PERSONAL LIABILITY OF PUBLIC OFFICIALS IN VIRGINIA'S LOCAL GOVERNMENTS AND ITS IMPACT ON THEIR WILLINGNESS TO SERVE

Wipf and Stock Publishers These are challenging times, and perhaps it is here that humans are viewed at their best and their worst. Everyone is accountable for what they say and do. And since government at all levels and its officials are not exempted, and who operate in a more open environment than they once did, primarily as a result of legislation providing for open meetings, more accessible public information, and under more open and recordable visibility, public officials must be more cautious and more aware of the decisions they make. Although a conscious effort on the part of public officials to avoid personal liability suits will help reduce the number of suits filed against them or the government, some preventive and proactive measures--e.g., becoming more proficient in the duties and responsibilities of office, cultural and social education, sensitivity training--must be taken to avoid the possibility of successful liability lawsuits. Public officials are held morally responsible for their decisions, and they are to be respected for the demands placed on them by virtue of that office. However, individuals, including those injured by a particular governmental policy or an official's decision, are not accepting grievous actions which go against their individual interests. Many are not content with exhausting administrative remedies; rather, they are turning to the courts for a remedy in cases of wrongful death, misuse of legal procedure, etc. A conscious, individual effort to reduce the occurrence liability suits through responsible public decisions will help hold the number of successful suits to a minimum.

FAMILIE ALLWEIN

VOLUME 2: JOURNEYS IN TIME & PLACE -

Xlibris Corporation This is part of a series of books about the history of the Allwein family in America, a family descended from an 18th century German immigrant Johannes (Hans) Jacob Allwein and his wife Catharina. This book builds upon the first volume of this series, Familie Allwein - An Early History, which dealt with the Allwein family's emigration from Germany to America and their settlement in colonial Pennsylvania. This new two-book set represents the second volume of this series, titled Familie Allwein - Journeys in Time and Place, covering Allwein descendants living east of the Allegheny Mountains over the 70-year period from about 1870 through 1940. Part I of this second volume focuses on those families that settled in southeastern Pennsylvania, particularly in Lebanon , Philadelphia and Berks Counties. Part II focuses on those families living in Dauphin, Lancaster, Adams, York and Blair Counties in south central Pennsylvania. Additional future volumes will cover Allwein descendants who moved to western Pennsylvania and those who migrated farther west. Not only is the present volume an update on the families covered in volume 1 of Familie Allwein, it goes beyond the early land, tax and estate records, to include information from marriage and birth records, military records, census records, death records, county atlases and local histories. As in the first volume of this series, the author's careful documentation of all sources and attention to detail make it possible to reproduce his findings and re-examine his conclusions.

SINGAPORE, THE ENERGY ECONOMY

FROM THE FIRST REFINERY TO THE END OF CHEAP OIL, 1960-2010

Routledge Singapore might not have survived the 1960s and prospered thereafter had it not built its economy on the foundations of oil refining, trading and support for oil and gas exploration and production. Cheap oil, sound policies and strong government combined to produce the Singapore economic miracle in its first 50 years of self-rule/independence. With the end of cheap oil, how will Singapore fare and what is the relevance of its model of development for other countries? Singapore's successful launch coincided with a golden period of cheap energy, and a pro-globalization and free trade environment. These three elements are now under threat from rising energy prices and the global financial crisis which started in 2007 that will leave a lasting impact on the world's political and economic landscape. If the Singapore model is reaching or has reached its peak, what could take its place? This book poses questions for not just for Singapore planners, but also for anyone interested in modern economics and trade beyond the current era. The book also looks into the numerous subsectors within Singapore's broad energy sector and examines the energy sector's links with the other pillars of its economy: trade, financial, offshore/marine operations, manufacturing and transportation. It considers possible threats and challenges: Singapore's rising energy intensity, its vulnerability to energy supply cut-offs, the likely impact of peak oil, terrorism and environmental / climate issues. It also looks at China's growing investment and role in Singapore's oil and gas industry. The book is a must-read for an excellent insight into Singapore's energy economy, filled with data, information, interviews and analyses previously not available to the public.
