Taking Aim at the Arms Trade NGOS, Global Civil Society and the World Military Order

Zed Books Ltd. *Taking Aim at The Arms Trade: NGOs, Global Civil Society and the World Military Order* takes a critical look at the ways in which NGOs portray the arms trade as a problem of international politics and the strategies they use to effect change. NGOs have been pivotal in bringing the suffering caused by the arms trade to public attention, documenting its negative impact on human rights, conflict, security and development around the world, and pushing for measures to control or eradicate the trade. Overall, however, their activity has helped sideline debate on Northern military predominance while facilitating intervention in the South based on liberal understandings of the arms trade, conflict, development and human rights. They thus contribute to the perpetuation of a hierarchical world military order and the construction of the South as a site of Northern benevolence and intervention. Stavrianakis exposes the tensions inherent in NGOs' engagement with the arms trade and argues for a re-examination of dominant assumptions about NGOs as global civil society actors.

Carbon Pricing

Early Experience and Future Prospects

Edward Elgar Publishing *In 2012, Australia took the major step of introducing a carbon price, involving the creation of a system of emissions permits initially issued at a fixed price. Carbon Pricing brings together experts instrumental in the development, and operation, of A*

Legal Aid Denied: Women and the Cuts to Legal Services in BC

Canadian Centre Policy Alternatives

Paper and Paperboard Packaging Technology

John Wiley & Sons *This book discusses all the main types of packaging based on paper and paperboard. It considers the raw materials and manufacture of paper and paperboard, and the basic properties and features on which packaging made from these materials depends for its appearance and performance. The manufacture of twelve types of paper- and paperboard-based packaging is described, together with their end-use applications and the packaging machinery involved. The importance of pack design is stressed, and how these materials offer packaging designers opportunities for imaginative and innovative design solutions. Environmental and waste management issues are addressed in a separate chapter. The book is directed at those joining companies which manufacture packaging grades of paper and paperboard, companies involved in the design, printing and production of packaging, and companies which manufacture inks, coatings, adhesives and packaging machinery. It will be essential reading for students of packaging technology.*

Environmental Indicators for North

America

UNEP/Earthprint *Although the environment of North America is not dissected by political borders, Canada and the United States often measure environmental conditions and report on them using different indicators. This report examines the environmental indicators used by both nations, and based on analysis of current research into common methodologies used in national, regional and global environmental reporting, it goes on to draw lessons for the development of bilateral indicators to cover the North American region.*

Afghanistan's Police

The Weak Link in Security Sector Reform

Introduction -- The Afghan National Police -- Key reasons for ANP shortcomings -- Conclusions and recommendations.

The World's Water 2004-2005

The Biennial Report on Freshwater Resources

Island Press *The quality and availability of fresh water are of critical importance to human and ecosystem health. Given its central role in the functioning of all living systems, water is arguably the most important of all natural resources. Produced biennially, The World's Water provides a timely examination of the key issues surrounding freshwater resources and their use. Each new volume identifies and explains the most significant current trends worldwide, and offers the best data available on a variety of water-related topics. This 2004-2005 edition of The World's Water features overview chapters on: conservation and efficiency as key tools for meeting freshwater needs; bottled water quality, costs, and trends; United Nations millennium development goals; groundwater issues; case studies of water privatization; the economic value of water; California water policy and climate change. The World's Water is the most comprehensive and up-to-date source of information and analysis on freshwater resources and the political, economic, scientific, and technological issues associated with them. It is an essential reference for water resource professionals in government agencies and nongovernmental organizations, researchers, students, and anyone concerned with water and its use.*

Electronic Media

Then, Now, and Later

Taylor & Francis *Electronic Media connects the traditional world of broadcasting with the contemporary universe of digital electronic media. It provides a synopsis of the beginnings of electronic media in broadcasting, and the subsequent advancements into digital media. Underlying the structure of the book is a "See It Then, See It Now, See It Later" approach that focuses on how past innovations lay the groundwork for changing trends in technology, providing the opportunity and demand for change in both broadcasting and digital media. FYI and Zoom-In boxes point to further information, tying together the immediate and long-ranging issues surrounding electronic media. Career Tracks feature the experiences of industry experts and share tips in how to approach this challenging industry. Check out the companion website at <http://www.routledge.com/cw/medoff-9780240812564/> for materials for both students and instructors.*

Governing Global Health

Who Runs the World and Why?

