## Popular Geopolitics

### Plotting an Evolving Interdiscipline

**Routledge** This book brings together scholars from across a variety of academic disciplines to assess the current state of the subfield of popular geopolitics. It provides an archaeology of the field, maps the flows of various frameworks of analysis into (and out of) popular geopolitics, and charts a course forward for the discipline. It explores the real-world implications of popular culture, with a particular focus on the evolving interdisciplinary nature of popular geopolitics alongside interrelated disciplines including media, cultural, and gender studies.

## Global Trends 2030

### Alternative Worlds

**Createspace Independent Publishing Platform** This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations. Table of Contents: Introduction 1 Megatrends 6 Individual Empowerment 8 Poverty Reduction 8 An Expanding Global Middle Class 8 Education and the Gender Gap 10 Role of Communications Technologies 11 Improving Health 11 A MORE CONFLICTED IDEOLOGICAL LANDSCAPE 12 Diffusion of Power 15 THE RISE AND FALL OF COUNTRIES: NOT THE SAME OLD STORY 17 THE LIMITS OF HARD POWER IN THE WORLD OF 2030 18 Demographic Patterns 20 Widespread Aging 20 Shrinking Number of Youthful Countries 22 A New Age of Migration 23 The World as Urban 26 Growing Food, Water, and Energy Nexus 30 Food, Water, and Climate 30 A Brighter Energy Outlook 34 Game-Changers 38 The Crisis-Prone Global Economy 40 The Plight of the West 40 Crunch Time Too for the Emerging Powers 43 A Multipolar Global Economy: Inherently More Fragile? 46 The Governance Gap 48 Governance Starts at Home: Risks and Opportunities 48 INCREASED FOCUS ON EQUALITY AND OPENNESS 53 NEW GOVERNMENTAL FORMS 54 A New Regional Order? 55 Global Multilateral Cooperation 55 The Potential for Increased Conflict 59 INTRASTATE CONFLICT: CONTINUED DECLINE 59 Interstate Conflict: Chances Rising 61 Wider Scope of Regional Instability 70 The Middle East: At a Tipping Point 70 South Asia: Shocks on the Horizon 75 East Asia: Multiple Strategic Futures 76 Europe: Transforming Itself 78 Sub-Saharan Africa: Turning a Corner by 2030? 79 Latin America: More Prosperous but Inherently Fragile 81 The Impact of New Technologies 83 Information Technologies 83 AUTOMATION AND MANUFACTURING TECHNOLOGIES 87 Resource Technologies 90 Health Technologies 95 The Role of the United States 98 Steady US Role 98 Multiple Potential Scenarios for the United States' Global Role 101 Alternative Worlds 107 Stalled Engines 110 FUSION 116 Gini-out-of-the-Bottle 122 Nonstate World 128 Acknowledgements 134 GT2030 Blog References 137 Audience: Appropriate for anyone, from businesses to banks, government agencies to start-ups, the technology sector to the teaching sector, and more. This publication helps anticipate where the world will be: socially, politically, technologically, and culturally over the next few decades. Keywords: Global Trends 2030 Alternative Worlds, global trends 2030, Global Trends series, National Intelligence Council, global trajectories, global megatrends, geopolitics, geopolitical changes

## Prisoners of Geography

# Ten Maps That Explain Everything About the World

**Simon and Schuster** First published in Great Britain in 2015 by Elliott and Thompson Limited.

## Global Trends 2040

### A More Contested World

**Cosimo Reports** "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

## The Geopolitics of the Global Energy Transition

**Springer Nature** The world is currently undergoing an historic energy transition, driven by increasingly stringent decarbonisation policies and rapid advances in low-carbon technologies. The large-scale shift to low-carbon energy is disrupting the global energy system, impacting whole economies, and changing the political dynamics within and between countries. This open access book, written by leading energy scholars, examines the economic and geopolitical implications of the global energy transition, from both regional and thematic perspectives. The first part of the book addresses the geopolitical implications in the world's main energy-producing and energy-consuming regions, while the second presents in-depth case studies on selected issues, ranging from the geopolitics of renewable energy, to the mineral foundations of the global energy transformation, to governance issues in connection with the changing global energy order. Given its scope, the book will appeal to researchers in energy, climate change and international relations, as well as to professionals working in the energy industry.

