
Site To Download Perspect International Development Economic Regional In Valorization And Commercialization Knowledge

This is likewise one of the factors by obtaining the soft documents of this **Perspect International Development Economic Regional In Valorization And Commercialization Knowledge** by online. You might not require more times to spend to go to the books start as capably as search for them. In some cases, you likewise complete not discover the statement Perspect International Development Economic Regional In Valorization And Commercialization Knowledge that you are looking for. It will entirely squander the time.

However below, afterward you visit this web page, it will be suitably certainly easy to acquire as capably as download guide Perspect International Development Economic Regional In Valorization And Commercialization Knowledge

It will not agree to many grow old as we accustom before. You can realize it even if bill something else at house and even in your workplace. consequently easy! So, are you question? Just exercise just what we meet the expense of below as skillfully as evaluation **Perspect International Development Economic Regional In Valorization And Commercialization Knowledge** what you later than to read!

KEY=AND - HOOPER DESIREE

Knowledge Commercialization and Valorization in Regional Economic Development

Edward Elgar Publishing The commercialization of academic knowledge is increasingly seen as a potential economic development model, particularly for improving the capabilities and economic performance of regions. This insightful volume investigates the emerging factors in knowledge commercialization from an international perspective and highlights research agendas and challenges to be met across academia, industry and government. The expert contributors focus specifically on the new role of universities in regional economic development through knowledge commercialization, as well as university-industry interaction and the factors that influence knowledge and technology transfer. They explore

Knowledge commercialization in the US, knowledge valorization in Europe, and technology transfer dynamics in China. A forum for discussion of whether, why, and how commercialization and valorization of knowledge can lead to higher levels of innovation and economic development from an international perspective is also provided. This thought-provoking book will prove a stimulating read for academics, students and researchers with an interest in regional economics, regional studies and knowledge management.

Circular Economy and Waste Valorisation

Theory and Practice from an International Perspective

Springer Nature The authors and editors of this volume state that with the intensive growth of global industrialization and urbanization, the consumption of various resources and materials, such as energy, minerals, and even water, is increasing at an amazing speed, which poses great pressure on material resources. In addition, the massive utilization of materials has led to low efficiency, resulting in great wastes of resources as well as serious environmental pollutions and degradation, which has severely hindered the sustainable development of economy and society. In order to transit to sustainable development, it is necessary to improved resource efficiency, and circular economy and waste valorization are the best alternative ways for achieving this goal. This book aims to provide an in-depth description of circular economy and waste valorization, make assessments for circular economy and waste valorization in different regions and countries and determine the technological pathways and roadmap for achieving circular economy and waste valorization. More specifically: (1) Conceptions and Theories: Concepts and definitions of circular economy and waste valorization and their nexus and contributions to sustainable development. (2) Policy and Practice: Measurement and assessment of performance or sustainability for implementing circular economy and waste valorization. (3) Pathways and Prospects: Identification and prioritization of the barriers, strategies, technologies, and pathways for achieving circular economy and waste valorization. The book systematically and comprehensively introduces the definitions, concepts, framework and nexus of circular economy and waste valorization, analyzes and measures their performance and sustainability and provides the methods for investigating and prioritizing the barriers and strategies and determining the pathways and roadmap for their development.

Responses to Geographical Marginality and Marginalization From Social Innovation to Regional Development

Springer Nature This book examines regional responses to marginality by highlighting social innovation, local capacity and new path formations in what are often seen as economically weak regions where policy and institutional considerations play a key role. Divided into three parts, it covers a wide range of topics related to geographical marginality from various angles, on both regional and local scales. The first part focuses on the role of social innovation and illustrates the themes of social innovation and new localism, local revitalization and social entrepreneurship. The second part then addresses the issues of economic responses, valorization, resource use and local action in response to marginalization. Lastly, the third part explores various policies and measures taken to respond to marginality and intensify regional development in marginal areas.