Oxford University Press *The past few decades have seen a massive increase in the number of international organizations focusing on global health. Campaigns to eradicate or stem the spread of AIDS, SARS, malaria, and Ebola attest to the increasing importance of globally-oriented health organizations. These organizations may be national, regional, international, or even non-state organizations-like *Medicins Sans Frontieres*. One of the more important recent trends in global health governance, though, has been the rise of public-private partnerships (PPPs) where private non-governmental organizations, for-profit enterprises, and various other social entrepreneurs work hand-in-hand with governments to combat specific maladies. A primary driver for this development is the widespread belief that by joining together, PPPs will attack health problems and fund shared efforts more effectively than other systems. As Chelsea Clinton and Devi Sridhar show in *Governing Global Health*, these partnerships are not only important for combating infectious diseases; they also provide models for developing solutions to a host of other serious global health challenges and questions beyond health. But what do we actually know about the accountability and effectiveness of PPPs in relation to the traditional multilaterals? According to Clinton and Sridhar, we have known very little because scholars have not accumulated enough data or developed effective ways to assess them-until now. In their analysis, they uncovered both strength and weaknesses of the model. Using principal-agent theory in which governments are the principals directing international agents of various type, they take a closer look at two major PPPs-the Global Fund to Fight HIV/AIDS, TB and Malaria and the GAVI Alliance-and two major more traditional international organizations-the World Health*

Organization and the World Bank. An even-handed and thorough empirical analysis of one of the most pressing topics in world affairs, Governing Global Health will reshape our understanding of how organizations can more effectively prevent the spread of communicable diseases like AIDS and reduce pervasive chronic health problems like malnutrition.

Mobility 2030

Meeting the Challenges to Sustainability

The Future of Eco-labelling

Making Environmental Product Information Systems Effective

Routledge *Eco-labelling is one of the key tools used by policy-makers in many parts of the world to encourage more sustainable production and consumption. By providing environmental information on products and services, eco-labels address both business users and consumers and range from mandatory approaches, such as required product declarations, to voluntary approaches, such as national eco-labels. Eco-labels can play an important role in environmental policy. They reward and promote environmentally superior goods and services and offer information on quality and performance with respect to issues such as health and energy consumption. Eco-labels fit well into a multi-stakeholder policy framework – as promulgated recently by the EU's integrated product policy (IPP) – since the development of criteria for labels and the acceptance in the market requires the involvement of a wide range of different parties, from government and business, to consumers and environmental organisations. However, many eco-labelling schemes have had troubled histories, and questions have been raised about their effectiveness. So, are eco-labels an effective tool to foster the development, production, sale and use of products and to provide consumers with good information about the environmental impacts of those products? Is eco-labelling useful to business as a marketing tool? What factors contribute to the development of successful schemes? More than ten years after its establishment, can the EU Flower be considered a success? Are national eco-labels such as the German Blue Angel and the Norwegian White Swan more effective? Should eco-labels be harmonised? Are eco-labels achieving their original aim of fostering sustainable production and consumption? For which product groups are ISO type I eco-labels appropriate and inappropriate? Are other labels, such as mandatory, ISO type II and ISO type III labels more effective in some cases? Are eco-labels focusing on the main*

environmental policy targets or just on "low-hanging fruit"? Are eco-labels really linked to other tools of IPP? The Future of Eco-labelling provides answers to all of these questions. Based on a major EU research exercise, the book plots a course for policy-makers to address some of the historic problems with eco-labelling, to learn what works and what doesn't and to move forward with schemes that can make a real difference to sustainable production and consumption. The book analyses the conditions under which eco-labelling schemes-both mandatory and voluntary-are or can become an efficient and effective tool to achieve given objectives; assesses previous experiences with eco-labels in different European countries and the relationship of these schemes with business strategies, IPP and market conditions; defines strategies aimed at linking eco-labels with other IPP measures; explores how eco-labels can be used to encourage sustainable consumption patterns, create green markets, foster innovation and development of green products and services, and implement multi-stakeholder initiatives; and sets out detailed recommendations for the future of eco-labelling. The book will be required reading for policy-makers, businesses involved with eco-labelling schemes and researchers interested in the development of sustainable production and consumption and IPP worldwide.

