## Masterpieces of Swiss Entrepreneurship Swiss SMEs Competing in Global Markets

**Springer Nature** This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. Gina Domanig, Managing Partner, Emerald Technology Ventures, Zurich

## Brecon Beacons and South Wales

**Aa Pub** Walking is one of Britain's favorite leisure activities, and these guides feature a variety of mapped walks to suit all abilities. The books feature all the practical detail you need, accompanied by fascinating background reading on the history and wildlife of the area, as well as other local points of interest. All walks are annotated with local points of interest and places to stop for refreshments. Every walk is given a summary of distance, time, gradient, level of difficulty, type of surface and access, landscape, dog friendliness, parking, and public toilets.

## Detection of Intrusions and Malware, and Vulnerability Assessment

## 16th International Conference, DIMVA 2019, Gothenburg, Sweden, June 19–20, 2019, Proceedings

**Springer** This book constitutes the proceedings of the 16th International Conference on Detection of Intrusions and Malware, and Vulnerability Assessment, DIMVA 2019, held in Gothenburg, Sweden, in June 2019. The 23 full papers presented in this volume were carefully reviewed and selected from 80 submissions. The contributions were organized in topical sections named: wild wild web; cyber-physical systems; malware; software security and binary analysis; network security; and attack mitigation.

## The Internet of Things

## Enabling Technologies, Platforms, and Use Cases

**CRC Press** As more and more devices become interconnected through the Internet of Things (IoT), there is an even greater need for this book, which explains the technology, the internetworking, and applications that are making IoT an everyday reality. The book begins with a discussion of IoT "ecosystems" and the technology that enables them, which includes: Wireless Infrastructure and Service Discovery Protocols Integration Technologies and Tools Application and Analytics Enablement Platforms A chapter on next-generation cloud infrastructure explains hosting IoT platforms and applications. A chapter on data analytics throws light on IoT data collection, storage, translation, real-time processing, mining, and analysis, all of which can yield actionable insights from the data collected by IoT applications. There is also a chapter on edge/fog computing. The second half of the book presents various IoT ecosystem use cases. One chapter discusses smart airports and highlights the role of IoT integration. It explains how mobile devices, mobile technology, wearables, RFID sensors, and beacons work together as the core technologies of a smart airport. Integrating these components into the airport ecosystem is examined in detail, and use cases and real-life examples illustrate this IoT ecosystem in operation. Another in-depth look is on envisioning smart healthcare systems in a connected world. This chapter focuses on the requirements, promising applications, and roles of cloud computing and data analytics. The book also examines smart homes, smart cities, and smart governments. The book concludes with a chapter on IoT security and privacy. This chapter examines the emerging security and privacy requirements of IoT environments. The security issues and an assortment of surmounting techniques and best practices are also discussed in this chapter.

## Introduction to Entrepreneurship

## Methodologies and Practices

**Springer Nature** This textbook helps readers increase their entrepreneurial knowledge, improve their competences, and expand their entrepreneurial thinking. The book consists of nine chapters: Expand Entrepreneurial Vision, Improve Entrepreneurial Quality, Prepare for Entrepreneurship Education, Identify Entrepreneurial Opportunities, Build An Entrepreneurship Team, Compose the Business Plan, Planing Entrepreneurial Strategy, Avoid Entrepreneurial Risks, and Optimize Entrepreneurial resources. It allows readers new to the area to gain an understanding of entrepreneurship and provides a solid basis for starting a business in the future. Each chapter includes learning objectives and "leads" at the beginning and ends with review and "think and discuss" sections.

