CAPE ACCOUNTING 2

MODEL ANSWERS 2012 - 2019 PAPER 2

This textbook is to help students taking the Caribbean Advance Proficiency Examination (CAPE) in Accounting Unit 2 Cost and Management Accounting. Students can enhance their problem solving, computational and accounting skill by using the model answers to past examination questions. The book presents a preview of the type of response you will have to give to the questions in the actual examinations. The book provides suggested solutions to students for past examination papers. The author has served as a CAPE Examining Assistant for the past 15 years and is very acquainted with the style of questions and the solutions required. My approach to preparing the answers has been both of an examiner and teacher. I am fully aware of the frustrations many candidates face in formatting and presenting their responses of this particular unit and have sought to address this problem. You can use the layouts suggested. The book provides suggested responses to question papers for the years 2012 - 2019. These are the years covered by the present syllabus. The solutions are clearly laid out according to each year and each module. Students can obtain the relevant examination papers from the Caribbean Examinations Council and work them through by modules and compare their response with the one given here. The book will also be useful to teachers in preparing their students for taking this exam.

CAPE ACCOUNTING UNIT 2

450 MULTIPLE CHOICE QUESTIONS BY TOPIC

This book is primarily intended for anyone taking the Caribbean Advance Proficiency Examinations in Accounting Unit 2, Paper 1. It will also be useful for those who are studying for other Multiple Choice Examinations in Cost and Management Accounting at an Intermediate Level. The book contains over 450 questions arranged into eleven chapters, each covering a different section and topic of the Syllabus. The questions are structured to increase your understanding and give you an opportunity to apply the accounting concepts you have learnt. It will also provide valuable familiarity with the type of questions you are likely to encounter in the examination. The book is meant to be used along with a textbook. I recommend the use of the CAPE Accounting Unit Two, Study Guide, since the chapter headings are similar to the topical headings in this book. The book will also be useful for revision.

UNDERSTANDING VIOLENCE AGAINST WOMEN IN AFRICA

AN INTERDISCIPLINARY APPROACH

Springer Nature This textbook provides students across Social Sciences, Humanities, Politics, and International Studies with an in-depth understanding of the issues, policies, and strategies for addressing the symptoms and root causes of violence against women (VAW) in sub-Saharan Africa. This text uses the United Nations Security Councils Resolution 1325 (UNSCR 1325) on Women, Peace and Security in Eastern and Southern Africa as a framework to present the causes and impacts of VAW and to trace the journey of sub-Saharan African countries toward gender equality. It also provides an overview of the policy and legislative frameworks that underpin the progress, challenges, and achievements of addressing VAW based on four key pillars: prevention, protection, participation, and relief and recovery. Chapters provide a wealth of knowledge, as the book draws on academic literature; national, regional, and international legislations; and data collected from field research, and makes use of end-of-chapter discussion questions and quick study guides. Students will come away equipped with the tools, resources, and knowledge necessary to address and fix VAW in sub-Saharan Africa and beyond. Francis Onditi heads the School of International Relations and Diplomacy in Riara University, Kenya and was recently enlisted as a Distinguished Author and Professor of Research at the Institute of Intelligent Systems, University of Johannesburg, South Africa. He is the 2019 recipient of

are explored against the backdrop of the experiences of other developing countries and their journeys of industrialisation. The relevant black empowerment experiences of countries such as the United States are also discussed. The authors identify policy and programmatic interventions to forge the non-racial future that the constitution enjoins South Africans to build.

YOUTH IN SOUTH AFRICA

(IN)VISIBILITY AND NATIONAL DEVELOPMENT

African Books Collective South Africa is characterised by a youthful population, and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice. *Youth in South Africa: Agency, (in)visibility and national development* takes stock of the nation's development as it affects young people. Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood. These include formal and informal engagements with politics, as well as protest, (un)employment, entrepreneurship, education, religion, experiences with sexuality and violence and a multitude of other life experiences. Contributors paint a picture of the initiative, agency and resilience of the youth, as well as the challenges before them. Authors also identify the state of "waithood" faced by those unable to make the transition out of youth into full adulthood as a result of their socio-economic circumstances and political context. By engaging these experiences and insights, and primarily informed by the inputs of young people, the authors highlight the limitations of existing youth policies and frameworks. The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment, and by the messages the youth communicate about the limitations of current approaches.