Computers Helping People With Special Needs

10th International Conference,
ICCHP 2006, Linz, Austria, July
11-13, 2006, Proceedings

Springer Science & Business Media *This book constitutes the refereed proceedings of the 10th International Conference on Computers Helping People with Special Needs, ICCHP 2006, held in Linz, Austria, in July 2006. The 193 revised contributions presented were carefully reviewed and selected for inclusion in the book. The papers evaluate how various fields in computer science can contribute to helping people with various kinds of disabilities and impairment.*

Rich World, Poor World

Black Rabbit Books *Debates various topics involving responsibilities to help the poor, including "Should countries with civil wars still be given aid?", "Will debt relief help the poor?," and "Can celebrity-led campaigns make a difference?"*

Narrowing the Development Gap in ASEAN

Drivers and Policy Options

Routledge *An important part of the vision of the Association of Southeast Asian Nations (ASEAN) is to ensure that the benefits of development and economic integration are equitably shared by all member states and their citizens. ASEAN's work therefore includes activities designed to narrow the development gap between ASEAN member states (Indonesia, Malaysia, the Philippines, Singapore, Thailand, Brunei, Burma, Cambodia, Laos and Vietnam) and between sub-regions within ASEAN. Written by a team of internationally recognised experts in development economics, this book communicates the latest findings on narrowing the development gap in a practical, policy-relevant way, in a format that can influence decision makers within ASEAN member states and international donors. The research presented is timely, as significant data on development achievements to the sub-national level now exists in most ASEAN countries. There have been significant development achievements in many ASEAN countries over the last 20 years, but the ASEAN region continues to be characterised by significant development gaps, particularly in income. Gaps in development achievement are also seen at the regional and sub-national levels. This book offers a better understanding of these gaps, as they exist in 2012, and provides an important context that can inform the strategic needs of decision makers in the ASEAN region. Due to improvements in measuring poverty and well-being, including through the use of multidimensional indicators, this book gives policy makers and scholars in development economics, development policy and Asian studies well-grounded insights into the nature of the development gaps within and between ASEAN countries as well as high-level policy advice on those interventions that can contribute to a narrowing of the development gap.*

Enhancing the Performance of the Services Sector

OECD Publishing *The services sector now accounts for over 70% of employment and value added in OECD economies. It also accounts for almost all employment growth in the OECD area. But despite its growing weight in OECD economies, productivity growth and employment ...*

The Rise of the South

Human Progress in a Diverse World

The pace of transformations around the world is extraordinarily swift, and the consequences will be profound. The rapid emergence of the 'Global South' will transform 21st century economics and politics in ways at least as fundamental as those witnessed in the wars and technological revolutions of the 20th century. This report seeks to identify how the dynamics of power, voice and wealth in the world are changing.

The Development of Intellectual Property Regimes in the Arabian Gulf States

Infidels at the Gates

Routledge *This book examines the development of national legislative regimes for the protection of intellectual property rights in the Arabian Gulf states: Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, the United Arab Emirates, and Yemen. David Price analyses IP rights in these states in the context of WTO membership, and consequent compliance with the requirements of the WTO's TRIPS Agreement. The challenges of domestic enforcement of the states' IP laws receive critical attention. A particular focus of the book is on foreign forces which have shaped or influenced the character of the states' IP protection regimes. It includes commentary on the contribution of foreign states, the WTO and WIPO in the pre-TRIPS and TRIPS compliance stages, and the US bilateral trade strategy for pursuing IP protection standards that exceed those enshrined in TRIPS, and the impact of these forces upon the states' enforcement performance. The role of the Office of the United States Trade Representative (USTR) and the Special 301 provisions as a powerful tool in the US' bilateral strategy receives particular attention. The intellectual property laws of these states have been developed virtually in the span of a single generation, and the process of change is continuing. As such, this book will interest practitioners both in and outside of the region, and those with an interest in intellectual property law, comparative law, Middle East legal systems and affairs, and international trade.*

