## IGCSE Cambridge International Mathematics (0607) Extended

# The importance of teaching

The Stationery Office England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand. Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

## Cambridge IGCSE Geography

## Parentology

# Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

**Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the**

latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

## 2012 GCSE English results

## first report of session 2013-14, report, together with formal minutes, oral and written evidence

**Stationery Office The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a**

modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

# Digital Economy Report 2019

## Value Creation and Capture - Implications for Developing Countries

The Digital Economy Report 2019 on "Value creation and capture: Implications for developing countries" takes stock of recent trends in the global digital landscape and discusses the development and policy implications of data and digital platforms. A key feature of the evolving digital economy is the increasing role of digital data as an economic resource, together with digital platforms as new influential actors, with capacity to collect, process, analyze and monetize data. The report considers policy options for countries to help ensure that they capture a fair part of the value created in the digital economy for inclusive development. Key issues include the market impact of emerging technologies and digital platforms, the impact on smaller businesses in developing countries and the implications for infrastructure, entrepreneurship, skills, competition, data flows, data protection, taxation and other relevant policies.

## Free Culture

Lulu Press, Inc Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

## A Passage To Africa

**Hachette UK** As a five-year-old, George Alagiah emigrated with his family to Ghana - the first African country to attain independence from the British Empire. A PASSAGE TO AFRICA is Alagiah's shattering catalogue of atrocities crafted into a portrait of Africa that is infused with hope, insight and outrage. In vivid and evocative prose and with a fine eye for detail Alagiah's viewpoint is spiked with the freshness of the young George on his arrival in Ghana, the wonder with which he recounts his first impressions of Africa and the affection with which he dresses his stories of his early family life. A sense of possibility lingers, even though the book is full of uncomfortable truths. It is a book neatly balanced on his integrity and sense of obligation in his role as a writer and reporter. The shock of recognition is always there, but it is the personal element that gives A

**PASSAGE TO AFRICA** its originality. Africa becomes not only a group of nations or a vast continent, but an epic of individual pride and suffering.

## State and Market in Contemporary China

### Toward the 13th Five-Year Plan

**Rowman & Littlefield** The short essays in this volume, contributed by leading experts on Chinese economic policy, provide crisp and insightful analyses of the Chinese state's approach toward markets, the role of key actors and institutions, the evolving nature of industrial policy and the effectiveness of China's international commitments to constrain such practices, and a preview of the likely contents and significance of China's 13th Five-Year Plan.

## Multinational Corporations and Local Firms in Emerging Economies

**Amsterdam University Press** In order for foreign direct investment to have deep and lasting positive effects on host countries, it is essential that multinational corporations have close direct and indirect interaction with local firms. A valuable addition to the emerging literature on multinational-local firm interfaces, this book provides a number of case studies from emerging economies that examine such mutually beneficial business relationships and the policy measures necessary to support them.

## Implementing a Health 2020 Vision Governance for Health in the 21st Century

**The WHO Regional Office for Europe** commissioned this report to support the implementation of the health 2020 Framework. It builds on "Governance for Health in the 21st Century," a study conducted for the WHO Regional office for Europe. This report provides policy-makers with examples from around the world of how whole-of-government and whole-of-society approaches have been implemented together with a set of tools to manage the complex policy process. These policy examples have been selected with a view to the priority areas set by the Health 2020 policy framework and with the following criteria in mind: they provide useful

lessons, often illustrate best practices, cover a wide variety of different contexts and countries and, as far as possible, have been implemented and, ideally, evaluated. The report aims to contribute, in particular, to the Health 2020 strategic policy objective of "improving leadership and participatory governance for health." It is conceived as a living document that will be continually enriched with new examples and analysis.
