## **THE LYNCHING OF CLEO WRIGHT**

---

*University Press of Kentucky* On January 20, 1942, black oil mill worker Cleo Wright assaulted a white woman in her home and nearly killed the first police officer who tried to arrest him. An angry mob then hauled Wright out of jail and dragged him through the streets of Sikeston, Missouri, before burning him alive. Wright's death was, unfortunately, not unique in American history, but what his death meant in the larger context of life in the United States in the twentieth-century is an important and compelling story. After the lynching, the U.S. Justice Department was forced to become involved in civil rights concerns for the first time, provoking a national reaction to violence on the home front at a time when the country was battling for democracy in Europe. Dominic Capeci unravels the tragic story of Wright's life on several stages, showing how these acts of violence were indicative not only of racial tension but the clash of the traditional and the modern brought about by the war. Capeci draws from a wide range of archival sources and personal interviews with the participants and spectators to draw vivid portraits of Wright, his victims, law-enforcement officials, and members of the lynch mob. He places Wright in the larger context of southern racial violence and shows the significance of his death in local, state, and national history during the most important crisis of the twentieth-century.

## **DEGRADATION OF IMPLANT MATERIALS**

---

*Springer Science & Business Media* This book reviews the current understanding of the mechanical, chemical and biological processes that are responsible for the degradation of a variety of implant materials. All 18 chapters will be written by internationally renowned experts to address both fundamental and practical aspects of research into the field. Different failure mechanisms such as corrosion, fatigue, and wear will be reviewed, together with experimental techniques for monitoring them, either in vitro or in vivo. Procedures for implant retrieval and analysis will be presented. A variety of biomaterials (stainless steels, titanium and its alloys, nitinol, magnesium alloys, polyethylene, biodegradable polymers, silicone gel, hydrogels, calcium phosphates) and medical devices (orthopedic and dental implants, stents, heart valves, breast implants) will be analyzed in detail. The book will serve as a broad reference source for graduate students and researchers studying biomedicine, corrosion, surface science, and electrochemistry.

*Univ of Wisconsin Press* Mohs Micrographic Surgery, an advanced treatment procedure for skin cancer, offers the highest potential for recovery—even if the skin cancer has been previously treated. This procedure is a state-of-the-art treatment in which the physician

*serves as surgeon, pathologist, and reconstructive surgeon. It relies on the accuracy of a microscope to trace and ensure removal of skin cancer down to its roots. This procedure allows dermatologists trained in Mohs Surgery to see beyond the visible disease and to precisely identify and remove the entire tumor, leaving healthy tissue unharmed. This procedure is most often used in treating two of the most common forms of skin cancer: basal cell carcinoma and squamous cell carcinoma. The cure rate for Mohs Micrographic Surgery is the highest of all treatments for skin cancer—up to 99 percent even if other forms of treatment have failed. This procedure, the most exact and precise method of tumor removal, minimizes the chance of regrowth and lessens the potential for scarring or disfigurement*

## **PERITONEAL ADHESIONS**

---

*Springer Science & Business Media Adhesions can cause a wide range of problems, complaints and hazards, even after simple abdominal procedures, such as appendectomy, with complications ranging from recurrent discomfort and pain to intestinal obstruction. Postsurgical adhesions increase the risk of following operations of the abdominal and thoracic cavity. They impair peritoneal dialysis and chemotherapy and play a crucial part in laparoscopic procedures. Adhesion-related problems account for a large amount of clinical work and have a significant socioeconomic impact. This book presents the current knowledge on the aetiopathogenesis of adhesion formation as well as the available methods for their prevention and control. Experts in the field contribute to clinical standards for preventive measures to control the formation of postoperative adhesions*

*Createspace Independent Publishing Platform Many of the photos were removed due to copyright restrictions. Welcome to the first annual release of the Federal Fumbles report! Our national debt is careening toward \$19 trillion (yes, that is a 19 followed by 12*

zeros), and federal regulations are expanding at a record pace. Meanwhile families struggle to get home loans, and small businesses struggle to make ends meet. States are constantly handed unfunded mandates and executive fiats that they are forced to implement with minimal direction and no way to pay for them. I present this report as a demonstration of ways we can cut back on wasteful federal spending and burdensome regulations to help families, small businesses, and our economy begin to get out from under the weight of federal stagnation. Cited here are not only prime examples of wasteful spending, but also federal departments or agencies that regulate outside the scope of the federal government's constitutional role. I firmly believe my staff and I have the obligation to solve the troubles of our nation, not just complain, which is why for every problem identified, you will also find a recommended solution. There is a way to eliminate wasteful, ineffective, or duplicative program spending; develop oversight methods to prevent future waste; and find ways to get us back on track.

## **THE HEALTH OF LESBIAN, GAY, BISEXUAL, AND TRANSGENDER PEOPLE**

---

### **BUILDING A FOUNDATION FOR BETTER UNDERSTANDING**

---

National Academies Press At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. *The Health of Lesbian, Gay, Bisexual, and Transgender People* assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a

*research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.*

## **COVERAGE MATTERS**

---

---

### **INSURANCE AND HEALTH CARE**

---

*National Academies Press Roughly 40 million Americans have no health insurance, private or public, and the number has grown steadily over the past 25 years. Who are these children, women, and men, and why do they lack coverage for essential health care services? How does the system of insurance coverage in the U.S. operate, and where does it fail? The first of six Institute of Medicine reports that will examine in detail the consequences of having a large uninsured population, Coverage Matters: Insurance and Health Care, explores the myths and realities of who is uninsured, identifies social, economic, and policy factors that contribute to the situation, and describes the likelihood faced by members of various population groups of being uninsured. It serves as a guide to a broad range of issues related to the lack of insurance coverage in America and provides background data of use to policy makers and health services researchers.*

## **CHARITY MANAGEMENT**

---

---

## **LEADERSHIP, EVOLUTION, AND CHANGE**

---

*Routledge Britain faces challenges that weren't imaginable thirty years ago, challenges which charities, rooted as they are in community action and the public good, should be ideally suited to tackle. But the charity sector seems paralysed. Even after a decade of cuts and immense social and environmental disruption charities are still fighting hard to maintain business as usual. To develop new responses to our changing world the charity sector desperately needs to reinvent itself, radically re-engaging with communities and developing powerful and scalable responses to the challenges facing the UK in the coming decades. What are the ties that bind charities, rendering them unable to re-invent themselves and to re-imagine their services, even when they face existential crises? This*

*book explores how charities in the UK really operate, as seen through the eyes of people who work in and with charities, and investigates what holds charities back from change. It demonstrates what we can learn from entrepreneurship and market disruption in the private sector, and points to ways in which the sector can re-imagine what it does and how it does this. It presents a new ambition for charities to break free of their history and imagine a new role for themselves in shaping the future for our society. Presenting a new ambition for charities to imagine a new role for themselves in shaping the future for our society, this volume is especially valuable for academics and professionals in the fields of charity and non-profit management, organisational change, and strategic management.*