Valuation for Sustainable Development Methods and Policy Indicators

Edward Elgar Pub This important new book develops an ecological-economics perspective on sustainability at the regional, national and international level. It explores prospects for sustainable development using methods firmly grounded in empirical reality, as well as emphasizing scientific, economic and socio-political concerns. This approach is based on the construction of non-monetary indicators for sustainability, and the application of cost-effectiveness analyses to identify robust alternatives for the achievement of specified policy norms. In calculating the requirements for sustainability the contributors attach importance to multiple criteria decision aid (MCDA) methods of analysis to evaluate the key components of sustainability and help assess the sustainability of a regional or national economic development trajectory. Case studies of water pollutants in the Bretagne region in France and greenhouse gas reduction in Europe are used to investigate resource allocation from this perspective. The contributors utilize the M3ED model - a structural economy-environment simulation model which gives a multi-sectoral representation of a national economy's production, final consumption and environmental pressures - to explore feasible economic futures. It is applied to

scenarios in France to demonstrate ways that prospects for sustainability can be investigated at a national level. The contributors compare and contrast these models with the aims of more typical neoclassical modelling in their search for the most effective approaches to defining operational measures for sustainability. This book will be of great interest to academics in the field of ecological and environmental economics and to policymakers and planners in government and industry.

The Green Book

Appraisal and Evaluation in Central Government : Treasury Guidance

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

The Wiley-Blackwell Encyclopedia of Urban and Regional Studies

John Wiley & Sons Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor-in-Chief Anthony Orum, this definitive reference work covers central and emergent topics in the field, through an examination of urban and regional conditions and variation across the world. It also provides authoritative entries on the main conceptual tools used by anthropologists, sociologists, geographers, and political scientists in the study of cities and regions. Among such concepts are those of place and space; geographical regions; the nature of power and politics in cities; urban culture; and many others. The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the globe, including timely entries on Latin America, Africa, India and China. At the same time, it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today, such as those of Friedmann and Sassen on 'global cities'. It also includes discussions of recent economic writings on cities and regions such as those of

Richard Florida. Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective with entries providing coverage of Latin America and Africa, India and China, and, the US and Europe Includes biographies of central figures in urban and regional studies, such as Doreen Massey, Peter Hall, Neil Smith, and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies, urban sociology, urban geography, and urban anthropology.

Mangrove Ecosystems: A Global Biogeographic Perspective Structure, Function, and Services

Springer This book presents a comprehensive overview and analysis of mangrove ecological processes, structure, and function at the local, biogeographic, and global scales and how these properties interact to provide key ecosystem services to society. The analysis is based on an international collaborative effort that focuses on regions and countries holding the largest mangrove resources and encompasses the major biogeographic and socio-economic settings of mangrove distribution. Given the economic and ecological importance of mangrove wetlands at the global scale, the chapters aim to integrate ecological and socio-economic perspectives on mangrove function and management using a system-level hierarchical analysis framework. The book explores the nexus between mangrove ecology and the capacity for ecosystem services, with an emphasis on thresholds, multiple stressors, and local conditions that determine this capacity. The interdisciplinary approach and illustrative study cases included in the book will provide valuable resources in data, information, and knowledge about the current status of one of the most productive coastal ecosystem in the world.

New Metropolitan Perspectives Knowledge Dynamics and Innovation-driven Policies Towards Urban and Regional Transition

Volume 2

Springer Nature This book presents the outcomes of the symposium “NEW METROPOLITAN PERSPECTIVES,” held at Mediterranea University, Reggio Calabria, Italy on May 26–28, 2020. Addressing the challenge of Knowledge Dynamics and Innovation-driven Policies Towards Urban and Regional Transition, the book presents a multi-disciplinary debate on the new frontiers of strategic and spatial planning, economic programs and decision support tools in connection with urban–rural area networks and metropolitan centers. The respective papers focus on six major tracks: Innovation dynamics, smart cities and ICT; Urban regeneration, community-led practices and PPP; Local development, inland and urban areas in territorial cohesion strategies; Mobility, accessibility and infrastructures; Heritage, landscape and identity; and Risk management, environment and energy. The book also includes a Special Section on Rhegion United Nations 2020-2030. Given its scope, the book will benefit all researchers, practitioners and policymakers interested in issues concerning metropolitan and marginal areas.

Handbook of Research on Global Perspectives on International Advertising

IGI Global International advertising is an important discipline in social sciences studies and though many books and articles have been published surrounding international advertising, only a few of them contain information about the advertising industry related to specific international countries and regions. Additional consideration on how advertising is utilized across the world is vital to understand the current best practices, challenges, and opportunities in the marketing field. The Handbook of Research on Global Perspectives on International Advertising considers various perspectives on international advertising through global and local lenses and discusses strategies and tactics of advertising across the globe. Covering topics such as branding, political advertising, cultural features, and tourism advertising, this reference work is ideal for industry professionals, academicians, practitioners, researchers, scholars, instructors, and students.