Information Practice in Science and

Technology

Evolving Challenges and New Directions

Routledge *Examine the vital issues facing sci-tech libraries in today's economic and technological climate! This book addresses current challenges and changes in science and technology libraries—and shows how librarians are handling them in difficult financial times. It examines issues related to closing and merging libraries, online collections maintenance and costs, assistance/outreach geared toward specific groups of library patrons, and the gathering of usage statistics in the electronic environment. You'll also find specific descriptions—and a general overview—of new technologies and case studies of the impact of new technologies on sci-tech library management. Handy tables and figures make the information easy to access and understand. Presenting a wide variety of problems and solutions, *Information Practice in Science and Technology* will help you understand the needs of users regarding current information technologies and how to meet them. From the editor: “Among the critical challenges facing sci-tech libraries (and actually all libraries) are the need to perform detailed collection assessment and evaluation, particularly in regard to e-resource collections; the need to examine and provide appropriate public services; and the need to develop strategies for the adoption of new information technologies. This book addresses these key issues and attempts to provide both perspective and insight into these problems.” *Information Practice in Science and Technology* examines: how merging academic departmental libraries can both improve services and smooth the transition to increased use of digital information the process of developing, managing, and providing access to an electronic collection—a case study from the University of Notre Dame, with special attention paid to licensing and publisher agreements how a limited Web interface can be enhanced and become a digital portal to a library's print collection—a case study from the Grainger Engineering Library at the University of Illinois how libraries can support academic faculty research in cross-disciplinary subject areas how to address the specialized subject area information needs of meteorologists and geologists outreach methods that the University of California uses to better connect with library patrons and demonstrate the services that the library offers Digital Object Identifiers (DOIs)—the new technology for archiving and linking electronic information how to gather and benefit from usage statistics, with attention to electronic databases, statistics gathered from public library terminals, and transaction log usage statistics for electronic reserves the proposals to provide all government documents through an electronic distribution system—and what that will mean to sci-tech libraries*

Council of Europe

Discourse Markers in Interaction

From Production to Comprehension

Walter de Gruyter GmbH & Co KG *The aim of this volume is to bring together researchers interested in investigating the role that Discourse Markers play in language production and comprehension from an experimental or corpus-based perspective. In any kind of human communication, Discourse Markers are part of the game. This omnipresence informs us of a crucial inherent aspect of human language. Yet, as a linguistic category, Discourse Markers remain underdetermined. To gain deeper insight into this complex linguistic category, more systematic work is needed on the production and on the interpretation of Discourse Markers in a variety of situational settings, resorting to different methodological approaches. The contributions in this volume aim at drawing more attention to the double face of Discourse Markers, namely as signals intentionally used by the speaker to facilitate the addressee's interpretation of the discourse, but also as potential traces of the speaker's production difficulties. The combination of experimental and corpus-based approaches and the focus on processing of Discourse Markers in both production and comprehension makes this volume a unique contribution in answering the question why we use Discourse Markers in certain situations, but also when we do not.*

Practicing Post-Liberal Peacebuilding

Legal Empowerment and Emergent Hybridity in Liberia

Springer *Practicing Post-Liberal Peacebuilding* engages with one of the central debates in Peace and Conflict Studies and International Relations. The book's innovation lies in the introduction and application of 'practice theory' to develop a critical methodology for mapping the everyday practices of post-liberal hybridity in Liberia.

Portals and Libraries

Routledge *Cutting-edge information about providing access to research library users* The ultimate goal of librarians is to provide comprehensive informational access to library users. *Portals and Libraries* provides an in-depth look at various libraries' challenges and the cutting-edge technology used in providing high-quality electronic access to users through portal systems. Respected authorities detail efforts to build a new kind of search and retrieval system that includes access to the Web as well as other vital collections and academic resources. The book discusses the implementation of access systems and their supporting technology, and spotlights strategies designed to encourage quality system-user feedback, increase the cooperation and diligence of staff, and more. *Portals and Libraries* comprehensively reviews library portals from their roots to their current state, with a look at assorted products, their implementation issues, and each one's advantages and shortcomings. The overall state of the portal system today as well as where it is heading in the future is examined in detail. The book also provides the ARL Scholars Portal Working Group Final Report from May 2002 summarizing the group's work from its inception, and includes their recommendations of key portal features and needed functions. The text includes helpful screenshots, useful descriptive figures, and extensive references. *Portals and Libraries* discusses: the history of library portals the MyLibrary@NCState Web portal after five years of use "Portals to the World" Library of Congress guide to Web resources the role integrated library systems will play in the future of portals features and services to be added to library portals for greater success portal technologies—their structures and functioning planning portal implementation online catalogs usability testing and interface design nine key issues that will impact the future of portal development *Portals and Libraries* is crucial reading for library educators and students, college and research librarians in reference, library system professionals, and technical services professionals focused on applying cutting-edge technology to library services.