## Global Trends 2030

### Alternative Worlds : a Publication of the National Intelligence Council

**U.S. Government Printing Office** This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

## Great Powers and Geopolitics

### International Affairs in a Rebalancing World

**Springer** This book presents the theoretical-historical-comparative political framework needed to fully grasp the truly dynamic nature of 21st century global affairs. The author provides a realistic assessment of the shift from U.S predominance to a new mix of counterbalancing rival middle-tier and assertive regional powers, while highlighting those geopolitical zones of contention most critical for future international stability. The book will appeal to scholars and policy makers interested in understanding the contours of the emerging world order, and in identifying its principal shapers and leading political actors.

## Popular Culture and World Politics

### Theories, Methods, Pedagogies

This edited collection brings together cutting edge insights from a range of key thinkers working in the area of popular culture and world politics (PCWP). Offering a holistic approach to this exciting field of research, it contributes to the establishment of PCWP as a sub-discipline of International Relations. Canvassing issues such as geopolitics, political identities, the War on Terror and political communication - and drawing from sources such as film, videogames, art and music - this collection is an invaluable reader for anyone

interested in popular culture and world politics. Contributors include: Jutta Weldes, Christina Rowley, Constance Duncombe, Roland Bleiker, Jason Dittmer, Klaus Dodds, Linda Ahall, Nicholas J. Kiersey, Iver B. Neumann, Michael J. Shapiro, Nick Robinson, Daniel Bos, Saara Sarma, Matt Davies, M.I. Franklin, Robert A. Saunders, Kyle Grayson, and William Clapton."

## Geo-Economics: The Interplay between Geopolitics, Economics, and Investments

**CFA Institute Research Foundation** Today's investors need to understand geopolitical trends as a main driving force of markets. This book provides just that: an understanding of the interplay between geopolitics and economics, and of the impact of that dynamic on financial markets. To me, geo-economics is the study of how geopolitics and economics interact in international relations. Plenty of books on geopolitics have been written by eminent experts in politics and international affairs. This book is not one of them. First, I am neither a political scientist nor an expert in international affairs. I am an economist and an investment strategist who has been fascinated by geopolitics for many years. And this fascination has led me to the realization that almost all books and articles written on geopolitics are useless for investors. Political scientists are not trained to think like investors, and they are not typically trained in quantitative methods. Instead, they engage in developing narratives for geopolitical events and processes that pose risks and opportunities for investors. My main problem with these narratives is that they usually do not pass the "so what?" test. Geopolitical risks are important, but how am I to assess which risks are important for my portfolio and which ones are simply noise? Because geopolitics experts focus on politics, they do not provide an answer to this crucial question for investors. What could be important for a geopolitics expert and for global politics could be totally irrelevant for investors. For example, the US wars in Iraq and Afghanistan have been going on for almost two decades now and have been an important influence on the political discussion in the United States. But for investors, the war in Afghanistan was a total nonevent, and the war in Iraq had only a fleeting influence, when it started in 2003. Geopolitics experts cannot answer the question of which geopolitical events matter for investors and which do not. Unfortunately, some experts thus claim that all geopolitical risks matter and that these risks cannot be quantified but only assessed qualitatively. Nothing could be further from the truth. In the chapters that follow, I discuss geopolitical and geo-economic events from the viewpoint of an investor and show that they can be quantified and introduced as part of a traditional risk management process. I do this in two parts. The first part of this book focuses on geopolitics that matters to investors. It reviews the literature on a range of geopolitical events and shows which events have a material economic effect and which do not. The second part of this book puts the insights from those first chapters into practice by applying them to current geopolitical trends. In this second part, I stick my head out and examine the impact the geopolitical trends have on the economy and financial markets today and their likely development in the coming years. —Joachim Klement, CFA

## Key Concepts in Political Geography

**SAGE** "A comprehensive reader for my political geography course. Good summaries at the end, and articles include effective case study examples." - Rachel Paul, Western Washington University "A very useful and comprehensive introduction to key concepts in political geography. This book provides useful context not just for 'traditional' political geography modules, but also those examining broader issues of power, resistance and social movements." - Gavin Brown, University of Leicester "Vital for introducing basic concepts and terminology in a clear and concise fashion. The short chapters are accessible and well supplemented with pertinent examples." - Daniel Hammett, Sheffield University "I found the book to be very useful in a supplemental capacity, full of information that would be useful for an undergraduate or early graduate student." - Jason Dittmer, University College London This textbook forms part of an innovative set of companion texts for the human geography subdisciplines. Organized around 20 short essays, *Key Concepts in Political Geography* provides a cutting-edge introduction to the central concepts that define contemporary research in the field. Involving detailed yet expansive discussions, the book includes: An introductory chapter providing a succinct overview of the recent developments in the field Over 20 key concept entries covering the expected staples of the sub-discipline, such as nationalism, territoriality, scale and political-economy, as well as relatively new arrivals to the field including the other, anti-statism, gender, and post-conflict A glossary, figures, diagrams and further reading. It is essential reading for undergraduate and postgraduate students of political geography.

