The System of Objects

[Verso Books](#) **The System of Objects** is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, **The System of Objects** offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “schizofunctional.” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. **The System of Objects** is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille’s political economy of “expenditure” and Mauss’s theory of the gift; Reisman’s lonely crowd and the “technological society” of Jacques Ellul; the structuralism of Roland Barthes in *The System of Fashion*; Henri Lefebvre’s work on the social construction of space; and last, but not least, Guy Debord’s situationist critique of the spectacle.

Distinction

A Social Critique of the Judgement of Taste

[Routledge](#) **No judgement of taste is innocent - we are all snobs.** Pierre Bourdieu's *Distinction* brilliantly illuminates the social pretensions of the middle classes in the modern world, focusing on the tastes and preferences of the French bourgeoisie. First published in 1979, the book is at once a vast ethnography of contemporary France and a dissection of the bourgeois mind. In the course of everyday life we constantly choose between what we find aesthetically pleasing, and what we consider tacky, merely trendy, or ugly. Taste is not pure. Bourdieu demonstrates that our different aesth

The Translator's Invisibility

A History of Translation

[Routledge](#) Since publication over ten years ago, *The Translator's Invisibility* has provoked debate and controversy within the field of translation and become a classic text. Providing a fascinating account of the history of translation from the seventeenth century to the present day, Venuti shows how fluency prevailed over other translation strategies to shape the canon of foreign literatures in English and investigates the cultural consequences of the receptor values which were simultaneously inscribed and masked in foreign texts during this period. The author locates alternative translation theories and practices in British, American and European cultures which aim to communicate linguistic and cultural differences instead of removing them. In this second edition of his work, Venuti: clarifies and further develops key terms and arguments responds to critical commentary on his argument incorporates new case studies that include: an eighteenth century translation of a French novel by a working class woman; Richard Burton's controversial translation of the *Arabian Nights*; modernist poetry translation; translations of Dostoevsky by the bestselling translators Richard Pevear and Larissa Volokhonsky; and translated crime fiction updates data on the current state of translation, including publishing statistics and translators' rates. *The Translator's Invisibility* will be essential reading for students of translation studies at all levels. Lawrence Venuti is Professor of English at Temple University, Philadelphia. He is a translation theorist and historian as well as a translator and his recent publications include: *The Scandals of Translation: Towards an Ethics of Difference* and *The Translation Studies Reader*, both published by Routledge.

Deleuze and Guattari's Anti-Oedipus

Introduction to Schizoanalysis

[Routledge](#) Eugene W. Holland provides an excellent introduction to Gilles Deleuze and Felix Guattari's *Anti-Oedipus* which is widely recognized as one of the most influential texts in philosophy to have appeared in the last thirty years. He lucidly presents the theoretical concerns behind *Anti-Oedipus* and explores with clarity the diverse influences of Marx, Freud, Nietzsche and Kant on the development of Deleuze & Guattari's thinking. He also examines the wider implications of their work in revitalizing Marxism, environmentalism, feminism and cultural studies.

Made to Break

Technology and Obsolescence in America

[Harvard University Press](#) **Made to Break** is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

The Marketing Book

[Routledge](#) **The Marketing Book** is everything you need to know but were afraid to ask about marketing. Divided into 25 chapters, each written by an expert in their field, it's a crash course in marketing theory and practice. From planning, strategy and research through to getting the marketing mix right, branding, promotions and even marketing for small to medium enterprises. This classic reference from renowned professors Michael Baker and Susan Hart was designed for student use, especially for professionals taking their CIM qualifications. Nevertheless, it is also invaluable for practitioners due to its modular approach. Each chapter is set out in a clean and concise way with plenty of diagrams and examples, so that you don't have to dig for the information you need. Much of this long-awaited seventh edition contains brand new chapters and a new selection of experts to bring you bang up to date with the latest in marketing thought. Also included are brand new content in direct, data and digital marketing, and social marketing. If you're a marketing student or practitioner with a question, this book should be the first place you look.

Anti-Oedipus

[A&C Black](#) 'A major philosophical work by perhaps the most brilliant philosophical mind at work in France today.' Fredric Jameson Gilles Deleuze (1925-1995) was Professor of Philosophy at the University of Paris VIII. He was a key figure in poststructuralism, and one of the most influential philosophers of the twentieth century. Félix Guattari (1930-1992) was a psychoanalyst at the la Borde Clinic, as well as being a major social theorist and radical activist. Anti-Oedipus is part of Deleuze and Guattari's landmark philosophical project, Capitalism and Schizophrenia - a project that still sets the terms of contemporary philosophical debate. Anti-Oedipus is a radical philosophical analysis of desire that shows how we can combat the compulsion to dominate ourselves and others. As Michel Foucault says in his Preface it is an 'Introduction to Non-Fascist Living'. Preface by Michel Foucault.