## Male Infertility

## Contemporary Clinical Approaches, Andrology, ART and Antioxidants

**Springer Nature** A groundbreaking contribution to the literature now in its revised and expanded second edition, this textbook offers a comprehensive review of diagnostic and treatment techniques for male infertility. This state-of-the-art, evidence-based textbook incorporates new multidisciplinary and complementary medicine approaches to create a first-of-its-kind guide to treatment strategies for male infertility and beyond. While this new edition is primarily designed as a reference for students and residents in reproductive medicine and andrology, it will be equally useful as well for professionals in urology, reproductive endocrinology, embryology, and research fields who are interested in the role that antioxidants play in male infertility. World-renowned experts in these areas have been selected to participate in this work. Careful selection of the highest quality content will span the whole range of topics in the area of male infertility, providing a complete review of well-established and current diagnostic and treatment techniques for male infertility. The incorporation of 20 new chapters will enhance the book's appeal by including the most recent advances brought to the male infertility arena. Additionally, this edition incorporates new features, including bulleted key points, review criteria and select video clips demonstrating some of the most fascinating male infertility treatment modalities. A dedicated new section on current guidelines on male infertility will enlighten readers on how to most optimally manage male infertility clinical scenarios. Covering all aspects of diagnosis and management, ART, lifestyle factors and associated conditions for male infertility, Male Infertility: Contemporary Clinical Approaches, Andrology, ART and Antioxidants will be a readily accessible, high quality reference for medical students and residents, and will be of significant value to professionals working in the various fields treating this condition as well.

## Here's the Deal

## Don't Touch Me

**Bantam NATIONAL BESTSELLER** An engaging no-holds-barred memoir that reveals Howie Mandel's ongoing struggle with OCD and ADHD—and how it has shaped his life Howie Mandel is one of the most recognizable names in entertainment. But there are aspects of his personal and professional life he's never talked about publicly—until now. Twelve years ago, Mandel first told the world about his "germophobia." He's recently started discussing his adult ADHD as well. Now, for the first time, he reveals the details of his struggle with these challenging disorders. He speaks candidly about the ways

his condition has affected his personal life—as a son, husband, and father of three. Along the way, the versatile performer reveals “the deal” behind his remarkable rise through the show-business ranks, sharing never-before-told anecdotes about his career. As heartfelt as it is hilarious, *Here’s the Deal: Don’t Touch Me* is the story of one man’s effort to draw comic inspiration out of his darkest, most vulnerable places.

## Big Data – BigData 2018

### 7th International Congress, Held as Part of the Services Conference Federation, SCF 2018, Seattle, WA, USA, June 25–30, 2018, Proceedings

Springer This volume constitutes the proceedings of the 7th International Conference on BIGDATA 2018, held as Part of SCF 2018 in Seattle, WA, USA in June 2018. The 22 full papers together with 10 short papers published in this volume were carefully reviewed and selected from 97 submissions. They are organized in topical sections such as Data analysis, data as a service, services computing, data conversion, data storage, data centers, dataflow architectures, data compression, data exchange, data modeling, databases, and data management.

## Telecommunication Economics

### Selected Results of the COST Action IS0605 Econ@Tel

Springer This book constitutes a collaborative and selected documentation of the scientific outcome of the European COST Action IS0605 Econ@Tel “A Telecommunications Economics COST Network” which run from October 2007 to October 2011. Involving experts from around 20 European countries, the goal of Econ@Tel was to develop a strategic research and training network among key people and organizations in order to enhance Europe’s competence in the field of telecommunications economics. Reflecting the organization of the COST Action IS0605 Econ@Tel in working groups the following four major research areas are addressed: - evolution and regulation of communication ecosystems; - social and policy implications of communication technologies; - economics and governance of future networks; - future networks management architectures and mechanisms.

## ColdFusion Presents: New Thinking

### From Einstein to Artificial Intelligence, the Science and Technology That Transformed Our World

Mango Media Inc. The creator of YouTube’s ColdFusion explores the development of technology from Industrial Revolution to Artificial Intelligence to figure out what’s next. As each new stage of technology builds on the last, advancements start to progress at an exponential rate. In order to know where we’re headed, it’s essential to know how we got here. What hidden stories lie behind the technology we use today? What drove the men and women who invented it? What were those special moments that changed the world forever? Dagogo Altraide explores these questions in a history of human innovation that reveals how new technologies influence each other, how our modern world came to be, and what future innovations might look like. From the electric world of Tesla and the steam engine revolution to the first computers, the invention of the internet, and the rise of artificial intelligence, *New Thinking* tells the stories of the men and women who changed our world with the power of new thought.

