This updated third edition includes new information about how all aspects of health facility design - site planning, architecture, interiors, product design, graphic design, and others - can meet the needs and reflect the preferences of customers: patients, family and visitors, as well as staff. The book takes readers on a journey through a typical health facility and discusses, in detail, at each stop along the way, how design can demonstrate care both for and about patients and visitors. Design that Cares provides the definitive roadmap to improving customer experience by design. Advancing Perioperative Practice [Nelson Thornes](#) This is the only textbook to cover the totality of perioperative nursing, including infection control and risk management. Other areas of perioperative nursing not addressed in other texts are practice development, management, advanced practice and the roles of key team members. Comprehensive and accessible, this book is set out in three parts: the changing role of the nurse; principles of perioperative practice; and management of the changing environment of care. Medical-surgical Nursing An Integrated Approach [Taylor & Francis](#) Medical-Surgical Nursing: An Integrated Approach, 2E examines all aspects of this nursing field, from how and where the health care delivery system is set up, to the nurse's role in care related to IV therapy and diagnostic testing, to legal and ethical responsibilities, communication, and cultural diversity. This revised edition also includes new chapters covering alternative therapies, and responding to emergencies. Case studies, critical thinking questions, and exercises developing care plans encourage students to think beyond the classroom. Full color illustrations, cross-referencing between chapters, and suggested resources are among the many features that will appeal to students. Diagnostic tests are listed alphabetically in chart form making important information about the test, normal values and nursing responsibilities easy to find.