Electronic and Mobile Commerce Law

An Analysis of Trade, Finance, Media and Cybercrime in the Digital Age

Univ of Hertfordshire Press *The rapid, commercially-driven evolution of the Internet has raised concomitant legal concerns that have required responses from both national and international law. This unique text offers a complete analysis of electronic and mobile commerce, exploring the law relating to online contracts and payment systems, electronic marketing, and various forms of cybercrime as well as the regulation of electronic communications networks and services. Written by specialists, this account also provides insights into emerging areas such as internet libel, online gambling, virtual property, cloud computing, smart cards, electronic cash, and the growing use of mobile phones to perform tasks previously carried out by computers.*

Museum Studies

An Anthology of Contexts

John Wiley & Sons *Updated to reflect the latest developments in twenty-first century museum scholarship, the new Second Edition of Museum Studies: An Anthology of Contexts presents a comprehensive collection of approaches to museums and their relation to history, culture and philosophy. Unique in its deep range of historical sources and by its inclusion of primary texts by museum makers Places current praxis and theory in its broader and deeper historical context with the collection of primary and secondary sources spanning more than 200 years Features the latest developments in museum scholarship concerning issues of inclusion and exclusion, repatriation, indigenous models of collection and display, museums in an age of globalization, visitor studies and interactive technologies Includes a new section on relationships, interactions, and responsibilities Offers an updated bibliography and list of resources devoted to museum studies that makes the volume an authoritative guide on the subject New entries by Victoria E. M. Cain, Neil G.W. Curtis, Catherine Ingraham, Gwyneira Isaac, Robert R. Janes, Sean Kingston, Barbara Kirshenblatt-Gimblett, Sharon J. Macdonald, Saloni Mathur, Gerald McMaster, Sidney Moko Mead, Donald Preziosi, Karen A. Rader, Richard Sandell, Roger I. Simon, Crain Soudien, Paul Tapsell, Stephen E. Weil, Paul Williams, and Andrea Witcomb*

State of the World's Cities 2008-2009

Harmonious Cities

Earthscan *Cities are facing enormous challenges, with rapidly growing urban populations, often worsening environmental conditions and deteriorating infrastructure, inequalities and housing shortages, unemployment, crime and violence. This title explains how planning and municipal government can address these challenges.*

International Arbitration in the Energy Sector

Oxford University Press *Disputes in the energy and natural resources sector are at the heart of international arbitration. With more arbitrations arising in the international energy sector than in any other sector, it is not surprising that the highest valued awards in the history of arbitration come from energy-related arbitrations. Energy disputes often involve complex and controversial issues relating to security, sovereignty, and public welfare. International Arbitration in the Energy Sector puts international energy disputes into a global context, providing broad coverage of different forms and systems of dispute resolution across both renewable and non-renewable sectors. With contributions from leading practitioners, arbitrators, academics, and industry experts from across the globe, the eighteen chapters in the book enable readers to compare the approaches to, and learnings from, energy arbitrations across various legal systems and geographic regions. After outlining the international energy arbitration legal framework, the text delves into a detailed analysis of the problems which regularly arise in practice. These include, among other things, commercial disputes in Part I (e.g. over the upstream oil sector and long-term gas supply contracts), investor-state disputes in Part II (e.g. under the Energy Charter Treaty), and public international law disputes in Part III (e.g. concerning international boundaries and the distribution of natural resources). Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes, which raise important questions about enforcing sustainability objectives on individuals, corporations, and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties, and other international legal instruments, as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector.*

Identifying and Quantifying Rates of State Motor Fuel Tax Evasion

Transportation Research Board *TRB's National Cooperative Highway Research Program (NCHRP) Report 623: Identifying and Quantifying Rates of State Motor Fuel Tax Evasion* explores a methodological approach to examine and reliably quantify state motor fuel tax evasion rates and support agency efforts to reduce differences between total fuel tax liability and actual tax collections.

