Evidence-based policing offers one such solution - an approach which emphasises the value that research can bring to police officers and, by extension, the public they serve. However, evidence-based policing is not just about the process of understanding and evaluating police practices. It is also about translating and using that knowledge in daily police activities. This unique book examines the scientific evidence for the effectiveness of various police practices and provides tools to help turn research into practice. Part I gives a practitioner's definition of evidence-based policing, a primer on how to judge and interpret research findings, and a review of the Evidence-Based Policing Matrix, a tool for translating research on police crime control interventions. In Part II the authors review the breadth of knowledge about policing interventions for people, places, communities, and technology, focusing on how to optimize operations based on this information. Tools and ideas that can assist in implementing evidence-based practices into patrol, investigations, supervision, management, crime analysis, and leadership are provided in Part III. Finally, in Part IV the authors speak to researchers about how they might continue to work with police agencies to advance evidence-based policing. **GRE Power Vocab** Princeton Review THE PRINCETON REVIEW GETS RESULTS! Data sheets. Applications information. Terms, definitions and testing procedures. Standard mounting hardware for power semiconductors. **Color Measurement Theme and Variations** Springer Reviews and use of the first edition as the textbook for a senior-division university course indicated the need for a number of corrections and clarifications. Although no new topics have been introduced, the new edition should be more clear and useful. A novelty in the Notes and Sources Appendix should facilitate reference from the notes back to the text. For that purpose, the page number of the text to which each note refers is indicated in square brackets following the serial number of the note. The FMC1 color-difference formula has been substituted everywhere for the Friele-MacAdam formula, including the reference to the sources in Note 52. The FMC1 formula was actually used in the investigations reviewed in Sects. 8.3 and 8.4. The Friele-MacAdam formula given on page 151 of the first edition, which I thought was equivalent to the FMC1, was erroneous and should not be used. The formulas for the geodesic chromaticity diagram, on p. 153 of the first edition, were based on observations by 14 normal observers (last reference in Note 51). They have been replaced by the formulas based on the observations of PON, for consistency with all other formulas and discussions in the book. Figure 8.29 in the first edition was based on the PON data and on the formulas printed below it in the new edition. Therefore, Fig. 8.29 is unchanged. **USMLE Step 1 NBME Top Concepts (2021)** Looking for a high-yield resource which covers the Top NBME & USMLE Step 1 concepts in an integrated fashion? Making Sergeant The Biggest Leap in Law Enforcement Charles C Thomas Publisher Whether you are just pondering if you should go for the gold or are already radar-locked on getting there, this book, MAKING SERGEANT, is for you. Written by a veteran police chief with over 50 years of law enforcement experience, 15 of them spent as a sergeant, it contains practical advice for (1) deciding on whether you are ready for the job and (2) getting it and succeeding at it if you are. Short on theory and long on pragmatic advice, the text also will help the already-promoted supervisor successfully meet the challenges of this complex but vital position. As most law enforcement agency CEOs will acknowledge, first-line supervisor or sergeant is often the single most important position in the police organization. Without the best efforts of the highly competent man or woman wearing the stripes, the organization is destined to flounder in relative ineffectiveness. In the worst-case scenario, the agency may fail. In other words, the sergeant has got to get it right. This book will help you decide if you want to be that sergeant. If you do, it will help you be him or her. If, at least at this stage of your career, you decide that the answer is no, that's fine, too. There is not a law enforcement agency anywhere that has enough talented first-line officers. Your goals may change later. But if you choose to go for it, the tips contained in this book will help you get there. If you are already a supervisor, MAKING SERGEANT will help you get better at what you are already doing.

The ensemble is orchestrated around the idea of solar noon, a notion derived from Surrealist texts by Caillois, Césaire, and others that probe the transcultural mythology of noon--a time when shadows vanish and delirious visions momentarily reign. The works include light projections, guano, ship engines, live vocal performance, and coal. Using the Menil's Surrealist holdings as a point of departure, Specters of Noon is infused throughout with a Caribbean perspective that addresses the instability of environmental and colonial politics; one work is a power transformer damaged in Hurricane Maria that is half-sheathed in bronze. Filled with stunning installation photography and insightful texts both commissioned and reprinted, this volume captures the spirit of Jennifer Allora (b. 1974) and Guillermo Calzadilla's (b. 1971) deeply researched and multifaceted work. **Guide to Asphalt Compaction** The Cat Paving Products Guide to Asphalt Compaction is an information-packed, easy-to-read resource that is supported by more than 180 color photos and illustrative graphic elements. **Jade's Secret Ingredients A Recipe for Managing Feelings** Jj Carson Press, LLC Jade is a little kid that sometimes has BIG feelings.
