Sultan Chand & Sons Knowledge updating is a never-ending process and so should be the revision of an effective textbook. The book originally written fifty years ago has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the twelfth, thoroughly revised and enlarged, Golden Jubilee edition of the book. The subject-matter in the entire book has been re-written in the light of numerous criticisms and suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities. Backable

The surprising truth behind what makes people take a chance on you

Hachette UK A groundbreaking book that boldly claims the key to success in business is not talent, connections, or ideas, but the ability to persuade people to take a chance on potential. 'The most successful people aren't just brilliant - they're backable' DAN PINK, bestselling author of Drive 'Whether you want to get ahead inside a company or build a startup from the ground up, this fascinating book is a must-read.' REID HOFFMAN, co-founder of LinkedIn No one makes it alone. But there's a reason why some people can get investors or bosses to believe in them while others cannot. And that reason has little to do with experience, pedigree or a polished business plan. Backable people seem to have a hidden quality that inspires others to take action. We often chalk this up to natural talent or charisma . . . either you have 'it' or you don't. After getting rejected by every investor he pitched, Suneel Gupta had a burning question: could 'it' be learned? Drawing lessons from hundreds of the world's biggest

thinkers, Suneel discovered how to pitch new ideas in a way that has raised millions of dollars, influenced large-scale change inside massive corporations, and even convinced his 8-year-old daughter to clean her room. Inside the book are long-held secrets from producers of Oscar-winning films, members of Congress, military leaders, culinary stars, venture capitalists, founders of unicorn-status startups, and executives at iconic companies like Lego, Method and Pixar. Suneel used these invaluable lessons to become the New York Stock Exchange's 'New Face of Innovation'. Backable reveals how the key to success is not charisma, connections, or even your CV, but rather your ability to persuade others to take a chance on you. This groundbreaking book will show you how.

Interrogating Caste

Understanding Hierarchy and Difference in Indian Society

Penguin Books India The caste system has conventionally been perceived by scholars as a hierarchy based on the binary opposition of purity and pollution. Challenging this position, leading sociologist Dipankar Gupta argues that any notion of a fixed hierarchy is arbitrary and valid only from the perspective of the individual castes. The idea of difference, and not hierarchy, determines the tendency of each caste to keep alive its discrete nature and this is also seen to be true of the various castes which occupy the same rank in the hierarchy. It is, in fact, the mechanics of power, both economic and political, that set the ground rules for caste behaviour, which also explains how traditionally opposed caste groups find it possible to align in the contemporary political scenario. With the help of empirical evidence from states like Bihar, Maharashtra and Uttar Pradesh, the author illustrates how any presumed correlations between caste loyalties and voting patterns are in reality quite invalid. Provocative and finely argued, *Interrogating Caste* is a remarkable work that provides fresh insight into caste as a social, political and economic reality.
