The British Study Edition of the Urantia Papers Book [eReader PDF] Tigran Aivazian The British Study Edition of the Urantia Papers is based on the standard SRT text, but uses the metric system and adds a critical apparatus of textual variants and study notes. How Learning Works Seven Research-Based Principles for Smart Teaching John Wiley & Sons Praise for How Learning Works "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, Tools for Teaching "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning

scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Exoticism in English Tag Questions Strengthening Arguments and Caressing the Social Wheel Cambridge Scholars Publishing For the last 400 years, since the birth of the Stuart Dynasty in England with James VI in the early 17th century, when the contraction of negative forms of the English sentence began in earnest, (canonical) tag questions have been a great fascination to many users of English. Within the last sixty years, beginning with the birth of the generative paradigm, tag questions have equally been of particular interest to many scholars of linguistics from a variety of perspectives, especially those concerned with the syntax-semantics and socio-pragmatics of the English sentence. With the spread of English to other countries and the emergence of new Englishes in the post-colonial context of the non-native varieties spoken in former British colonies, it is particularly interesting to see how and why tag questions have evolved over time in daily usage in both form and function in different English speech communities around the world. The essays gathered here focus on this evolutionary trend of English tag questions, with special attention on the exoticisms that characterize current usage.

Global Trends 2030 Alternative Worlds : a Publication of the National Intelligence Council U.S. Government Printing Office This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report. Research Handbook on the Regulation of Mutual Funds Edward Elgar Publishing With fifty trillion in worldwide assets, the growth of mutual funds is a truly global phenomenon and deserves a broad international analysis. Local political economies and legal regimes create different regulatory preferences for the oversight of these funds, and academics, public officials, and legal practitioners wishing to understand the global investing environment will require a keen awareness of these international differences. The contributors, leading scholars in the field of investment law from around the world, provide a current legal analysis of funds from a variety of perspectives and using an array of methodologies that consider the large fundamental questions governing the role and regulation of investment funds. This volume also explores the identity and

behavior of investors as well as issues surrounding less orthodox funds, such as money market funds, ETFs, and private funds. This Handbook will provide legal and financial scholars, academics, lawyers and regulators with a vital tool for working with mutual funds.

A Taxonomy for Learning, Teaching, and Assessing A Revision of Bloom's Taxonomy of Educational Objectives Pearson This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Navy Medicine Rethinking and Reviving Subject English The Murder and the Murmur Taylor & Francis This book invites readers to engage with the rich and complex debates of contemporary English education, outlining new possibilities to revive the teaching of English. Bringing together diverse voices and insights from educators in English across the primary, secondary, further and higher education phases, the book offers reflections and critical engagement with the lived experiences of English teachers and pupils in contemporary educational spaces. Each chapter includes example vignettes from classrooms which tell something of the story of English teaching today. The book considers how politics and policy have worked to close the opportunities of the English classroom for self-expression and critical engagement with the world - a murder. The authors then offer an exploration of the opportunities for a re-imagining of English - the murmurs of teachers and pupils that resist such closures. The chapters explore new thinking, new practices and new possibilities for English classrooms as inclusive, emancipatory, critical and creative spaces. Offering a thoughtful and hopeful dialogue from practising English teacher-researchers, the book will be essential reading for researchers and students of English language and literature education, as well as trainee teachers of English.

Model Rules of Professional Conduct American Bar Association The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the

nature of the relationship between you and your clients, colleagues and the courts. From Foreclosure to Fair Lending Advocacy, Organizing, Occupy, and the Pursuit of Equitable Credit New Village Press Well-known fair housing and fair lending activists and organizers examine the implications of the new wave of fair housing activism generated by Occupy Wall Street protests and the many successes achieved in fair housing and fair lending over the years. The book reveals the limitations of advocacy efforts and the challenges that remain. Best directions for future action are brought to light by staff of fair housing organizations, fair housing attorneys, community and labor organizers, and scholars who have researched social justice organizing and advocacy movements. The book is written for general interest and academic audiences. Contributors address the foreclosure crisis, access to credit in a changing marketplace, and the immoral hazards of big banks. They examine opportunities in collective bargaining available to homeowners and how low-income and minority households were denied access to historically low home prices and interest rates. Authors question the effectiveness of litigation to uphold the Fair Housing Act's promise of nondiscriminatory home loans and ask how the Consumer Financial Protection Bureau is assuring fair lending. They also look at where immigrants stand, housing as a human right, and methods for building a movement. Democracy and Education Read Books Ltd This antiquarian volume contains a comprehensive treatise on democracy and education, being an introduction to the 'philosophy of education'. The Parent Trap How to Stop Overloading Parents and Fix Our Inequality Crisis MIT Press How parents have been set up to fail, and why helping them succeed is the key to achieving a fair and prosperous society. Few people realize that raising children is the single largest industry in the United States. Yet this vital work receives little political support, and its primary workers—parents—labor in isolation. If they ask for help, they are made to feel inadequate; there is no centralized organization to represent their interests; and there is virtually nothing spent on research and development to help them achieve their goals. It's almost as if parents are set up to fail—and the result is lost opportunities that limit children's success and make us all worse off. In *The Parent Trap*, Nate Hilger combines cutting-edge social science research, revealing historical case studies, and on-the-ground investigation to recast parenting as the hidden crucible of inequality. Parents are expected not only to care for their children but to help them develop the skills they will need to thrive in today's socioeconomic reality—but most parents, including even the most caring parents on the planet, are not trained in skill development and lack the resources to get help. How do we fix this? The solution, Hilger argues, is to ask less of parents, not more. America should consider child development a public investment with a monumental payoff. We need a program like Medicare—call it Familycare—to drive this investment. To make it happen, parents need to organize to wield their political power on behalf of children—who will always be the largest bloc of disenfranchised people in this country. *The Parent Trap* exposes the true costs of our society's unrealistic expectations around parenting and lays out a profoundly hopeful blueprint for reform.

Practical Weak Supervision "O'Reilly Media, Inc." Most data scientists and engineers today rely on quality labeled data to train machine learning models. But building a training set manually is time-consuming and expensive, leaving many companies with unfinished ML projects. There's a more practical approach. In this book, Wee Hyong Tok, Amit Bahree, and Senja Filipi show you how

to create products using weakly supervised learning models. You'll learn how to build natural language processing and computer vision projects using weakly labeled datasets from Snorkel, a spin-off from the Stanford AI Lab. Because so many companies have pursued ML projects that never go beyond their labs, this book also provides a guide on how to ship the deep learning models you build. Get up to speed on the field of weak supervision, including ways to use it as part of the data science process Use Snorkel AI for weak supervision and data programming Get code examples for using Snorkel to label text and image datasets Use a weakly labeled dataset for text and image classification Learn practical considerations for using Snorkel with large datasets and using Spark clusters to scale labeling