A Dictionary of Nonprofit Terms and Concepts

[Indiana University Press](#) This reference work defines more than 1,200 terms and concepts that have been found useful in past research and theory on the nonprofit sector. The entries reflect the importance of associations, citizen participation, philanthropy, voluntary action, nonprofit management, volunteer administration, leisure, and political activities of nonprofits. They also reflect a concern for the wider range of useful general concepts in theory and research that bear on the nonprofit sector and its manifestations in the United States and elsewhere. This dictionary supplies some of the necessary foundational work on the road toward a general theory of the nonprofit sector.

Stone Age Economics

[Routledge](#) **Stone Age Economics** is a classic of economic anthropology, ambitiously tackling the nature of economic life and how to study it comparatively. This collection of six influential essays is one of Marshall Sahlins' most important and enduring works, claiming that stone age economies formed the original affluent society. The book examines notions of production, distribution and exchange in early communities and examines the link between economics and cultural and social factors. This edition includes a new foreword by the author.

EBOOK: Critical Theories of Mass Media: Then and Now

[McGraw-Hill Education \(UK\)](#) "This is a welcome critical corrective to complacent mainstream accounts of the media's cultural impact". Prof. Slavoj Žižek, International Director of the Birkbeck Institute for the Humanities at Birkbeck, University of London "A powerful and highly engaging re-assessment of past critical thinkers (including those not normally thought of as critical) in the light of today's mediascape". Jorge Reina Schement, Distinguished Professor of Communications, Penn State University With the exception of occasional moral panics about the coarsening of public discourse, and the impact of advertising and television violence upon children, mass media tend to be viewed as a largely neutral or benign part of contemporary life. Even when criticisms are voiced, the media chooses how and when to discuss its own inadequacies. More radical external critiques are often excluded and media theorists are frequently more optimistic than realistic about the negative aspects of mass culture. This book reassesses this situation in the light of both early and contemporary critical scholarship and explores the intimate relationship between the mass media and the dis-empowering nature of commodity culture. The authors cast a fresh perspective on contemporary mass culture by comparing past and present critiques. They: Outline the key criticisms of mass culture from past critical thinkers Reassess past critical thought in the changed circumstances of today Evaluate the significance of new critical thinkers for today's mass culture The book begins by introducing the critical insights from major theorists from the past - Walter Benjamin, Siegfried Kracauer, Theodor Adorno, Marshall McLuhan and Guy Debord. Paul Taylor and Jan Harris then apply these insights to recent provocative writers such as Jean Baudrillard and Slavoj Žižek, and discuss the links between such otherwise apparently unrelated contemporary events as the Iraqi Abu Ghraib controversy and the rise of reality television. Critical Theories of Mass Media is a key text for students of cultural studies, communications and media studies, and sociology.

International Political Economy

Contrasting World Views

[Routledge](#) This textbook is the perfect short introduction to the fundamental theories and issues of international political economy (IPE). Written in a concise and accessible style, the text equips students with the necessary skills and knowledge to understand this complex and fascinating area. Engaging with both classical theories and the main contemporary debates, this is the ideal starting point for the study of IPE. The text introduces students to the three main theoretical approaches in IPE: free market, institutionalist and historical materialist. The strengths and weaknesses of the theories are then illustrated by a series of fascinating applied case studies in such core areas as international trade, finance, transnational corporations, development and the environment. Combining clear historical and theoretical explanation with detailed empirical examples this is essential reading for students of international political economy, global governance and international economics.

Social Capital Online

Alienation and Accumulation

[University of Westminster Press](#) What is 'social capital'? The enormous positivity surrounding it conceals the instrumental economic rationality underpinning the notion as corporations silently sell consumer data for profit. Status chasing is just one aspect of a process of transforming qualitative aspects of social interactions into quantifiable metrics for easier processing, prediction, and behavioural shaping. A work of critical media studies, Social Capital Online examines the idea within the new 'network spectacle' of digital capitalism via the ideas of Marx, Veblen, Debord, Baudrillard and Deleuze. Explaining how such phenomena as online narcissism and aggression arise, Faucher offers a new theoretical understanding of how the spectacularisation of online activity perfectly aligns with the value system of neoliberalism and its data worship. Even so, at the centre of all, lie familiar ideas - alienation and accumulation - new conceptions of which he argues are vital for understanding today's digital society.

