HOW TO WRITE A GOOD SCIENTIFIC PAPER

PM286

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

DESIGNING FOR INCLUSION

INCLUSIVE DESIGN: LOOKING TOWARDS THE FUTURE

[Springer Nature](#) This proceedings book presents papers from the 10th Cambridge Workshops on Universal Access and Assistive Technology. The CWUAAT series of workshops have celebrated a long history of interdisciplinarity, including design disciplines, computer scientists, engineers, architects, ergonomists, ethnographers, ethicists, policymakers, practitioners, and user communities. This reflects the wider increasing realisation over the long duration of the series that design for inclusion is not limited to technology, engineering disciplines, and computer science but instead requires an interdisciplinary approach. The key to this is providing a platform upon which the different disciplines can engage and see each other's antecedents, methods, and point of view. This proceedings book of the 10th CWUAAT conference presents papers in a variety of topics including Reconciling usability, accessibility, and inclusive design; Designing inclusive assistive and rehabilitation systems; Designing cognitive interaction with emerging technologies; Designing inclusive architecture; Data mining and visualising inclusion; Legislation, standards, and policy in inclusive design; Situational inclusive interfaces; and The historical perspective: 20 years of CWUAAT. CWUAAT has always aimed to be inclusive in the fields that it invites to the workshop. We must include social science, psychology, anthropology, economics, politics, governance, and business. This requirement is now energised by imminent new challenges arising from techno-social change. In particular, artificial intelligence, wireless technologies, and the Internet of Things generate a pressing need for more socially integrated projects with operational consequences on individuals in the built environment and at all levels of design and society. Business cases and urgent environmental issues such as sustainability and transportation should now be a focus point for inclusion in an increasingly challenging world. This proceedings book continues the goal of designing for inclusion, as set out by the CWUAAT when it first started.

The broad range of techniques covered by the book will be invaluable to readers from professions allied to (but not exclusive to) microbiology analysts and researchers, laboratory technicians, (medical) microbiologists, molecular biologists, analytical phys.

ADVANCES IN INFORMATION RETRIEVAL

36TH EUROPEAN CONFERENCE ON IR RESEARCH, ECIR 2014, AMSTERDAM, THE NETHERLANDS, APRIL 13-16, 2014, PROCEEDINGS

[Springer](#) This book constitutes the proceedings of the 36th European Conference on IR Research, ECIR 2014, held in Amsterdam, The Netherlands, in April 2014. The 33 full papers, 50 poster papers and 15 demonstrations presented in this volume were carefully reviewed and selected from 288 submissions. The papers are organized in the following topical sections: evaluation, recommendation, optimization, semantics, aggregation, queries, mining social media, digital libraries, efficiency, and information retrieval theory. Also included are 3 tutorial and 4 workshop presentations.

A SYSTEMS APPROACH TO CYBER SECURITY

PROCEEDINGS OF THE 2ND SINGAPORE CYBER-SECURITY R&D CONFERENCE (SG-CRC 2017)

[IOS Press](#) With our ever-increasing reliance on computer technology in every field of modern life, the need for continuously evolving and improving cyber security remains a constant imperative. This book presents the 3 keynote speeches and 10 papers delivered at the 2nd Singapore Cyber Security R&D Conference (SG-CRC 2017), held in Singapore, on 21-22 February 2017. SG-CRC 2017 focuses on the latest research into the techniques and methodologies of cyber security. The goal is to construct systems which are resistant to cyber-attack, enabling the construction of safe execution environments and improving the security of both hardware and software by means of mathematical tools and engineering approaches for the design, verification and monitoring of cyber-physical systems. Covering subjects which range from messaging in the public cloud and the use of scholarly digital libraries as a platform for malware distribution, to low-dimensional bigram analysis for mobile data fragment classification, this book will be of interest to all those whose business it

is to improve cyber security.

HANDBOOK OF RESEARCH ON DIGITAL-BASED ASSESSMENT AND INNOVATIVE PRACTICES IN EDUCATION

IGI Global Even though digital technologies are ubiquitous in education, assessment methods continue to employ traditional assessments even though they are inadequate to provide information about a student's reasoning and conceptual understanding. Digital-based assessment models allow students to demonstrate higher-order skills while integrating digital technologies as a powerful teaching tool. Digital technologies can support inquiry-based learning that is essential to developing a deep conceptual understanding of the content. The Handbook of Research on Digital-Based Assessment and Innovative Practices in Education identifies digital tools and applications for effective assessment of learning, shares various models of digital-based assessment in education, and considers best pedagogical practices for assessment in education. Covering a range of topics such as formative assessments, design thinking, virtual reality, and equity, this major reference work is crucial for educational technologists, instructional designers, policymakers, administrators, faculty, researchers, academicians, scholars, practitioners, instructors, and students.