Spychips

How Major Corporations and Government Plan to Track Your Every Move with RFID

Thomas Nelson *Big Brother gets up close and personal. Do you know about RFID (Radio Frequency Identification)? Well, you should, because in just a few short years, this explosive new technology could tell marketers, criminals, and government snoops everything about you. Welcome to the world of spychips, where tiny computer chips smaller than a grain of sand will trace everyday objects and even people, keeping tabs on everything you own and everywhere you go. In this startling, eye-opening book, you'll learn how powerful corporations are planning a future where: Strangers will be able to scan the contents of your purse or briefcase from across a room. Stores will change prices as you approach-squeezing extra profits out of bargain shoppers and the poor. The contents of your refrigerator and medicine cabinet will be remotely monitored. Floors, doorways, ceiling tiles, and even picture frames will spy on you-leaving virtually no place to hide. microchip implants will track your every move and even broadcast your conversations remotely or electroshock you if you step out of line. This is no conspiracy theory. Hundreds of millions of dollars have already been invested in what global corporations and the government are calling "the hottest new technology since the bar code." Unless we stop it now, RFID could strip away our last shreds of privacy and usher in a nightmare world of total surveillance-to keep us all on Big Brother's very short leash. What critics are saying about Spychips, the book: Spychips "make[s] a stunningly powerful argument against plans for RFID being mapped out by government agencies, retail and manufacturing companies." ?Evan Schuman, CIO Insight "The privacy movement needs a book. I nominate Spychips." ?Marc Rotenberg, EPIC "Brilliantly written; so scary and depressing I want to put it down, so full of fascinating vignettes and facts that I can't put it down." ?Author Claire Wolfe Spychips "makes a very persuasive case that some of America's biggest companies*

want to embed tracking technology into virtually everything we own, and then study our usage patterns 24 hours a day. It's a truly creepy book and well worth reading." ?Hiawatha Bray, Boston Globe "You REALLY want to read this book." ?Laissez Faire

Chronic Myeloid Leukemia

Springer *This book provides state-of-the-art reviews of key issues and recent developments relating to chronic myeloid leukemia (CML), acquainting the reader with advances in research, treatment, and promotion of public health. Among the management topics addressed are the choices, advantages, and pitfalls of first-, second-, and third-line treatments; the European LeukemiaNet recommendations; management of adverse effects of tyrosine kinase inhibitors (TKI); management of CML blast crisis; management of pregnancy in the context of CML; the role of hematopoietic cell transplantation; the current experience with TKI discontinuation; and the value of interferon α in improving the outcome of TKI treatment. Various aspects of relevance to treatment outcome are discussed, including prognostic scores, molecular monitoring (principles and interlaboratory standardization), and response-related predictors of survival. Furthermore, updates are provided on the increasing prevalence of CML and its implications and on the changing cost of care for CML, taking into account the forthcoming impact of availability of generic imatinib.*

Current Developments in Monetary and Financial Law, Vol. 4

International Monetary Fund *The Legal Department and the Institute of the IMF held their ninth biennial seminar for legal advisors of IMF member countries' central banks, and the papers published in this volume are based on presentations made by officials attending this seminar. The seminar covered a broad range of topics, including sovereign debt restructuring, money laundering and the financing of terrorism, financial system and banking supervision, conflicts of interest and market discipline in the financial sector, insolvency, and other issues related to central banking.*

The Image of the Enemy

Intelligence Analysis of Adversaries since 1945

Georgetown University Press *Intelligence agencies spend huge sums of money to collect and analyze vast quantities of national security data for their political leaders. How well is this intelligence analyzed, how often is it acted on by policymakers, and does it have a positive or negative effect on decision making? Drawing on*

declassified documents, interviews with intelligence veterans and policymakers, and other sources, The Image of the Enemy breaks new ground as it examines how seven countries analyzed and used intelligence to shape their understanding of their main adversary. The cases in the book include the Soviet Union's analysis of the United States (and vice versa), East Germany's analysis of West Germany (and vice versa), British intelligence in the early years of the Troubles in Northern Ireland, Israeli intelligence about the Palestinians, Pakistani intelligence on India, and US intelligence about Islamist terrorists. These rivalries provide rich case studies for scholars and offer today's analysts and policymakers the opportunity to closely evaluate past successes and failures in intelligence analysis and the best ways to give information support to policymakers. Using these lessons from the past, they can move forward to improve analysis of current adversaries and future threats.