## The Future of Natural Gas

## Markets and Geopolitics

## Four Internets

## Data, Geopolitics, and the Governance of Cyberspace

**Oxford University Press** "The book describes the Internet, and how Internet governance prevents it fragmenting into a 'Splinternet'. Four opposing ideologies about how data flows around the network have become prominent because they are (a) implemented by technical standards, and (b) backed by influential geopolitical entities. Each of these specifies an 'Internet', described in relation to its implementation by a specific geopolitical entity. The Four Internets of the title are the Silicon Valley Open Internet, developed by pioneers of the Internet in the 1960s, based on principles of openness and efficient dataflow; the Brussels Bourgeois Internet, exemplified by the European Union with a focus on human rights and legal administration; the DC Commercial Internet, exemplified by

the Washington establishment and its focus on property rights and market solutions; and the Beijing Paternal Internet, exemplified by the Chinese government's control of Internet content. These Internets have to coexist if the Internet as a whole is to remain connected. The book also considers the weaponization of the hacking ethic as the Moscow Spoiler model, exemplified by Russia's campaigns of misinformation at scale; this is not a vision of the Internet, but is parasitic on the others. Each of these ideologies is illustrated by a specific policy question. Potential future directions of Internet development are considered, including the policy directions that India might take, and the development of technologies such as artificial intelligence, smart cities, the Internet of Things, and social machines. A conclusion speculates on potential future Internets that may emerge alongside those described"--

## Connectivity Wars

## Why Migration, Finance and Trade Are the Geo-Economic Battlegrounds of the Future

## Qatar and the Gulf Crisis

## A Study of Resilience

**Oxford University Press, USA** In 2017, Saudi Arabia, Bahrain, the UAE and Egypt severed diplomatic ties with Qatar, launching an economic blockade by land, air and sea. The self-proclaimed 'Anti-Terror Quartet' offered maximalist demands: thirteen 'conditions' recalling Austria-Hungary's 1914 ultimatum to Serbia. They may even have intended military action. Well into its second year, the standoff in the Gulf has no realistic end in sight. With the Bahraini and Emirati criminalisation of expressing support for Qatar, and the Saudi labelling of detainees as 'traitors' for their alleged Qatari links, bitterness has been stoked between deeply interconnected peoples. The adviser to the Saudi crown prince advocating a moat to physically separate Qatar from the Arabian Peninsula illustrates the ongoing intensity--and irrationality--of the crisis. Most reporting and analysis of these developments has focused on questions of regional geopolitics, and framed the standoff in terms of its impact on (largely) Western interests. Lost in this thicket of commentary is consideration of how the Qatari leadership and population have responded to the blockade. As the 2022 FIFA World Cup draws closer, the ongoing Qatar crisis becomes increasingly important to understand. Ulrichsen offers an authoritative study of this international standoff, from both sides.

## Introduction to Geopolitics

**Routledge** This clear and concise introductory textbook guides students through their first engagement with geopolitics. It offers a clear framework for understanding contemporary conflicts by showing how geography provides opportunities and limits upon the actions of countries, national groups, and terrorist organizations. This second edition is fundamentally restructured to emphasize geopolitical agency, and non-state actors. The text is fully revised, containing a brand new chapter on environmental geopolitics, which includes discussion of climate change and resource conflicts. The text contains updated case studies, such as the Korean conflict, Israel-Palestine and Chechnya and Kashmir, to emphasize the multi-faceted nature of conflict. These, along with guided exercises, help explain contemporary global power struggles, environmental geopolitics, the global military actions of the United States, the persistence of nationalist conflicts, the changing role of borders, and the new geopolitics of terrorism, and peace movements. Throughout, the readers are introduced to different theoretical perspectives, including feminist contributions, as both the practice and representation of geopolitics are discussed. Introduction to Geopolitics is an ideal introductory text which provides a deeper and critical understanding of current affairs, geopolitical structures and agents. The text is extensively illustrated with diagrams, maps, photographs and end of chapter further reading. Both students and general readers alike will find this book an essential stepping-stone to understanding contemporary conflicts.