Circular Economy: Recent Trends in Global Perspective

Springer Nature This book presents the advantages of the circular economy as a powerful - and inevitable - model for tackling the current challenges against shrinking resources and establishing the resource efficient economy. The experienced contributors present the status and strategies of circular economy

implementation in several countries with hands on experience to protect the environment while promoting the circular economy through legislative requirements, best practices adopted and popularizing the idea of circulation of resources amongst the researchers & academia, policy makers, industry, and the general public at large. The book advocates model that consists of designing products and processes with a view to endlessly recycling them evolving a greater scope of sustainable development.

The International Handbook on Non-Market Environmental Valuation

Edward Elgar Publishing Non-market environmental valuation (NMEV) is undergoing a period of increased growth in both application and development as a result of increasing recognition of the role of economics in environmental policy issues. Against this backdrop, The International Handbook on Non-Market Environmental Valuation brings together world leaders in the field to advance the development and application of NMEV as a tool for policymaking. The expert contributors provide insights into the state of the art across the spectrum of both revealed and stated preference methods and highlight new directions being taken. A sequence of topical applications demonstrate various techniques and illustrate what can be achieved using NMEV: deliberately diverse case studies are drawn from Europe, North America, Asia and Australia with valuation targets ranging across use and non-use values of the environment. A number of reviews of cutting-edge issues are also presented. This outstanding resource will enable those interested in environmental valuation from theoretical, practical or policy perspectives to bring themselves to the forefront of developments and practice. As such, this Handbook will prove invaluable to a wide-ranging audience encompassing academics, researchers, students, practitioners and consultants involved in environmental economics and NMEV.

Valuation of Regulating Services of Ecosystems

Methodology and Applications

Routledge The valuation of regulating services is an evolving field of ecological economics. In this book, Professor Pushpam Kumar and Professor Michael D. Wood have invited some of the foremost international experts in the field of ecosystem services valuation to contribute chapters on the valuation of regulating services and highlight some of the main obstacles to the implementation and acceptance of these methodologies in the context of decision-making.

Caring and Sharing: The Cultural Heritage Environment as an Agent for Change

2016 ALECTOR Conference, Istanbul, Turkey

Springer This proceedings volume explores the socio-economic dimension of the heritage sector from a broad, interdisciplinary perspective. Featuring contributions from the 2016 ALECTOR International Conference held in Istanbul, Turkey, this book presents current theoretical and empirical research related to such topics as: R&D and ICT in tourism; heritage products and services; climate change; finance and tourism; cultural communication; anthropological cultural heritage; and heritage management. Collectively, the papers presented in this book provides methodologies, strategies and applications to measure the socio-economic dimension of the heritage sector and also good practices in the heritage sector that drive regional, cultural and economic development and sustainability. The EU Neighbourhood Info Centre (ENPI) Cross-Border Cooperation (CBC) Black Sea project "Collaborative Networks of Multilevel Actors to Advance Quality Standards for Heritage Tourism at Cross Border Level", or ALECTOR, focuses on different types of heritage assets as a means to invest in human capital and tourism innovation in order to achieve socio-economic development and cooperation with social partners in the Black Sea region. Featuring collaborations from Greece, Romania, Bulgaria, Moldova Ukraine, Georgia and Turkey, the project proposes a cognitive and educational framework for using a region's assets, which would guide final beneficiaries (regions, communities, SMEs) to identify, signify, valorize and manage their natural and cultural resources, in order to use heritage potential as a vehicle for tourism. Presenting case studies of successful initiatives, the enclosed papers are divided into two parts: • Part I: Economics of Heritage features innovative research results on the heritage and tourism topics from countries such as Bulgaria, Croatia, Russia, and Romania • Part II: Best Practices features best practices, experiences,

and promotion plans for cultural heritage through tourism from countries such as Bulgaria, Republic of Moldova, Turkey, Russia, and Romania

Environmental Valuation

A Worldwide Compendium of Case Studies

Routledge This companion volume to Economic Instruments for Environmental Management presents essential information on the applications of economic valuation to environment and development. It draws on a three-year collaborative effort by research institutions around the world. Authoritative studies review the range of valuation methods used in developing economies, their purposes, the problems encountered and the quality of the results. Topics covered include the value of wildlife viewing, the conservation of rainforests, mangroves and coral reefs, supplying rural water, and controlling urban air pollution. The analysis reveals important methodological and contextual factors, highlighting key lessons and ways of strengthening future valuations. Written to be accessible to non-economists, the book provides source material for students and academics, and for policy-makers and professionals, using valuation methods to frame policy.