DIANE Publishing

The Hunger Report 2006

Frontline Issues in Nutrition Assistance

Cohesion, Coherence, Cooperation: European Spatial Planning Coming of Age?

Routledge *Since its foundation the European Union has gradually developed policies that are aimed at achieving increased economic and social cohesion. This book examines the most recent of these, the concept of territorial cohesion. Territorial cohesion is the pursuit of balanced development, competitiveness, sustainable development, and good governance. These concerns are most readily addressed by the formulation of spatial strategies under the umbrella of spatial planning, that brings together a multitude of public and private actors in a process*

that requires cohesion, coherence and co-operation. This book traces the development of spatial planning at European level and argues that spatial planning can become a vehicle, not only for territorial cohesion, but for EU policy generally.

Corporate Sustainability, Social Responsibility and Environmental Management

An Introduction to Theory and Practice with Case Studies

Springer *This book provides a concise and authoritative guide to corporate social responsibility (CSR) and related paradigms, including environmental responsibility, corporate sustainability and responsibility, creating shared value, strategic CSR, stakeholder engagement, corporate citizenship, business ethics and corporate governance, among others. It is primarily intended for advanced undergraduate and / or graduate students. Moreover, it is highly relevant for future entrepreneurs, small business owners, non-profit organisations and charitable foundations, as it addresses the core aspects of contemporary strategies, public policies and practices. It also features case studies on international policies and principles, exploring corporate businesses' environmental, social and governance reporting. "Mark Camilleri's new book provides an excellent overview of the eclectic academic literature in this area, and presents a lucid description of how savvy companies can embed themselves in circular systems that reduce system-wide externalities, increase economic value, and build reputation. A valuable contribution." Charles J. Fombrun, Founder of Reputation Institute and a former Professor of Management at New York University and The Wharton School, University of Pennsylvania, USA "I am pleased to recommend Dr. Camilleri's latest book, Corporate Sustainability, Social Responsibility, and Environmental Management. The book is a rich source of thought for everyone who wants to get deeper insights into this important topic. The accompanying five detailed case studies on a wide array of corporate sustainable and responsible initiatives are helpful in demonstrating how theoretical frameworks have been implemented into practical initiatives. This book is a critical companion for academics, students, and practitioners." Adam Lindgreen, Professor and Head of Department of Marketing, Copenhagen Business School, Denmark "This book is an essential resource for students, practitioners, and scholars. Dr. Mark Camilleri skillfully delivers a robust summary of research on the business and society relationship and insightfully points to new understandings of and opportunities for responsible business conduct. I highly recommend Corporate Sustainability, Social Responsibility, and Environmental Management: An Introduction to Theory and Practice with Case Studies." Diane L. Swanson, Professor and Chair of Distinction in*

Business Administration and Ethics Education at Kansas State University, KS, USA

"Mark's latest book is lucid, insightful, and highly useful in the classroom. I strongly recommend it." Donald Siegel, Dean of the School of Business and Professor of Management at the University at Albany, State University of New York, NY, USA

"The theory and practice of corporate sustainability, social responsibility and environmental management is complex and dynamic. This book will help scholars to navigate through the maze. Dr Camilleri builds on the foundations of leading academics, and shows how the subject continues to evolve. The book also acknowledges the importance of CSR 2.0 - or transformative corporate sustainability and responsibility - as a necessary vision of the future." Wayne Visser, Senior Associate at Cambridge University, UK. He is the author of CSR 2.0: Transforming Corporate Sustainability & Responsibility and Sustainable Frontiers: Unlocking Change Through Business, Leadership and Innovation

"Corporate Sustainability, Social Responsibility and Environmental Management: An Introduction to Theory and Practice with Case Studies" provides a useful theoretical and practical overview of CSR and the importance of practicing corporate sustainability." Geoffrey P. Lantos, Professor of Business Administration, Stonehill College. Easton, Massachusetts, USA

"This book offers a truly comprehensive guide to current concepts and debates in the area of corporate responsibility and sustainability. It gives helpful guidance to all those committed to mainstreaming responsible business practices in an academically reflected, yet practically relevant, way." Andreas Rasche, Professor of Business in Society, Copenhagen Business School, Denmark

"A very useful resource with helpful insights and supported by an enriching set of case studies." Albert Caruana, Professor of Marketing at the University of Malta, Malta and at the University of Bologna, Italy

