United States International Taxation embodies the dual goals established for the LexisNexis Graduate Tax Series: to provide graduate tax students with a solid foundation in the applicable rules and to enhance their skills in reading and applying complex statutes and regulations. To this end, the text relies very little on the often-times laborious analysis of cases and other sources that are secondary to the Code and the regulations. Instead, each chapter provides an overview of the substantive content, with emphasis on important issues that are not apparent from the language of the Code and regulations. This book contains teaching materials for law school courses in the United States federal income taxation of persons engaged in cross-border activities and transactions. It contains 21 separate Units that address fundamental concepts of residency and source, the taxation of United States persons (citizens, residents, and domestic corporations) on their activities within the United States, and the safeguard rules in place to curtail potentially abusive tax avoidance in the international context. **Intermediate Accounting** Lo/Fisher is praised for its readability and conversational writing style that helps students better understand difficult concepts in Accounting.