Screen Society

[Springer](#) Screens have been with us since the eighteenth century, though we became accustomed to staring at them only after the appearance of film and television in the twentieth century. But there was nothing in film or TV that prepared us for the revolution wrought by the combination of screens and the internet. Society has been transformed and this book asks how and with what consequences? Screen Society's conclusions are based on an original research project conducted by scholars in the UK and Australia. The researchers designed their own research platform and elicited the thoughts and opinions of nearly 2000 participants, to draw together insights of today's society as seen by users of smartphones, tablets and computers - what the authors call Screenagers. The book issues challenges to accepted wisdom on many of the so-called problems associated with our persistent use of screen devices, including screen addiction, trolling, gaming and gambling.

Environmental Communication. Second Edition

Skills and Principles for Natural Resource Managers, Scientists, and Engineers.

[Springer Science & Business Media](#) Environmental professionals can no longer simply publish research in technical journals. Informing the public is now a critical part of the job. *Environmental Communication* demonstrates, step by step, how it's done, and is an essential guide for communicating complex information to groups not familiar with scientific material. It addresses the entire communications process, from message planning, audience analysis and media relations to public speaking - skills a good communicator must master for effective public dialogue. *Environmental Communication* provides all the knowledge and tools you need to reach your target audience in a persuasive and highly professional manner. "This book will certainly help produce the skills for environmental communications sorely needed for industry, government and non-profit groups as well as an informed public". Sol P. Baltimore, Director, Environmental Communications and Adjunct faculty, Hazardous Waste management program, Department of Chemical Engineering, College of Engineering, Wayne State University, Detroit, Michigan. The contributors represent a wide range of schools in economics, and include Nobel Laureates Paul Samuelson and Robert Solow.

Architecture in the Anthropocene

Brecht and Method

[Verso Books](#) The legacy of Bertolt Brecht is much contested, whether by those who wish to forget or to vilify his politics, but his stature as the outstanding political playwright and poet of the twentieth century is unforgettably established in this major critical work. Fredric Jameson elegantly dissects the intricate connections between Brecht's drama and politics, demonstrating the way these combined to shape a unique and powerful influence on a profoundly troubled epoch. Jameson sees Brecht's method as a multi-layered process of reflection and self-reflection, reference and self-reference, which tears open a gap for individuals to situate themselves historically, to think about themselves in the third person, and to use that self-projection in history as a basis for judgment. Emphasizing the themes of separation, distance, multiplicity, choice and contradiction in Brecht's entire corpus, Jameson's study engages in a dialogue with a cryptic work, unpublished in Brecht's lifetime, entitled *Me-ti; Book of Twists and Turns*. Jameson sees this text as key to understanding Brecht's critical reflections on dialectics and his orientally informed fascination with flow and flux, change and the non-eternal. For Jameson, Brecht is not prescriptive but performative. His plays do not provide answers but attempt to show people how to perform the act of thinking, how to begin to search for answers themselves. Brecht represents the ceaselessness of transformation while at the same time alienating it, interrupting it, making it comprehensible by making it strange. And thereby, in breaking it up by analysis, the possibility emerges of its reconstitution under a new law.

Disordering the Establishment

Participatory Art and Institutional Critique in France, 1958–1981

[Duke University Press](#) In the decades following World War II, France experienced both a period of affluence and a wave of political, artistic, and philosophical discontent that culminated in the countrywide protests of 1968. In *Disordering the Establishment* Lily Woodruff examines the development of artistic strategies of political resistance in France in this era. Drawing on interviews with artists, curators, and cultural figures of the time, Woodruff analyzes the formal and rhetorical methods that artists used to counter establishment ideology, appeal to direct political engagement, and grapple with French intellectuals' modeling of society. Artists and collectives such as Daniel Buren, André Cadere, the Groupe de Recherche d'Art Visuel, and the Collectif d'Art Sociologique shared an opposition to institutional hegemony by adapting their works to unconventional spaces and audiences, asserting artistic autonomy from art institutions, and embracing interdisciplinarity. In showing how these artists used art to question what art should be and where it should be seen, Woodruff demonstrates how artists challenged and redefined the art establishment and their historical moment.