OLD BREED GENERAL

HOW MARINE CORPS GENERAL WILLIAM H. RUPERTUS BROKE THE BACK OF THE JAPANESE IN WORLD WAR II FROM GUADALCANAL TO PELELIU

Rowman & Littlefield Marine general William H. Rupertus is best known today for writing the Corps' Rifleman's Creed, which begins, "This is my rifle. There are many like it, but this one is mine"—which has been made famous by films such as *Full Metal Jacket* and *Jarhead*. Rupertus was one of the outstanding Marines of the twentieth century, standing alongside men such as Smedley Butler, Chesty Puller, and Arthur Vandegrift, but he died in 1945, so his story has never been told. Rupertus "made his bones" in the USMC's "savage wars of peace" before World War II: Haiti for three years after World War I, China in 1929 (where he lost his wife and children to the scarlet fever epidemic) and again in 1937 (where he witnessed the beginning of Japan's war against China that turned into the Pacific War of World War II). In World War II, Rupertus commanded during four important battles: Tulagi and Henderson Field during the Guadalcanal campaign; the Battle of Cape Gloucester; and Peleliu. It was a series of blistering battles—and ultimately victories—that helped break the back of the Japanese and pave the way for American victory. In the course of these battles, Rupertus became the Patton of the Pacific—ruthless in war, always on the attack, merciless against the enemy, undefeated in battles—even as he proved himself very much like Eisenhower, suavely diplomatic and able to balance war with politics. These skills allowed Rupertus to crush the enemy in the malaria-infested jungles of the Pacific and personally escort Eleanor Roosevelt on her tour of the Pacific. *Old Breed General* is the biography of Rupertus and the story of the Marines at war in the Pacific. This is an American story of love, loss, shock, horror, tragedy, and triumph that focuses on Rupertus and the 1st Marine Division in World War II, but which resonates through the 1st, to Chosin in Korea and James Mattis's command in Iraq.

TOWARDS EMPLOYMENT-INTENSIVE GROWTH IN SOUTH AFRICA

Juta and Company (Pty) Ltd South Africa's high rate of unemployment (26.4%) makes it a complete outlier compared with other middle-income countries. Indeed, the unemployment rate rises to 36% if discouraged workers are taken into account. It underpins extreme poverty and inequality and is a major contributor to social dislocation. If it were not for increased social payments, poverty would have continued to increase since the advent of democracy in 1994. Unemployment also represents a huge cost to growth. This book focuses on the growth path of the economy. The starting point is that while more rapid economic expansion is an important objective, at any given level of growth, the economy as a whole needs to become more labour-absorbing. The central question posed is how to bring about changes in the economic structure and pattern of development, which would lead to the attainment of this objective. The authors argue that employment needs to be much more centrally positioned within the economic and social policy arena. They emphasise innovative approaches within a broader focus on the growth path, and employment-intensive growth. And they posit that the negative impact of previous 'distortions' requires much more than a levelling of the playing field via market-based reforms. Apart from presenting an alternative growth path which could start to shift the economy in new directions, the book tackles themes which have received only limited attention, such as wage subsidies, youth unemployment and employment growth in rural areas.

ENCYCLOPEDIA OF LAW ENFORCEMENT

SAGE This three-volume Encyclopedia of Law Enforcement provides a comprehensive, critical, and descriptive examination of all facets of law enforcement on the state and local, federal and national, and international stages. This work is a unique reference source that provides readers with informed discussions on the practice and theory of policing in an historical and contemporary framework. The volumes treat subjects that are particular to the area of state and local, federal and national, and international policing. Many of the themes and issues of policing cut across disciplinary borders, however, and several entries provide comparative information that places the subject in context.

IN THE BALANCE

THE CASE FOR A UNIVERSAL BASIC INCOME IN SOUTH AFRICA AND BEYOND

NYU Press Examines the need and prospects for a UBI As jobs disappear and wages flat-line, paid work is an increasingly fragile and unattainable basis for dignified life. This predicament, deepened by the COVID-19 pandemic, is sparking urgent debates about alternatives such as a universal basic income (UBI). Highly topical and distinctive in its approach, In the Balance: The Case for a Universal Basic Income in South Africa and Beyond is the most rounded and up-to-date examination yet of the need and prospects for a UBI in a global South setting such as South Africa. Hein Marais casts the debate about a UBI in the wider context of the dispossessing pressures of capitalism and the onrushing turmoil of global warming, pandemics and social upheaval. Marais surveys the meaning, history and appeal of a UBI before even-handedly weighing the case for and against such an intervention. The book explores the vexing questions a UBI raises about the relationship of paid work to social rights, about prevailing notions of entitlement and dependency, and the role of the state in contemporary capitalism. Along with cost estimates for different versions of a basic income in South Africa, it discusses financing options and lays out the social, economic and political implications. This incisive new book advances both our theoretical and practical understanding of the prospects for a UBI.