THE IMPACT OF ECONVEYANCING ON TITLE REGISTRATION

A RISK ASSESSMENT

Springer This work is an assessment of how to manage risk in property transactions in the context of the move from paper-based to electronic conveyancing (eConveyancing). In particular the focus is on risks that impact on title registration, and the security, protection or lack thereof that this registration offers to land owners, third parties and property claimants. The impact is the extent to which a change in the transactional process may unintentionally affect risk (being the consequence of change and the likelihood of that consequence having a negative effect). The risks are identified, analysed and evaluated against the backdrop of title registration and the development of eConveyancing through a comparative analysis of the systems in Ireland and Ontario, while also referencing other developing electronic systems around the globe.

Springer This book constitutes the workshop proceedings of the 22nd International Conference on Database Systems for Advanced Applications, DASFAA 2017, held in Suzhou, China, in March 2017. The 32 full papers and 5 short papers presented were carefully selected and reviewed from 43 submissions to the four following workshops: the 4th International Workshop on Big Data Management and Service, BDMS 2017; the Second International Workshop on Big Data Quality Management, BDQM 2017; the 4th International Workshop on Semantic Computing and Personalization, SeCoP 2017; and the First International Workshop on Data Management and Mining on MOOCs, DMMOOC 2017.

TEACHING AND RESEARCH IN MATHEMATICS

A GUIDE WITH APPLICATIONS TO INDUSTRY

CRC Press This insightful Guide is meant to serve any and all interested in pursuing a career in mathematics education and research. The author's goal and the book's theme is to help students and others make a smooth transition to teachers and researchers of mathematics. Part I presents helpful techniques on teaching and conducting research. This innovative book also offers strategies on how to observe from and develop research methods, carry out research, and begin writing research papers. It includes an introduction to LaTeX, the most widely used mathematics typesetting and rendering computer program. Part II introduces some modern research in mathematics in various industries. The aim is to expose the reader to modern applications and help him/her become acquainted with research papers and how to read and understand them. Authored by a young teacher and researcher, also beginning her career, this book is written by and for young mathematicians. Most graduate students as she experienced, are not given a proper transitory introduction to research and are not taught the "how" in teaching, attending conferences and collaborating. The book is based on the author's own observations and on techniques she has found effective. Mathematics graduate students and those in related fields will find assistance to help them reflect on and advance their career pursuits. Advisors and mentors might also find useful suggestions here.

THE COMPLEAT ACADEMIC

A CAREER GUIDE

Amer Psychological Assn A new career in academia can be a challenge. While academia's formal rules are published in faculty handbooks, its implicit rules are often difficult to discern. Like its first edition, this expanded volume contains practical advice to help new academics set the best course for a lasting and vibrant career. problems beginning social scientists will face. Leading academics share the lessons they have learned through their own hard experience. Individual chapters present the ins and outs of the hiring process; the advantages of a post-doctoral fellowship; expert strategies for managing a teaching load; insider and applicant advice for winning a research grant; detailed instructions for writing and publishing a journal article; and an explanation of intellectual property issues. The text also addresses the latter stages of a career. It offers suggestions for keeping one's career dynamic. Chapters that provide specific information for minorities, women and clinical psychologists are also included, and the volume even presents options for working outside of academia.

PROCEEDINGS OF THE INTERNATIONAL NEWSPAPER CONFERENCE, SINGAPORE, APRIL 1-3 2008, AND PAPERS FROM THE IFLA WORLD LIBRARY AND INFORMATION CONGRESS, QUÉBEC, CANADA, AUGUST, 2008

[Walter de Gruyter](#) The papers brought together in this highly actual book are grouped around three themes. Not only the physical and digital preservation of newspapers are treated, but also the service and access models that are currently under development; examples are provided, with a focus on Southeast Asia. Moreover the dynamism of online newspapers is discussed. This volume contains cutting-edge information which is indispensable for the modern newspaper librarian. Also researchers, educators and journalists may benefit from the introduction to current aspects of the important medium.

ANALYSIS OF POVERTY DATA BY SMALL AREA ESTIMATION

[John Wiley & Sons](#) A comprehensive guide to implementing SAE methods for poverty studies and poverty mapping There is an increasingly urgent demand for poverty and living conditions data, in relation to local areas and/or subpopulations. Policy makers and stakeholders need indicators and maps of poverty and living conditions in order to formulate and implement policies, (re)distribute resources, and measure the effect of local policy actions. Small Area Estimation (SAE) plays a crucial role in producing statistically sound estimates for poverty mapping. This book offers a comprehensive source of information regarding the use of SAE methods adapted to these distinctive features of poverty data derived from surveys and administrative archives. The book covers the definition of poverty indicators, data collection and integration methods, the impact of sampling design, weighting and variance estimation, the issue of SAE modelling and robustness, the spatio-temporal modelling of poverty, and the SAE of the distribution function of income and inequalities. Examples of data analyses and applications are provided, and the book is supported by a website describing scripts written in SAS or R software, which accompany the majority of the presented methods. Key features: Presents a comprehensive review of SAE methods for poverty mapping Demonstrates the applications of SAE methods using real-life case studies Offers guidance on the use of routines and choice of websites from which to download them Analysis of Poverty Data by Small Area Estimation offers an introduction to advanced techniques from both a practical and a methodological perspective, and will prove an invaluable resource for researchers actively engaged in organizing, managing and conducting studies on poverty.

