so with fascinating results. **My Grandma** Benchmark Education Company **Automating with STEP 7 in STL and SCL** Publicis SIMATIC is the worldwide established automation system for implementing industrial control systems for machines, manufacturing plants and industrial processes. **Odes** *Random House* 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, *Observer Book of the Year* Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her - the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here - Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

**Manga Melech** *Tyndale House Publishers, Inc.* "The rise and fall of kings and nations!"--Cover. **Practical Methods for Analysis and Design of HV Installation Grounding Systems** *Academic Press* *Practical Methods for Analysis and Design of HV Installation Grounding Systems* gives readers a basic understanding of the modeling characteristics of the major components of a complex grounding system. One by one, the author develops and analyzes each component as a standalone element,

but then puts them together, considering their mutual disposition, or so-called proximity effect. This is the first book to enable the making and analysis of the most complex grounding systems that are typical for HV substations located in urban areas that uses relatively simple mathematical operations instead of modern computers. Since the presented methods enable problem-solving for more complex issues than the ones solved using National, IEC and/or IEEE standards, this book can be considered as an appendix to these standards. Develops general equations of lumped parameter ladder circuits Includes the analytical expression for determination of ground fault current distribution for a fault anywhere along a cable line Presents measurement and analytical methods for the determination of actual ground fault current distribution for high-voltage substations located in urban areas Provides the analytical procedure for the determination of the critical ground fault position for faults appearing in outgoing transmission lines Defines testing procedure for the correct evaluation of grounding systems of substations located in urban areas