## Strategic Management and Business Policy

### Entering 21st Century Global Society

### Contemporary Strategy Analysis Text Only

Wiley Global Education Robert M. Grant combines a highly accessible writing style with a concentration on the fundamentals of value creation and an emphasis on practicality in this leading strategy text. In this new edition, he includes an even greater focus on strategy implementation that reflects the needs of firms to reconcile scale economies with entrepreneurial flexibility, innovation with cost efficiency, and globalization with local responsiveness. This edition also incorporates some of the key strategic issues of today including: post-financial crisis adjustment, the continuing rise of China, India and Brazil, and the increased emphasis on ethics and sustainability. Coverage is also provided on strategy in not-for-profit organizations. *Contemporary Strategy Analysis, 8th Edition*, is suitable for both MBA and advanced undergraduate students. It has been adopted by leading business schools all across the world.

## The Poultry Book

### A Treatise on Breeding and General Management of Domestic Fowls, with Numerous Original Descriptions and Portraits from Life

## Distracted

### Why Students Can't Focus and What You Can Do About It

Hachette UK Keeping students focused can be difficult in a world filled with distractions -- which is why a renowned educator created a scientific solution to one of every teacher's biggest problems. Why is it so hard to get students to pay attention? Conventional wisdom blames iPhones, insisting that access to technology has ruined students' ability to focus. The logical response is to ban electronics in class. But acclaimed educator James M. Lang argues that this solution obscures a deeper problem: how we teach is often at odds with how students learn. Classrooms are designed to force students into long periods of intense focus, but emerging science reveals that the brain is wired for distraction. We learn best when able to actively seek and synthesize new information. In *Distracted*, Lang rethinks the practice of teaching, revealing how educators can structure their classrooms less as distraction-free zones and more as environments where they can actively cultivate their students' attention. Brimming with ideas and grounded in new research, *Distracted* offers an innovative plan for the most important lesson of all: how to learn.

## Spectral Line Shapes in Astrophysics and Related Topics

Spectral lines, widths, and shapes are powerful tools for emitting/absorbing gas diagnostics in different astrophysical objects (from the solar system to the most distant objects in the universe--quasars). On the other hand, experimental and theoretical investigations of laboratory plasma have been applied in spectroscopic astrophysical research, especially in research on atomic data needed for line shape calculations. Data on spectral lines and their profiles are also important for diagnostics, analysis, and the modelling of fusion plasma, laser-produced plasma, laser design and development, and various plasmas in industry and technology, like light sources based on plasmas or the welding and piercing of metals by laser-produced plasma. The papers from this book can be divided into four groups: 1. stark broadening data for astrophysical and laboratory plasma investigations; 2. applications of spectral lines for astrophysical and laboratory plasma research; 3. spectral line phenomena in extragalactic objects, and 4. laboratory astrophysics results for spectra investigation. The reviews and research papers, representing new research on the topics presented in this book, are of interest for specialists and PhD students. We hope that the present book will be useful and interesting for scientists interested in the investigation of spectral line shapes and will contribute to the education of young researchers and PhD students.

## ICT for Transport

### Opportunities and Threats

Edward Elgar Publishing Information and Communication Technologies (ICT) are rapidly evolving and taking centre stage in everyday life in the 21st century alongside the increasing importance and value of information. This is particularly evident in the transport sector where