TRADITIONAL LEADERS IN A DEMOCRACY

RESOURCES, RESPECT AND RESISTANCE

African Books Collective Post-1994, South Africa's traditional leaders have fought for recognition, and positioned themselves as major players in the South African political landscape. Yet their role in a democracy is contested, with leaders often accused of abusing power, disregarding human rights, expropriating resources and promoting tribalism. Some argue that democracy and traditional leadership are irredeemably opposed and cannot co-exist. Meanwhile, shifts in the political economy of the former bantustans - the introduction of platinum mining in particular - have attracted new interests and conflicts to these areas, with chiefs often designated as custodians of community interests. This edited volume explores how chieftancy is practised, experienced and contested in contemporary South Africa. It includes case studies of how those living under the authority of chiefs, in a modern democracy, negotiate or resist this authority in their respective areas. Chapters in this book are organised around three major sites of contest:

leadership, land and law.

AGING AND HEALTH IN AFRICA

Springer Science & Business Media Population aging is a matter of global concern. It often occurs in tandem with changes in the health profile of the population. In Africa, many countries are already facing a high burden of communicable diseases. However, as more and more children survive childhood and move on to adult years and old age they are also more likely to experience health problems associated with the aging process. Population aging in Africa is occurring in the context of high levels of poverty, changing family structures, an immense disease burden, fragile health systems and weak or poorly managed government institutions. This book shows that aging is likely to lead to increased social and economic demands for the continent. However, most national governments in Africa have not begun to address the issue of how to respond effectively to the needs of the older population. This will require a better understanding of the socio-economic and demographic situation of the older population in Africa. This book fills the gaps that exist by exploring the social realities of population aging in Africa. It also focuses on the policy and programmatic responses, gaps and future challenges related to aging across the continent.

CAPE MANAGEMENT OF BUSINESS

A range of resources for CAPE has been specially developed to meet the requirements of the CAPE syllabus. This new textbook has been developed to match the requirements of the CAPE Management of Business syllabus. Full coverage of the CAPE syllabus is provided and the content has a clear focus on the Caribbean economic and business environment. A distinctive feature is the provision of examination-type questions at the end of each major section. The questions come with a suggested time limits for answering, giving useful practice in how to allocate time for the final examination. Management of Business for CAPE includes case studies from a variety of countries and industries, as well as an internal assessment component.

AGRICULTURE AND RESILIENCE IN AUSTRALIA'S NORTH

A LIVED EXPERIENCE

Springer This book examines the mechanisms and strategies farmers in North Australia adopt to manage the setbacks and challenges they face. This social research is based on farmers' experiences, but also draws on the author's own experience after his tropical fruit farm was destroyed by two Category 5 cyclones in five years. Through historical analysis, the book compares historic and contemporary aspirations for northern development, and discusses the influence of the built environment on individuals as well as access to health and other social services. Exploring the implications of individual resilience strategies for policy development within the broader context of northern

development and evolving environmental governance, the book also highlights the fact that this is occurring in a new geological epoch - the Anthropocene. The book will provide a unique perspective and understanding to government, individuals and industries interested in northern Australia and its relationship to the world

CAPITAL PENETRATION AND THE PEASANTRY IN SOUTHERN AND EASTERN AFRICA

NEOLIBERAL RESTRUCTURING

Springer Nature This book examines the impact of neoliberalism on peasant agriculture as a key livelihood strategy in Southern and Eastern Africa, against the background of the current development crisis and the crossroads that Southern and Eastern Africa faces. It systematically analyses how the neoliberal architecture has deepened extroverted production for capitalist accumulation and how this has been to the detriment of the rural labour force and small scale and communal landowners. Apart from examining how neoliberalism has triggered land alienations, the book further argues that such policies have also impacted negatively on food security in a number of ways. The book presents empirical evidence through twelve case studies, emerging from in-depth original fieldwork carried out in seven countries in the Southern and Eastern African region. This book is a must-read for scholars of economics, sociology, anthropology, history, agrarian studies and political science, as well as practitioners and policy-makers, interested in a better understanding of the impact of the agrarian neoliberal restructuring on the peasantry in Southern Africa.