INTELLIGIBLE BEAUTY

RECENT RESEARCH ON BYZANTINE JEWELLERY

[British Museum Research Publications](#) The field of Byzantine jewellery (4th-15th centuries) is a rapidly expanding one and a large amount of important research has been conducted within the last ten years, both by scholars on the continent and in America. The intention of the conference, and subsequently the volume, is to draw together the many strands involved in this research and to publish them in accessible form. This volume represents a rare opportunity to make this crucial work available to a much wider specialist and non-specialist audience in Britain (and beyond). In particular the topics to be addressed by foreign speakers are either not well-known in Britain or are published in largely inaccessible journals. Chris Entwistle has been the curator of the Late Roman and Byzantine Collections at the British Museum since 1985. Dr Noël Adams is an independent scholar who has published widely on the metalwork and jewellery of the Early Middle Ages.

A MANUAL FOR WRITERS OF RESEARCH PAPERS, THESES, AND DISSERTATIONS, EIGHTH EDITION

CHICAGO STYLE FOR STUDENTS AND RESEARCHERS

[University of Chicago Press](#) A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

INTERNATIONAL EDUCATION AND FOREIGN LANGUAGES

KEYS TO SECURING AMERICA'S FUTURE

National Academies Press International Education and Foreign Languages reviews the Department of Education's Title VI and Fulbright-Hays Programs, which provide higher education funding for international education and foreign language programs. This book offers a timely look at issues that are increasingly important in an interconnected world. It discusses the effect of the nation's lack of expertise in foreign languages and cultural knowledge on national security and global competitiveness and it describes the challenges faced by the U.S. educational system and the federal government in trying to address those needs. The book also examines the federal government's recent proposal to create a new National Security Language Initiative, the role of the Department of Education, and current efforts to hold higher education programs accountable. This book provides information and recommendations that can help universities, educators, and policy makers establish a system of foreign language and international education that is ready to respond to new and unanticipated challenges around the world.

HOW THREE ORDINARY AMERICANS UNCOVERED WALL STREET'S GREAT FORECLOSURE FRAUD

The New Press NOW IN PAPERBACK The "gripping" (New York Times) and "Hitchcockian"(Publishers Weekly) story of how a nurse, a car dealership worker, and a forensic expert took on the nation's largest banks A Kirkus Reviews and The Week best book of the year, David Dayen's Chain of Title is a riveting work that recalls A Civil Action, Erin Brockovich, and Flash Boys, recounting how three ordinary Floridians—a car dealership worker, a cancer nurse, and an insurance fraud specialist—helped uncover the largest consumer crime in American history, challenged the most powerful institutions in America, and—for a brief moment—brought the corrupt financial industry to its knees. Lisa Epstein, Michael Redman, and Lynn Szymoniak did not work in government or law enforcement. They had no history of anticorporate activism. Instead they were all foreclosure victims, and while struggling with their shame and isolation they committed a revolutionary act: closely reading their mortgage documents, discovering the deceit behind them, and building a movement to expose it. Harnessing the power of the Internet, they revealed how the financial crisis and subsequent recession were fundamentally based upon a series of frauds that kicked millions out of their homes because of false evidence by mortgage companies that had no legal right to foreclose. As Rolling Stone's Matt Taibbi noted: "Chain of Title is a sweeping work of investigative journalism that traces the arc of a criminally underreported story in America, the collapse of the rule of law in the home mortgage industry."

COMPARATIVE PERSPECTIVES ON COMMUNAL LANDS AND INDIVIDUAL OWNERSHIP

SUSTAINABLE FUTURES

Routledge Comparative Perspectives on Communal Lands and Individual Ownership: Sustainable Futures addresses property and land title as central mechanisms governing access to communally-held land and resources. The collection assesses the effectiveness of property law and tenure models developed around concepts of individual ownership, for achieving long-term environmental and economic sustainability for indigenous peoples and local communities. It explores the momentum for change in the international realm, and then develops a comparative focus across Australia, North America, Africa, Peru, New Zealand and the Pacific region, examining the historical and current impacts of individuation of title on the customary law and practice of indigenous peoples and local communities. Themes of property, privatisation and sustainable communities are developed in theoretical analyses and case studies from these jurisdictions. The case studies throw into sharp relief how questions of land law and resources management should not be separated from wider issues about the long-term viability of communities. Comparative analysis allows consideration of how western models of land tenure and land title might better accommodate the exercise of traditional practices of indigenous peoples and local communities, while still promoting autonomy, choice and economic development. This volume will be of interest to scholars and professionals working in the fields of property law, land reform, policy and planning, indigenous law and customary law, environmental sustainability, development and resource management.