## The Great Economists

### How Their Ideas Can Help Us Today

Penguin UK What can the ideas of history's greatest economists tell us about the most important issues of our time? 'The best place to start to learn about the very greatest economists of all time' Professor Tyler Cowen, author of *The Complacent Class* and *The Great Stagnation* Since the days of Adam Smith, economists have grappled with a series of familiar problems - but often their ideas are hard to digest, before we even try to apply them to today's issues. Linda Yueh is renowned for her combination of erudition, as an accomplished economist herself, and accessibility, as a leading writer and broadcaster in this field; and in *The Great Economists* she explains the key thoughts of history's greatest economists, how their lives and times affected their ideas, how our lives have been influenced by their work, and how they could help with the policy challenges that we face today. In the light of current economic problems, and in particular economic growth, Yueh explores the thoughts of economists from Adam Smith and David Ricardo through Joan Robinson and Milton Friedman to Douglass North and Robert Solow. Along the way she asks, for example: what do the ideas of Karl Marx tell us about the likely future for the Chinese economy? How does the work of John Maynard Keynes, who argued for government spending to create full employment, help us think about state investment? And with globalization in trouble, what can we learn about handling Brexit and Trumpism? In one accessible volume, this expert new voice provides an overarching guide to the biggest questions of our time. *The Great Economists* includes: Adam Smith David Ricardo Karl Marx Alfred Marshall Irving Fisher John Maynard Keynes Joseph Schumpeter Friedrich Hayek Joan Robinson Milton Friedman Douglass North Robert Solow 'Economics students, like others, can learn a lot from this book' - Professor Paul Collier, author of *The Bottom Billion* 'Not only a great way to learn in an easily readable manner about some of the greatest economic influences of the past, but also a good way to test your own a priori assumptions about some of the big challenges of our time.' - Lord Jim O'Neill, former Chairman at Goldman Sachs Asset Management, former UK Treasury Minister, and author of *The Growth Map* 'An extremely engaging survey of the lifetimes and ideas of the great thinkers of economic history.' - Professor Kenneth Rogoff, author of *The Curse of Cash* and co-author of *This Time is Different* 'This book is a very readable introduction to the lives and thinking of the greats.' - Professor Raghuram Rajan, former Governor of the Reserve Bank of India, and author of *I Do What I Do* and *Fault Lines* 'Read it not only to learn about the world's great economists, but also to see how consequential thought innovations can be, and have been.' - Mohamed el-Erian, Chief Economic Adviser at Allianz, former CEO of PIMCO

### Stress Tested: The Covid-19 Pandemic and Canadian National Security

University of Calgary Press The emergence of COVID-19 has raised urgent and important questions about the role of Canadian intelligence and national security within a global health crisis. Some argue that the effects of COVID-19 on Canada represent an intelligence failure, or a failure of early warning. Others argue that the role of intelligence and national security in matters of health is--and should remain--limited. At the same time, traditional security threats have rapidly evolved, themselves impacted and influenced by the global pandemic. *Stress Tested* brings together leading experts to examine the role of Canada's national security and intelligence community in anticipating, responding to, and managing a global public welfare emergency. This interdisciplinary collection offers a clear-eyed view of successes, failures, and lessons learned in Canada's pandemic response. Addressing topics including supply chain disruptions, infrastructure security, the ethics of surveillance within the context of pandemic response, the threats and potential threats of digital misinformation and fringe beliefs, and the challenges of maintaining security and intelligence operations during an ongoing pandemic, *Stress Tested* is essential reading for anyone interested in the lasting impacts of the COVID-19 pandemic.

### Second International Conference on Signal-Image Technology and Internet-Based Systems, SITIS 2006, Hammamet, Tunisia, December 17-21, 2006, Revised Selected Papers

Springer Science & Business Media This book constitutes the thoroughly refereed post-conference proceedings of the Second International Conference on on Signal-Image Technology and Internet-Based Systems, SITIS 2006, held in Hammamet, Tunisia, in December, 2006. The 33 full papers were carefully reviewed and selected from the best papers presented at the conference and are presented in revised and extended form. Part of the papers focus on the emerging modeling, representation and retrieval techniques that take into account the amount, type and diversity of information accessible in distributed computing environment. Other contributions are devoted to emerging and novel concepts, architectures and methodologies for creating an interconnected world in which information can be exchanged easily, tasks can be processed collaboratively, and communities of users with similarly interests can be formed while addressing security threats that are present more than ever before.

### Thyroid Ultrasound

### From Simple to Complex

Springer This book is a wide-ranging and up-to-date guide to the use of ultrasound for imaging of the thyroid that will meet the needs of novices while providing more experienced professionals with advanced information. All of the techniques employed in modern thyroid ultrasound are covered, from conventional grayscale and Doppler imaging to elastography and contrast-enhanced ultrasound, with a focus on practical aspects and with detailed analysis of their diagnostic value and limitations. The characteristic ultrasound findings of the normal thyroid and a wide range of thyroid diseases and disorders are described with the aid of hundreds of high-quality images. Diffuse changes and thyroid lesions are discussed in depth, paying close attention to aspects of importance for early detection and differential diagnosis. In this context the authors summarize their personal experiences in the use of qualitative parameters of compression elastography and quantitative data of shear-wave elastography. In addition, a practical approach to the risk stratification of thyroid nodules is proposed. The book concludes with a resumé of the main challenges and pitfalls in thyroid ultrasound.