World Economic Situation and Prospects 2020

United Nations This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

Bridging the gap between ocean acidification impacts and economic valuation

Regional impacts of ocean

acidification on fisheries and aquaculture

IUCN Following the first international workshop on the economics of ocean acidification organized by the Centre Scientifique de Monaco and the International Atomic Energy Agency in 2010, a second international workshop was held in November 2012, which explored the level of risk, and the resilience or vulnerability of defined regions of the world ocean in terms of fishery and aquaculture species and economic impacts, and social adaptation. This report includes the findings and recommendations of the respective regional working groups and is the result of an interdisciplinary survey of ocean acidification-sensitive fisheries and aquaculture.

Food Waste Reduction and Valorisation

Sustainability Assessment and Policy Analysis

Springer This book adds a new dimension to the sustainability assessment of food waste reduction and valorisation: policy analysis. Featuring a transdisciplinary analysis by key experts in the field, it identifies the drivers of change in food-waste reduction and valorisation technologies by looking, for example, at the regulatory framework and at policy actions undertaken by local and global actors. The book explores the development of regulations and policies for food-waste prevention, management, and valorisation at a global as well as European Union level. It also discusses the notion of food waste in legal terms and investigates the effects of the lack of a standard, universal definition of food waste on the efficient use of by-products, promising processes and products for technological and commercial exploitation. Utilising mathematical mapping methods to assess food consumption impacts and providing supply chain models that allow the testing of consumption scenarios, the book goes on to discuss a series of emerging technologies (tested at lab scale and/ or pilot scale) and opportunities for the valorisation of food waste.

Cybernetics Perspectives in Systems

Proceedings of 11th Computer Science On-line Conference 2022, Vol. 3

Springer Nature This book contains the refereed proceedings of the Cybernetics Perspectives in Systems session of the 11th Computer Science On-line Conference 2022 (CSOC 2022), which was held in April 2022 online. Papers on modern cybernetics and informatics in the context of networks and systems are an important component of current research issues. This volume contains an overview of recent method, algorithms and designs.

World Heritage Sites and Tourism Global and Local Relations

Taylor & Francis Not all World Heritage Sites have people living within or close by their boundaries, but many do. The designation of World Heritage status brings a new dimension to the functioning of local communities and particularly through tourism. Too many tourists accentuated by the World Heritage label, or in some cases not enough tourists, despite anticipation of increased numbers, can act to disrupt and disturb relations within a community and between communities. Either way, tourism can be seen as a form of activity that can generate interest and concern as it is played out within World Heritage Sites. But the relationships that World Heritage Sites and their consequent tourism share with communities are not just a function of the number of tourists. The relationships are complex and ever changing as the communities themselves change and are built upon long-standing and wider contextual factors that stretch beyond tourism. This volume, drawing upon a wide range of international cases relating to some 33 World Heritage Sites, reveals the multiple dimensions of the relations that exist between the sites and local communities. The designation of the sites can create, obscure and heighten the

power relations between different parts of a community, between different communities and between the tourism and the heritage sector. Increasingly, the management of World Heritage is not only about the management of buildings and landscapes but about managing the communities that live and work in or near them.

Economic valuation and policy priorities for sustainable management of coral reefs

WorldFish

Global Political Economy

Routledge Praised for its authoritative coverage, Global Political Economy places the study of IPE in its broadest theoretical context. This text not only helps students understand the fundamentals of how the global economy works but also encourages them to use theory to more fully grasp the connections between key issue areas like trade and development. Written by a leading IPE scholar, Global Political Economy equally emphasizes theory and practice to provide a framework for analyzing current events and long-term developments in the global economy.

A Quarter-century of Normalization and Social Role Valorization

Evolution and Impact

University of Ottawa Press During the late 1960s, Normalization and Social Role Valorization (SRV) enabled the widespread emergence of community residential options and then provided the philosophical climate within which educational integration, supported employment, and community participation were able to take firm root. This book is unique in tracing the evolution and impact of Normalization and SRV over the last quarter-century, with many of the chapter authors personally involved in a still-evolving international movement.