## The Geopolitics of Renewables

**Springer** Renewables are a game changer for interstate energy relations. Their abundance and intermittency, possibilities for decentral generation and use of rare earth materials, and generally electric nature of transportation make them very different from fossil fuels. What do these geographic and technical characteristics of renewable energy systems imply for infrastructure topology and operations, business models, and energy markets? What are the consequences for the strategic realities and policy considerations of producer, consumer, and transit countries and energy-related patterns of cooperation and conflict between them? Who are the winners and losers? The Geopolitics of Renewables is the first in-depth exploration of the implications for interstate energy relations of a transition towards renewable energy. Fifteen international scholars combine insights from several disciplines - international relations, geopolitics, energy security, renewable energy technology, economics, sustainability transitions, and energy policy - to establish a comprehensive overview and understanding of the emerging energy game. Focus is on contemporary developments and how they may shape the coming decades on three levels of analysis: · The emerging global energy game; winners and losers · Regional and bilateral energy relations of established and rising powers · Infrastructure developments and governance responses The book is recommended for academics and policy makers. It offers a novel analytical framework that moves from geography and technology to economics and politics to investigate the geopolitical implications of renewable energy and provides practical illustrations and policy recommendations related to specific countries and regions such as the US, EU, China, India, OPEC, and Russia

# Orientalism

## Western Conceptions of the Orient

**Penguin UK** 'A stimulating, elegant yet pugnacious essay'—Observer In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

## Geopolitics and the Great Powers in the 21st Century

## Multipolarity and the Revolution in Strategic Perspective

**Routledge** This book argues that in the twenty-first century Eastern Eurasia will replace Europe as the theatre of decision in international affairs, and that this new geographic and cultural context will have a strong influence on the future of world affairs. For half a millennium, the great powers have practised what might be called 'world politics', yet during that time Europe, and small portions of the Near East and North Africa strategically vital to Europe, were the 'centres of gravity' in international politics. This book argues that the 'unipolar moment' of the post-Cold War era will not be replaced by a US-China 'Cold War', but rather by a long period of multipolarity in the twenty-first century. Examining the policy goals and possible military-political strategies of several powers, this study explains how Washington may play a key role in eastern Eurasian affairs if it can learn to operate in a very different political context. Dale Walton also considers the rapid pace of technological change and how it will impact on great power politics. Considering India, China, the US, Russia, Japan, and other countries as part of a multipolar system, he addresses the central questions that will drive US policy in the coming decades. *Geopolitics and the Great Powers in the 21st Century* will be of interest to students of international security, military history, geopolitics, and international relations.

## Rethinking Geopolitics

**Routledge** Rethinking Geopolitics argues that the concept of geopolitics needs to be conceptualised anew as the twenty-first century approaches. Challenging conventional geopolitical assumptions, contributors explore: \* theories of post-modern geopolitics \* historical formulations of states and cold wars \* the geopolitics of the Holocaust \* the gendered dimension of Kurdish insurgency \* the cold war world \* political cartoons concerning Bosnia \* Time magazine representations of the Persian Gulf \* the Zapatistas and the Chiapas revolt \* the new cyber politics \* conflict simulations in the US military \* the emergence of a new geopolitics of global security. Exploring how popular cultural assumptions about geography and politics constitute the discourses of contemporary violence and political economy, Rethinking Geopolitics shows that we must rethink the struggle for knowledge, space and power.

## The Grand Chessboard

## American Primacy and Its Geostrategic Imperatives

**Hachette UK** Bestselling author and eminent foreign policy scholar Zbigniew Brzezinski's classic book on American's strategic mission in the modern world. In *The Grand Chessboard*, renowned geostrategist Zbigniew Brzezinski delivers a brutally honest and provocative vision for American preeminence in the twenty-first century. The task facing the United States, he argues, is to become the sole political arbiter in Eurasian lands and to prevent the emergence of any rival power threatening our material and diplomatic interests. The Eurasian landmass, home to the greatest part of the globe's population, natural resources, and economic activity, is the "grand chessboard" on which America's supremacy will be ratified and challenged in the years to come. In this landmark work of public policy and political science, Brzezinski outlines a groundbreaking and powerful blueprint for America's vital interests in the modern world. In this revised edition, Brzezinski addresses recent global developments including the war in Ukraine, the re-emergence of Russia, and the rise of China.