### Binocular Highlights

### 99 Celestial Sights for Binocular Users

Sky Publishing Corporation *Binocular Highlights* is a tour of 96 different celestial sights ? from softly glowing clouds of gas and dust to unusual stars, clumps of stars, and vast star cities (galaxies) ? all visible in binoculars. Each object is plotted on a detailed, easy-to-use star map, and most of these sights can be found even in a light-polluted sky. Also included are four seasonal all-sky charts that help locate each highlight. You don't need fancy or expensive equipment to enjoy the wonders of the night sky. In fact, as even experienced star gazers know, to go beyond the naked-eye sky and delve deep into the universe, all you need are binoculars ? even the ones hanging unused in your closet. If you don't own any, *Binocular Highlights* explains what to look for when choosing binoculars for star gazing and provides observing tips for users of these portable and versatile mini-telescopes. Spiral-bound with readable paper spine, full color throughout.

### A Stargazing Program for Beginners

### A Pocket Field Guide

Springer Sets out a simple month-by-month program to reveal all of the night sky's biggest and most beautiful secrets in just one year - and with only a few hours of stargazing each month By investing just an hour a week and \$50 in binoculars, it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns - and what they tell us about Earth, the seasons and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are - to the beginner - almost beyond belief. As well as the vital constellations and clusters, and the weird and wonderful nebulas, he searches out "dark sky destinations" across the globe that help increase

knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star-charts, binoculars, smartphone apps, telescopes, spots satellites and attempts basic astro-photography. By year's end, the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are and even where the Galactic Center Point is.

## Manufacturing Facilities Design and Material Handling

Pearson Educación This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

## The Combination Microwave Cook

## Recipes for Combination Microwaves and Microwaves with Built-in Grills

Hachette UK This fully revised and updated edition of The Combination Microwave Cook has over 100 recipes - from simple snacks, vegetable, vegetarian, meat, fish and poultry dishes, to sweet and savoury bakes and pastries - all developed to make full use of these ultra modern appliances. Combine the well-known advantages of microwaves with the traditional crisp, golden finish which makes dishes so appetising. Imagine crisp, flaky pastry, golden-brown gratin and baked pasta dishes, main dishes, cakes and desserts, all cooked (and browned) in a fraction of the conventional cooking time.

## The Challenge of Sustainability

## Corporate Governance in a Complicated World

Walter de Gruyter GmbH & Co KG The Challenge of Sustainability: Corporate Governance in a Complicated World reviews the evolution of five types of corporate governance and their different sustainability objectives. It discusses the challenges for boards in achieving sustainability from an environmental, economic, employment, and social perspective and introduces the concept of a political tragedy of the commons if boards do what is in the best interests of their profitability only, without considering their responsibilities and unintended consequences for their stakeholders. It explains how volatility, uncertainty, complexity, and ambiguity complicate making sustainable decisions. This book explores ways of helping prevent such negative outcomes. John Zinkin asserts the director's need to reconcile volatility with vision, uncertainty with understanding, complexity with courage and commitment, and ambiguity with adaptability. To prevent a potential political tragedy of the commons, the book suggests new decision-making processes; treating employees differently; and makes the case for reforming capitalism. It is aimed at managers, board members and all those who influence them, including shareholder activists, corporate legal personnel, politicians, activists and general readers interested in applying some of these suggestions in their roles as stakeholders, managers and directors.