The Measurement and Valuation of Health Status Using EQ-5D: A

European Perspective Evidence from the EuroQol BIOMED Research Programme

Springer Science & Business Media EQ-5D from the EuroQol Group is a standardised, non-disease-specific instrument for describing and valuing health. It is in widespread use in many countries and has been applied in many different settings. EQ-5D is now an integral feature of many clinical trials and is increasingly used in population health surveys. This book reports on the results of the European Union-funded EQ-net project which furthered the development of EQ-5D in the key areas of valuation, application and translation. The primary effort concentrated on harmonising and integrating the results of the various EuroQol valuation projects. Most importantly, the book includes a set of VAS-based preference weights for all the EQ-5D health states based on cross-European EQ-5D data. This book provides the most comprehensive account to date of the EuroQol Group endeavour. It will appeal to clinicians, nurses, health services researchers, health economists, those responsible for audit and quality assurance, public health specialists and managers in health care institutions, and the pharmaceutical industry.

Global Development and the Environment

Perspectives on Sustainability

Routledge In preparation for the United Nation's Conference on Environment and Development in Rio de Janeiro in June 1992, this study aimed to detail enduring environmental issues that might or might not have been considered at the conference. Originally published earlier that year, Global Development and the Environment questions the compatibility of goals for environmental protection, natural resource consequences and economic growth in relation to sustainability with essays on important topics such as biodiversity, agriculture and population issues. This title will be of interest to students of Environmental Studies and Economics.

New Metropolitan Perspectives

Selected, Peer Reviewed Papers from the 1st International Symposium "NEW METROPOLITAN PERSPECTIVES - The Integrated Approach of Urban Sustainable Development Through the Implementation of Horizon/Europe 2020" (ISTH 2020), May 6-8, 2014, Reggio Calabria, Italy

Collection of selected, peer reviewed papers from the 1st International "NEW METROPOLITAN PERSPECTIVES. The Integrated Approach of Urban Sustainable Development through the Implementation of Horizon/Europe2020" (ISTH2020), May 6-9, 2014, Reggio Calabria, Italy. The 96 papers are grouped as follows: I. The Integrated Approach in Europe 2020: Urban and Marginal Areas in Local Economic Development Strategies, II. The Integrated Approach of Sustainable Urban Development, III. Metropolitan City: Issues and Challenges, IV. Urban Regeneration: Community Involvement and PPP, V. Urban/Rural - The Role of Urban/Rural Regeneration in Regional Context, VI. Heritage and Identity, VII. Economic-Estimative Dynamics and Valuation Tools Keyword: Urban and Marginal Areas in Local Economic Development Strategies, II. The Integrated Approach of Sustainable Urban Development, III. Metropolitan City: Issues and Challenges, IV. Urban Regeneration: Community Involvement and PPP, V. Urban/Rural - The Role of Urban/Rural Regeneration in Regional Context, VI. Heritage and Identity, VII. Economic-Estimative Dynamics and Valuation Tools.

Eurasian Economic Perspectives Proceedings of the 22nd Eurasia

Business and Economics Society Conference

Springer This volume of Eurasian Studies in Business and Economics includes selected papers from the 22nd Eurasia Business and Economics Society (EBES) Conference in Rome. It gathers scholarly contributions on the latest applied economics research from developing countries such as Croatia, Poland, the Baltic and ASEAN countries, which tend to be underrepresented in the current literature. Both the theoretical and empirical papers in this volume cover diverse areas of economic research from various regions. The main focus is on sharing the latest findings on empirical industrial organization, in particular the economics of innovation, regional economic development dynamics, and banking sector reforms in developing countries.

Valuation and Conservation of Biodiversity

Interdisciplinary Perspectives on the Convention on Biological Diversity

Springer Science & Business Media The goal of this transdisciplinary book is to identify the problems and challenges facing implementation of the Convention on Biological Diversity (CBD) - from the global, regional and local points of view. The valuation and conservation of biodiversity are critical first steps necessary for the adequate protection of the environment. The authors give insights into the the influences the CBD exerts, and current trends in the field.