"A good overview of the latest thinking about Corporate Social Responsibility and Sustainable Management based on a sound literature review as well as useful case studies. Another step forward in establishing a new business paradigm." René Schmidpeter, Professor of International Business Ethics and CSR at Cologne Business School (CBS), Germany

"Dr. Camilleri's book is a testimony to the continuous need around the inquiry and advocacy of the kind of responsibility that firms have towards societal tenets. Understanding how CSR can become a modern manifestation of deep engagement into socio-economic undercurrents of our firms, is the book's leading contribution to an important debate, that is more relevant today than ever before." Mark Esposito, Professor of Business and Economics at Harvard University, MA, USA

"Mark's book is a great addition to the literature on CSR and EM; it will fill one of the gaps that have continued to exist in business and management schools, since there are insufficient cases for teaching and learning in CSR and Environmental Management in Business Schools around the globe." Samuel O. Idowu, Senior Lecturer in Accounting at London Metropolitan University, UK; Professor of CSR at Nanjing University of Finance and Economics, China and a Deputy CEO, Global Corporate Governance Institute, USA

"Corporate Social Responsibility has grown from 'nice to have' for big companies to a necessity for all companies. Dr Mark Camilleri sketches with this excellent book the current debate in CSR and CSR communication and with his cases adds valuable insights in the ongoing development and institutionalization of CSR in nowadays business."

Wim J.L. Elving, Professor at the University of Amsterdam, Netherlands

Middle Powers in Asia and Europe in the 21st Century

Lexington Books *This volume presents three claims regarding the role of middle powers in the 21st Century: first, states aspiring to become or remain middle powers choose from three possible role: to be a global middle powers; to be a regional pivot; or to be a niche leader. Second, states seeking such roles need different mixes of hard and soft power sources. Third, more so than great or small powers, middle powers walk a thin line between the domestic and systemic pressures they face. In this volume, these claims are based on (comparative) case studies of Germany, Iran, Italy, Japan, the Netherlands, Norway, South Korea, Sweden, and Turkey.*

Human Development Report 2005

International Cooperation at a Crossroads: Aid, Trade and Security in an Unequal World

Human Development Report *The Human Development Report 2005 examines the scale of the challenge facing the world at the start of the ten year countdown to the 2015 Millennium Development Goals mark. The Report focuses on three pillars of cooperation, each of which is in urgent need of renovation. The first pillar is international aid: the Millennium Development Goals (MDGs) project has been compromised by chronic and sustained under-financing, allied to problems in aid quality. The second pillar is international trade. Under the right conditions, trade can act as a powerful catalyst for human development. The 'development round' of World Trade Organization talks, launched in 2001, provided northern governments with an opportunity to create those conditions. The third pillar is that of security: violent conflict is a source of systematic human rights violation and a barrier to progress towards the MDGs that must be overcome.*

Staff Management in Library and Information Work

Taylor & Francis *This standard text has been fully revised and updated for its fourth edition to reflect continuing technological changes, as well as issues such as social inclusion, lifelong learning and European employment legislation. Chapter 1 on the working environment has been completely rewritten. The present environment brings problems of staff motivation, de-professionalization and the loss of control:*

Chapter 2 reminds readers of basic motivation theories, now presented in a more logical sequence, and how to deal with such problems. Chapter 3 on workforce planning has been retitled Human Resource Planning and revised to take into account the modes of staffing appropriate for today's turbulent environment. Effective human resource planning requires excellent selection and recruitment procedures: best practice and developments in this area are explored in Chapters 4, Job Descriptions and Person Specifications, and 5, Recruitment and Selection of Staff. In Chapter 6 on staff appraisal more attention has been given to multi-rating approaches, such as 360° whereby different aspects of work can be assessed by different groups of people, and to appraisal of junior by senior staff. The last decade has seen increased emphasis on training and development to deliver high quality services in a climate of constant change. Chapter 7 has therefore been reordered and expanded in order to reflect new approaches and changes in this area. In Chapter 8, Staff Supervision and Interpersonal Skills, recent emphasis on leadership and counselling skills are reflected, as is the growing need to do more with less through enhanced time management and stress management techniques. With this new edition, this core guide brings professionals involved in managing library and information staff up to date with how to cope with the most pressing problems and challenges in today's fast-changing environment.