## Critical Risks of Different Economic Sectors

## Based on the Analysis of More Than 500 Incidents, Accidents and Disasters

Springer Nature This book explores the major differences between the kinds of risk encountered in different sectors of industry - production (including agriculture) and services - and identifies the main features of accidents within different industries. Because of these differences, unique risk-mitigation measures will need to be implemented in one industry that cannot be implemented in another, leading to large managerial differences between these broad economic sectors. Based on the analysis of more than 500 disasters, accidents and incidents - around 230 cases from the production sector and around 280 cases from the service sector - the authors compare the risk response actions appropriate within different sectors, and establish when and how it is possible to generalize the experience of dealing with risks in any given industry to a wider field of economic activity. This book is mainly intended for executives, strategists, senior risk managers of enterprise-wide organizations and risk management experts engaged in academic or consulting work. By setting out clearly the sector differences in risk management, the authors aim to improve the practice of general risk assessment with regard to identifying and prioritizing risks, and of risk control with regard to planning appropriate mitigation measures.

## Mammalian Cell Viability

## Methods and Protocols

Humana Press Whether the question is one of basic cell survival, or whether it is being used to correlate cell number to some other factor such as matrix synthesis, an estimate of cell viability is universally required. In Mammalian Cell Viability: Methods and Protocols, experts in the field describe methods from the most basic which can be performed in any laboratory, to some which require specific pieces of equipment. Initially focusing on methods for monolayer and suspension cells, later chapters describe methods for determining viability within tissue sections and 3 dimensional culture systems. Finally, methods requiring highly specialized equipment are described in order to explain what is possible. Written in the highly successful Methods in Molecular Biology™ series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and vital tips on troubleshooting and avoiding known pitfalls. Practical and adaptable, Mammalian Cell Viability: Methods and Protocols serves as a self-contained laboratory manual useful to both experienced researchers and those new to this incredibly important and influential field.

## Intelligent Computing Methodologies

## 16th International Conference, ICIC 2020, Bari, Italy, October 2-5, 2020, Proceedings, Part III

Springer Nature This two-volume set of LNCS 12463 and LNCS 12464 constitutes - in conjunction with the volume LNAI 12465 - the refereed proceedings of the 16th International Conference on Intelligent Computing, ICIC 2020, held in Bari, Italy, in October 2020. The 162 full papers of the three proceedings volumes were carefully reviewed and selected from 457 submissions. The ICIC theme unifies the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. The theme for this conference is "Advanced Intelligent Computing Methodologies and Applications." Papers related to this theme are especially solicited, addressing theories, methodologies, and applications in science and technology.

## Mechanics and Thermodynamics

Springer This introduction to classical mechanics and thermodynamics provides an accessible and clear treatment of the fundamentals. Starting with particle mechanics and an early introduction to special relativity this textbooks enables the reader to understand the basics in mechanics. The text is written from the experimental physics point of view, giving numerous real life examples and applications of classical mechanics in technology. This highly motivating presentation deepens the knowledge in a very accessible way. The second part of the text gives a concise introduction to rotational motion, an expansion to rigid bodies, fluids and gases. Finally, an extensive chapter on thermodynamics and a short introduction to nonlinear dynamics with some instructive examples intensify the knowledge of more advanced topics. Numerous problems with detailed solutions are perfect for self study.

## Aerospace Environment

## iPhone Forensics

## Recovering Evidence, Personal Data, and Corporate Assets

"O'Reilly Media, Inc." "This book is a must for anyone attempting to examine the iPhone. The level of forensic detail is excellent. If only all guides to forensics were written with this clarity!"-Andrew Sheldon, Director of Evidence Talks, computer forensics experts With iPhone use increasing in business networks, IT and security professionals face a serious challenge: these devices store an enormous amount of information. If your staff conducts business with an iPhone, you need to know how to recover, analyze, and securely destroy sensitive data. iPhone Forensics supplies the knowledge necessary to conduct complete and highly specialized forensic analysis of the iPhone, iPhone 3G, and iPod Touch. This book helps you: Determine what type of data is stored on the device Break v1.x and v2.x passcode-protected iPhones to gain access to the device Build a custom recovery toolkit for the iPhone Interrupt iPhone 3G's "secure wipe" process Conduct data recovery of a v1.x and v2.x iPhone user disk partition, and preserve and recover the entire raw user disk partition Recover deleted voicemail, images, email, and other personal data, using data carving techniques Recover geotagged metadata

from camera photos Discover Google map lookups, typing cache, and other data stored on the live file system Extract contact information from the iPhone's database Use different recovery strategies based on case needs And more. iPhone Forensics includes techniques used by more than 200 law enforcement agencies worldwide, and is a must-have for any corporate compliance and disaster recovery plan.