## Investment under Uncertainty

**Princeton University Press** How should firms decide whether and when to invest in new capital equipment, additions to their workforce, or the development of new products? Why have traditional economic models of investment failed to explain the behavior of investment spending in the United States and other countries? In this book, Avinash Dixit and Robert Pindyck provide the first detailed exposition of a new theoretical approach to the capital investment decisions of firms, stressing the irreversibility of most investment decisions, and the ongoing uncertainty of the economic environment in which these decisions are made. In so doing, they answer important questions about investment decisions and the behavior of investment spending. This new approach to investment recognizes the option value of waiting for better (but never complete) information. It exploits an analogy with the theory of options in financial markets, which permits a much richer dynamic framework than was possible with the traditional theory of investment. The authors present the new theory in a clear and systematic way, and consolidate, synthesize, and extend the various strands of research that have come out of the theory. Their book shows the importance of the theory for understanding investment behavior of firms; develops the implications of this theory for industry dynamics and for government policy concerning investment; and shows

how the theory can be applied to specific industries and to a wide variety of business problems.

## The Geopolitics Reader

**Psychology Press** The extensively revised second edition of the 'Geopolitics Reader' draws together the most important political, geographical, historical and sociological readings of geopolitics in the early 21st century.

## New Energy, New Geopolitics

## Balancing Stability and Leverage

**Rowman & Littlefield** This report evaluates the energy and geopolitical shifts that have arisen from the production of shale gas and light tight oil in the United States.

## Review of Maritime Transport 2020

This series contains the decisions of the Court in both the English and French texts.

## Geopolitics

## Re-Visioning World Politics

**Routledge** Geopolitics identifies and scrutinizes the central features of geopolitics from the sixteenth century to the present. The book focuses on five key concepts of the modern geopolitical imagination: \* Visualising the world as a whole \* The definition of geographical areas as 'advanced' or 'primitive' \* The notion of the state being the highest form of political organization \* The pursuit of primacy by competing states \* The necessity for hierarchy.

## Foundations of Geopolitics: the Geopolitical Future of Russia

## English Translation

**ENGLISH TRANSLATION** The book is a Russian textbook on geopolitics. It systematically and detailed the basics of geopolitics as a science, its theory, history. Covering a wide range of geopolitical schools and beliefs and actual problems. The first time a Russian geopolitical doctrine. An indispensable guide for all those who make decisions in the most important spheres of Russian political life - for politicians, entrepreneurs, economists, bankers, diplomats, analysts, political scientists, and so on. D.

## The Geopolitics of the Middle East

**Complete set** Since 1961 the Adelphi Papers have provided some of the most informed accounts of international and strategic relations. Produced by the world renowned International Institute of Strategic Studies, each paper provides a short account of a subject of topical interest by a leading military figure, policy maker or academic. The project reprints the first forty years of papers, arranged into thematic sets. The collection as a whole provides a rich and insightful account of international affairs during a period which spans the second half of the Cold War, the fall of the communist bloc and the emergence of a new regime with the United States as the sole superpower. There is a wealth of global coverage: Four volumes on east and southeast Asia as well as individual volumes on China, Japan and Korea Particular attention is given to the Middle East, with volumes addressing internal sources of instability; geo-politics and the role of the superpowers; the Israel-Palestine conflict; and the Iran-Iraq War and the first Gulf War. There is also a volume on oil and insecurity There are also two volumes on Africa, the site of most of the world's wars during the period. The IISS has obviously made a particular contribution to the understanding of military strategy, and this is reflected with material on topics such as urban and guerrilla warfare, nuclear deterrence and the role of information in modern warfare. Volumes on military strategy are complemented by approaches from other disciplines, such as defence economics. Key selling points: Early papers were only distributed by the IISS and will have achieved limited penetration of the academic market A host of major authors on a range of different subjects (eg Gerald Segal on China, Michael Leifer on Southeast Asia, Sir Lawrence Freidman on the revolution in military affairs, Raymond Vernon on multinationals and defence economics) Individual volumes will have a strong appeal to different markets (eg the volume on defence economics for economists, various volumes for Asian Studies etc)

## Energy and Geopolitics

**Routledge** The idea that energy shapes and is shaped by geopolitics is firmly rooted in the popular imagination - and not without reason. Very few countries have the means to secure their energy needs through locally available supplies; instead, enduring dependencies upon other countries have developed. Given energy's strategic significance, supply systems for fuels and electricity are now seamlessly interwoven with foreign policy and global politics. Energy and Geopolitics enables students to enhance their understanding and sharpen their analytical skills with respect to the complex relations between energy supply, energy markets and

international politics. Per Högselius guides us through the complexities of world energy and international energy relations, examining a wide spectrum of fossil fuels, alongside nuclear and renewable energies. Uniquely, the book also shows how the geopolitics of energy is not merely a matter for the great powers and reveals how actors in the world's smaller nations are as active in their quest for power and control. Encouraging students to apply a number of central concepts and theoretical ideas to different energy sources within a multitude of geographical, political and historical contexts, this book will be a vital resource to students and scholars of geopolitics, energy security and international environmental policy and politics.

