Writing Achievement of California Eighth Graders, Year Two (1987-88 Annual Report)

The second statewide direct writing assessment was conducted for grade eight by the California Assessment Program (CAP) in the spring of 1988. Each student wrote an essay in response to 1 of 45 prompts (writing tasks) representing 6 types of writing: autobiographical incident, report of information, problem solution, evaluation, story, and firsthand biography. A total of 294,859 essays were scored at 6 regional scoring sites by 384 teachers; this number includes a 5% sample of papers that was double-scored for reliability studies. Approximately 96% of the students who took the essay test comprehended the writing tasks and responded to the topic. Scores were assigned for rhetorical effectiveness, special features (such as coherence or elaboration), and conventions. Results revealed that most students wrote adequate or marginally adequate essays (62%), some wrote exceptionally well (12%), and others wrote poorly (22%). Eighth graders were most competent at reporting information, less competent at writing autobiography and firsthand biography, and least able to write a story and to produce the two kinds of persuasive writing. Also, students exhibited better control of conventions than of rhetorical strategies. Overall, students' scores increased. Recommendations for school administrators, teachers, and parents are included. (KEH)

The Advocate

The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press **Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.**

Working Mother

The magazine that helps career moms balance their personal and professional lives.

Building Communities of Engaged Readers

Reading for pleasure

Routledge **Reading for pleasure** urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. **Building Communities of Engaged Readers** highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

New Scientist

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society

and culture.

Introduction to Information Retrieval

Cambridge University Press **Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.**