## Ultimate Exakta Repair - a CLA and New Curtains for Your Camera

### VX/VXIIa

A complete and thorough DIY repair manual for Exakta VX and VXIIa cameras. The step-by-step instructions combined with excellent photograph allow a high rate of success. Much of the information specific to these models has never been published!

## The Northern Lights

Collins Discover the incomparable beauty of the Northern Lights with this in-depth guide for aspiring astronomers and seasoned night sky observers. Covers the essential equipment needed for observation and photography and full of stunning photographs. Tom Kerss covers the cultural and scientific context for the phenomenon and offers a comprehensive guide to forecasting and photography so that readers can fuse their own technical mastery with the infinite creativity of nature. The Northern Lights will give you a complete understanding of one of the true wonders of the natural world and leave you prepared for the adventure of a lifetime. Sections include History of the Northern Lights Our modern understanding Hunting the Aurora Borealis Photographing the Lights Glossary of terms

## Foundations of Strategy

Wiley Global Education Foundations of Strategy, Canadian Edition is a concise text aimed at both undergraduate and MBA students. With the needs of these students in mind, the authors made sure that the text was written in an accessible style, with a clear, comprehensive approach and sound theoretical depth. An excellent set of current and in-depth Canadian and global cases will show students how to apply the strategy concepts in real-world scenarios. Today's strategy modules are delivered in a wide variety of different formats to a wide range of audiences. Instructors frequently find themselves faced with the challenge of delivering their modules in relatively short time frames to student groups with very diverse educational and employment backgrounds. This text is designed to assist instructors in meeting this challenge by covering the core aspects of strategy as concisely as possible without losing academic depth.

## The Short Selling (Amendment) (EU Exit) Regulations 2018

Enabling power: European Union (Withdrawal) Act 2018, s. 8 (1). Issued: 12.10.2018. Sifted: -. Made: -. Laid: -. Coming into force: -. Effect: 2000 c.16 amended. Territorial extent & classification: E/W/S/NL. For approval by resolution of each House of Parliament. EC note: These Regulations are made in exercise of the powers in section 8 of the European Union (Withdrawal) Act 2018 in order to address failures of retained EU law to operate effectively and other deficiencies arising from the withdrawal of the United Kingdom from the European Union (and in particular the deficiencies referred to in subsection (2)(b), (c), (d), (e) and (g) of section 8). They amend the regulation on short selling and certain aspects of credit default swaps (Council Regulation (EU) No 236/2012) and the delegated legislation made by the Commission under that Regulation. They also amend Part 8A of the Financial Services and Markets Act 2000 which implemented parts of Regulation (EU) No 236/2012.

## Women War Photographers

## From Lee Miller to Anja Niedringhaus

Prestel Publishing Discover eight remarkable women war photographers who have documented harrowing and unforgettable crises and combat around the world for the past eighty years. Women have been on the front lines of war for more than a century. With access to places men cannot go, the women who photograph war lend a unique perspective to the consequences of conflict. From intimate glimpses of daily life to the atrocities of war, this exhibition catalog reveals the range and depth of eight women photographers' contributions to wartime photojournalism. Each photographer is introduced by a brief, informative essay followed by reproductions of a selection of their works. Included here are images by Lee Miller, who documented the liberation of Dachau and Buchenwald. The first woman journalist to parachute into Vietnam, Catherine Leroy was on the ground during the Tet Offensive. Susan Meiselas raised international awareness around the Somoza regime's catastrophic effects in Nicaragua. German reporter Anja Niedringhaus worked on assignment in nearly every major conflict of the 1990s, from the Balkans to Libya, Iraq to Afghanistan. The work of Carolyn Cole, Françoise Demulder, Christine Spengler, and Gerda Taro round out this collective profile of courage under pressure and of humanity in the face of war.
