ACCOUNTING EDUCATION RESEARCH

PRIZE-WINNING CONTRIBUTIONS

Routledge An annual prize is awarded for the best paper appearing in Accounting Education: an international journal, and this book contains the prize-winning papers for every year from 1992 to 2012. The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice, and all the papers in this book relate to that mission. These papers, reporting on research studies undertaken by accounting education scholars from around the world, build on research findings from the broader domain of education scholarship and embrace a wide array of topics - including: curriculum development, pedagogic innovation, improving the quality of learning, and assessing learning outcomes. Of particular interest are three themes, each of which runs through several of the papers: students' approaches to learning and learning style preferences; ethics and moral intensity; and innovation within the accounting curriculum. Accounting educators will find many ideas in the book to help them in enriching their work, and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report - whether comparatively or longitudinally. This book is a compilation of papers originally published in Accounting Education: an international journal.

ACCOUNTING REFORM IN TRANSITION AND DEVELOPING ECONOMIES

Springer Science & Business Media *The editor has assembled a stellar group of experts to address such topics as: accounting reform in Russia, Ukraine, Estonia, Armenia, Serbia, China, and Spain; accounting education and development of the accounting profession in several transition economies; and corporate governance issues in the developing world.*

ACCOUNTING INFORMATION SYSTEMS

CONNECTING CAREERS, SYSTEMS, AND ANALYTICS

John Wiley & Sons *Accounting Information Systems, 1st Edition by Arline Savage, Danielle Brannock, and Alicja Foksinska presents a modern, professional perspective that develops the necessary skills students need to be the accountants of the future. Through high-quality assessment and integrated homework, students learn course concepts more efficiently and understand how course concepts are applied in the workplace through real-world application. Accounting Information Systems also focuses on helping students learn how to make informed business decisions through case-based learning and data analysis applications. Students work through Julia's Cookies, a flexible, running case that helps them understand how various systems come together to support a business, and how those systems evolve. Students also*

develop a critical thinking mindset by working through integrated analysis questions that take a tool-agnostic approach, as well as Tableau cases so students can practice making real business decisions using leading technology. To further help prepare students to be the accountants of the future, the authors incorporate their own industry experience and help showcase how AIS concepts are used through resources including Sample LinkedIn Job Posts and the Featured Professionals video series. These tools spotlight real accounting professionals and job opportunities, while connecting to chapter material, allowing student to see how what they're learning applies to business, as well as visualize the different paths AIS can take them.

MANAGERIAL ACCOUNTING

John Wiley & Sons *In order to effectively solve business problems, managers need to understand how managerial accounting can improve decision-making. This book lays the groundwork by presenting managerial accounting in a strategic framework. Each module examines cost estimation and planning decisions in both the short- and long-term context. Budgets are then discussed as devices that connect planning and control decisions. Within each chapter, a specific decision problem is framed in a four-step manner. Throughout the pages, Chapter Connections ties the decision problems to concepts in earlier chapters. End-of-chapter material also provides a good balance of quantitative and qualitative problems. This approach enables managers to learn the linkages among seemingly unrelated decisions.*

MASTERING ACCOUNTING RESEARCH FOR THE CPA EXAM

John Wiley & Sons *STUDY AIDS/CPA (Certified Public Accountant) The first CPA review product of its kind to address the three research components of the CPA Exam You're a CPA Exam candidate. You've survived all those technical accounting courses and advanced courses on systems, auditing, cost accounting, and tax, and now you're ready to take the big exam. But perhaps in those intermediate or advanced courses, you didn't receive enough exposure to research in the accounting standards, the auditing standards, or the tax code. Help has arrived. Now in a fully revised second edition, Mastering Accounting Research for the CPA Exam provides CPA candidates with a thorough foundation of the authoritative literature, knowledge of the standards, and strategies for researching the infobases for FAR (Financial Accounting and Reporting), AUD (Audit and Attestation), and REG (Regulation). Easy to follow and apply, the new edition of this concise, user-friendly guide brings CPA Exam candidates up to speed quickly on the research component of the Exam and:*

- * Updates all references to Web addresses and information on obtaining infobases
- * Informs readers on changes to accounting standards
- * Helps students review on the spot with quick study lists for FAR, AUD, and REG
- * Offers new coverage and discussion of FAS 155 - 159
- * Includes new practice review problems at the end of each chapter

Without over-your-head technical jargon, author and CPA Anita Feller clearly explains and illustrates the research strategies for FAR, AUD, and REG that every CPA Exam candidate needs to ace the simulation sections of the CPA Exam.