## Democratic ideals and reality a study in the politics of reconstruction

**DIANE Publishing**

### The Borderlands of Southeast Asia

## Geopolitics, Terrorism, and Globalization

**NDU Press** The contributors to this book emphasize a mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics. Whether the region's 11 states want it or not, their bordered identity is falling into ever sharper definition-if only because of pressure from extraregional states. Chapters are organized by country to elicit a broad range of thought and approach as much as for the specific areas or nation-states examined in each chapter. This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia. Edited by James Clad, Sean M. McDonald, and Bruce Vaughn, with contributions from: Zachary Abuza, Richard P. Cronin, David Lee, Rhoda Margesson, Dick K. Nanto, Patricia O'Brien, David Rosenberg, Carlyle A. Thayer, Michael Wood.

## New Realities in Foreign Affairs

## Diplomacy in the 21st Century

**Nomos Verlag** Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen Veränderungen zu nutzen. Mit Beiträgen von Volker Stanzel, Sascha Lohmann, Andrew Cooper, Christer Jönsson, Corneliu Bjola, Emillie V. de Keulenaar, Jan Melissen, Karsten D. Voigt, Kim B. Olsen, Hanns W. Maull und R. S. Zaharna

## World Migration Report 2020

**United Nations** Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

## Geopolitics

## The Geography of International Relations

**Rowman & Littlefield Publishers** Written by one of the world's leading political geographers, this fully revised and updated textbook examines the dramatic changes wrought by ideological and economic forces unleashed by the end of the Cold War. Saul Cohen considers these forces in the context of their human and physical settings and explores their geographical influence on foreign policy and international relations.

## Great Power Competition

## The Changing Landscape of Global Geopolitics

November 2020 Great Power Competition: The Changing Landscape of Global Geopolitics is a collection of essays originating from the Cultural and Area Studies Office of the Combined Arms Center in Fort Leavenworth, Kansas. Editor Mahir J. Ibrahimov has culled together an expansion of his previous volume, Cultural Perspectives, Geopolitics, & Energy Security of Eurasia: Is the Next Global

Conflict Imminent? In this volume, experts consider cultural and geopolitical implications of Chinese and Russian power projections throughout Europe, Asia, the Americas, and Africa. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com We include a Table of Contents on the back cover for quick reference. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, pocket-size (6 by 9 inches), with large text and glossy cover. 4th Watch Publishing Co. is a SDVOSB. <https://usgovpub.com>

## World Investment Report 2020

### International Production Beyond the Pandemic

**United Nations** The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

## World Economic Situation and Prospects 2020

**United Nations** This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

## Environment, Geography, and the Future of Warfare

### The Changing Global Environment and Its Implications for the U. S. Air Force

This volume of the Future of Warfare series examines significant environmental and geographic trends that could affect U.S. national security, including the opening of the Arctic, sea level rise, water scarcity, and increasing urbanization.

## Geopolitical Economy of Energy and Environment

### China and the European Union

**BRILL** Geopolitical economy of Energy-China and the European Union offers to analyse the three interconnected issues, namely geopolitical economy of energy and environment with focus on China and the European Union.

## Global Innovation Index 2020

### Who Will Finance Innovation?

**WIPO** The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges - including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

# Geopolitics of the Knowledge-Based Economy

**Routledge** We live in the era of the knowledge-based economy, and this has major implications for the ways in which states, cities and even supranational political units are spatially planned, governed and developed. In this book, Sami Moisio delves deeply into the links between the knowledge-based economy and geopolitics, examining a wide range of themes, including city geopolitics and the university as a geopolitical site. Overall, this work shows that knowledge-based "economization" can be understood as a geopolitical process that produces territories of wealth, security, power and belonging. This book will prove enlightening to students, researchers and policymakers in the fields of human geography, urban studies, spatial planning, political science and international relations.