Dual Language Education: Teaching and Leading in Two Languages

[Springer](#) This book provides a comprehensive and interdisciplinary examination of dual language education for Latina/o English language learners (ELLs) in the United States, with a particular focus on the state of Texas and the U.S.-Mexico border. The book is broken into three parts. Part I examines how Latina/o ELLs have been historically underserved in public schools and how this has contributed to numerous educational inequities. Part II examines bilingualism, biliteracy, and dual language education as an effective model for addressing the inequities identified in Part I. Part III examines research on dual language education in a large urban school district, a high-performing elementary school that serves a high proportion of ELLs along the Texas-Mexico border, and best practices for principals and teachers. This volume explores the potential and realities of dual language education from a historical and social justice lens. Most importantly, the book shows how successful programs and schools need to address and align many related aspects in order to best serve emergent bilingual Latino/as: from preparing teachers and administrators, to understanding assessment and the impacts of financial inequities on bilingual learners. EqualBITE

Gender Equality in Higher Education

[Brill](#) "The ivory tower, like other stately homes in the UK, might present a grand façade to the world but closer inspection reveals a dark, spidery basement full of inequalities." Gender imbalances still exist across all areas of higher education. From salaries and promotion, to representation in the curriculum, formal approaches and good intentions rarely address the full complexity. EqualBITE digs into the messy reality of higher education gender issues, presenting people's stories, experiences and frustrations and - more importantly - what can be done. University of Edinburgh students and staff share real-life experiences of gender challenges and opportunities, and their constructive responses. The book condenses current academic research into practical actions that do make a difference. EqualBITE is a pragmatic and positive response to gender issues in academia - a catalyst for creating a culture which is better for everyone. "We were so pleased to see this new guide to one aspect of diversity--gender equality--and to see how good it is: the book is comprehensive; it is raw, honest and personal; and it is very well written. It is a book both for reading cover-to-cover and for dipping into, and it will be enormously influential." - Jim Smith Director of Science, Wellcome Trust & Gemma Tracey Diversity & Inclusion Programme Manager - Science & Research, Wellcome Trust "The balance between data and lived experience equip the reader with the vital understanding of the depth of institutionalised inequality... This is recommended reading for anyone working in higher education who truly wants to create a fairer culture of women." - Talat Yaqoob Director, Equate Scotland "I really enjoyed reading the recipes - they combine humour with practical advice on how to tackle important gender issues." - Fiona Watt Vice-Dean Research and Impact, Faculty of Life Science and Medicine, King's College London

General Intellectuals

Twenty-Five Thinkers for the Twenty-First Century

[Verso Books](#) A guide to the thinkers and the ideas that will shape the future What happened to the public intellectuals that used to challenge and inform us? Who is the Sartre or De Beauvoir of the internet age? *General Intellectuals* argues that we no longer have such singular figures, but we do have general intellectuals whose writing could, if read together, explain our times. Covering topics such as culture, politics, work, technology, and the Anthropocene, each chapter is a concise account of an individual thinker, providing useful context and connections to the work of the others. McKenzie Wark's distinctive readings are appreciations, but are also critical of how neoliberal universities militate against cooperative intellectual work to understand and change the world. The thinkers included are Amy Wendling, Kojin Karatani, Paolo Virno, Yann Moulier Boutang, Maurizio Lazzarato, Franco "Bifo" Berardi, Angela McRobbie, Paul Gilroy, Slavoj Žižek, Jodi Dean, Chantal Mouffe, Wendy Brown, Judith Butler, Azuma Hiroki, Paul B. John Zorn

Tradition and Transgression

John Zorn is one of the most prolific and active American composers/performers working today. He has been a fixture of New York's "Downtown Scene" since the mid-70s as a tireless proponent of avant-garde and experimental music. Despite the acclaim and respect he has achieved in America and abroad, very little attention has been paid to Zorn by musicologists or music theorists. Author John Brackett suggests that the reason for the relative paucity of writing on Zorn's music and musical thought has to do with the difficulties and challenges they present both for listeners and scholars. Zorn's musical language—an amalgam of seemingly incongruous techniques, sounds, styles, and genres—creates complex and sometimes confusing listening experiences that are difficult to categorize in terms of overarching thematic or narrative design. Brackett offers a number of perspectives for understanding Zorn's music and musical practices, while challenging certain assumptions that limit the ways in which contemporary music is typically addressed.