THE OXFORD HANDBOOK OF AFRICA AND ECONOMICS

VOLUME 2: POLICIES AND PRACTICES

Oxford University Press A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved. These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments. While intellectually charming and often elegantly formulated, that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological, and the policy prescriptions derived from it are fatally teleological: low-income countries are by definition those where such ingredients are missing. None of today's high-income countries started its growth process with the "required" and complete list of growth ingredients. Unless one truly believes that the continent of Africa-and most developing countries-are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism, the conventional view must be re-examined, debated, and questioned. This volume-the second of the IOxford Handbook of Africa and Economics-reassesses the economic policies and practices observed across the continent since independence. It offers a collection of analyses by some of the leading economists and development thinkers of our time, and reflects a wide range of perspectives and viewpoints. Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book.

SYSTEMS ANALYSIS APPROACH FOR COMPLEX GLOBAL CHALLENGES

Springer This book, which contains a collection of review articles as well as focus on evidence-based policy making, will serve as a valuable resource not just for all postgraduate students conducting research using systems analysis thinking but also for policy makers. To our knowledge, a book of this nature which also has a strong African focus is currently not available. The book examines environmental and socio-economic risks with the aim of providing an analytical foundation for the management and governance of natural resources, disasters, addressing climate change, and easing the technological and ecological transitions to sustainability. It provides scientific and strategic analysis to better understand the dynamics of future energy transitions, their main driving forces, enabling factors, barriers, as well as their consequences for the social, economic and environmental dimensions of human wellbeing. Science-based policy advice is achieved through an integrated assessment and modeling of how to simultaneously address the major energy policy challenges in the areas of environment (climate change and air pollution), energy poverty (or access to affordable and clean energy for the poor), energy security and reliability. It also aims to improve our understanding of ecosystems and their management in today's changing world—in particular, the current state of ecosystems, and their ecological thresholds and buffering capacities. It provides support for policy makers in developing rational, realistic

and science-based regional, national and global strategies for the production of fuel, food and fibre that sustain ecosystem services and safeguard food security. Finally, it addresses the human development dimension of global change based on comprehensive studies on the changing size and composition of human populations around the world by analyzing both their impacts and the differential vulnerabilities by age, gender and level of education.

AFRICA ENVIRONMENT OUTLOOK 2

OUR ENVIRONMENT, OUR WEALTH

UNEP/Earthprint This is the second comprehensive report on the state of Africa's environment, produced in collaboration with the African Ministerial Conference on the Environment (AMCEN). This report highlights the central position Africa's environment continues to play in sustainable development, as well as its potential to achieve progress in the implementation of the Millennium Development Goals. The report profiles Africa's environmental resources as an asset for the continent's development. It highlights the opportunities presented by the region's natural resource base to support the continent's development. It also underscores the concept of sustainable livelihoods, and the importance of the environmental initiatives in supporting them.

POLICY, POLITICS AND POVERTY IN SOUTH AFRICA

Springer Seekings and Nattrass explain why poverty persisted in South Africa after the transition to democracy in 1994. The book examines how public policies both mitigated and reproduced poverty, and explains how and why these policies were adopted. The analysis offers lessons for the study of poverty elsewhere in the world.

THE INFORMAL ECONOMY REVISITED

EXAMINING THE PAST, ENVISIONING THE FUTURE

Routledge This landmark volume brings together leading scholars in the field to investigate recent conceptual shifts, research findings and policy debates on the informal economy as well as future challenges and directions for research and policy. Well over half of the global workforce and the vast majority of the workforce in developing countries work in the informal economy, and in countries around the world new forms of informal employment are emerging. Yet the informal workforce is not well understood, remains undervalued and is widely stigmatised. Contributors to the volume bridge a range of disciplinary perspectives including anthropology, development economics, law, political science, social policy, sociology, statistics, urban planning and design. The Informal Economy Revisited also focuses on specific groups of informal workers, including home-based workers, street vendors and waste pickers, to provide a grounded insight into disciplinary debates. Ultimately, the book calls for a paradigm shift in how the informal economy is perceived to reflect the realities of informal work in the Global South, as well as the informal practices of the state and capital, not just labour. The Informal Economy Revisited is the culmination of 20 years of pioneering work by WIEGO (Women in Informal Employment: Globalizing and Organizing), a global network of researchers, development practitioners and organisations of informal workers in 90 countries. Researchers, practitioners, policy-makers and advocates will all find this book an invaluable guide to the significance and complexities of the informal economy, and its role in today's globalised economy.