Nano-(Bio)Catalysis in Lignocellulosic Biomass Valorization

Frontiers Media SA The valorization of lignocellulosic biomass, in the form of forest and agricultural wastes, industrial processing side-streams, and dedicated energy crops, toward chemicals, fuels and added-value products has become a major research area with increasing exploitation potential. The efficient and tailored depolymerization of biomass or its primary structural components (hemicellulose, cellulose, and lignin) to platform chemicals, i.e., sugars, phenolics, furans, ketones, organic acids, etc. is highly dependent on the development of novel or modified

chemo- and bio-catalytic processes that take into account the peculiarities and recalcitrance of biomass as feedstock, compared for example to petroleum fractions. The present Research Topic in Frontiers in Chemistry, Section of Green and Sustainable Chemistry, entitled "Nano-(bio)catalysis in lignocellulosic biomass valorization" aims to further contribute to the momentum of research and development in the (bio)catalytic conversion of biomass, by featuring original research papers as well as two review papers, authored and reviewed by experts in the field. The Research Topic addresses various representative reactions and processes in biomass valorization, highlighting the importance of developing novel, efficient and stable nano-(bio)catalysts with tailored properties according to the nature of the reactant/feedstock and the targeted products.

Public Private Partnerships for Infrastructure and Business Development Principles, Practices, and Perspectives

Springer Public-Private Partnerships for Infrastructure and Business Funding is ideal for scholars and practitioners who work in the field of public policy design and implementation, finance and banking, and economic development.

Innovation and Regional Development in China

Routledge Although China is now the 'factory of the world', there is no reason to expect that it will always be content with manufacturing labor-intensive goods for foreign corporations. Scholars must now ask: What is the current level of innovation in China? And how can we face this challenge and renovate industrial production and innovation capacities in developed countries? This edited volume investigates the unique characteristics of Chinese innovation and regional development, China's policy framework, and the role that transnational corporations play in China's increasing innovation activities. This book contributes to the heated debate regarding pathways for technology progress and regional development in developing countries, and identifies the ways in which local production networks respond to different configurations of external linkages. Linking patterns of global and local production networks with the trajectories of technology development and regional development allows the authors to theorize and test whether, and how, particular configurations of production networks generate divergent long-term local

productivity growth and technological development outcomes. Innovation and Regional Development in China will be of interest to geographers, economists, China specialists, development specialists, and scholars working on innovation and regional development in developing areas and transition countries.

Rural Tourism in Europe

Experiences, Development and Perspectives

World Tourism Organization Publications With an expected growth rate of around 6 per cent rural tourism is developing faster than the overall growth rate for international tourism arrivals. Due to its special importance for the European region, three seminars were held in Belgrade (Serbia), Kielce (Poland) and Yaremcha (Ukraine) to focus on three major issues: to contribute to a better understanding of rural tourism and to offer additional tools for planning and execution of initiatives; to enhance the importance of rural tourism in the agendas of governments and international organizations; to generate political and financial support for the development of rural tourism. (WTO)

2017 Valuation Handbook - International Guide to Cost of Capital

John Wiley & Sons EVERYTHING YOU NEED FOR ACCURATE INTERNATIONAL COST OF CAPITAL ESTIMATIONS—IN A SINGLE VOLUME The 2017 Valuation Handbook - International Guide to Cost of Capital is part of the U.S. and international series of valuation resources authored by Duff & Phelps and published by John Wiley & Sons. This annually updated reference provides business valuation and finance professionals with the critical data they need to assess risk and develop cost of capital estimates on a global scale. Gauging the risks of an international investment is one of the trickiest aspects of finance. This comprehensive guidebook provides you with usable international data and methodology, and the ability to: Turn to a definitive resource of world-class data and guidance to gain a distinct competitive advantage in real-world situations. Access costly and difficult-to-obtain international data, assembled into easy-to-use cost of capital inputs at an accessible price point. Quickly grasp how concepts and methodologies translate into actual practice when they are brought to life in exemplifying cases. Accurate. Reliable. Trusted. The 2017 Valuation Handbook - International Guide to Cost of Capital gives you the upper hand the moment you open it. Other volumes in the annual series include: 2017 Valuation Handbook - International Industry Cost of Capital 2017 Valuation

Handbook – U.S. Guide to Cost of Capital 2017 Valuation Handbook – U.S. Industry Cost of Capital

Stakeholder-oriented Valuation to Support Water Resources Management Processes

Confronting Concepts with Local Practice

Food & Agriculture Org. Today, raising capacity in water resources management entails supporting stakeholders and decision-makers to reach a common understanding on the priorities and necessary arrangements for sharing and allocating water-related goods and services. Valuation is central to this process, as setting priorities and making choices implies valuing certain uses and arrangements above others. Water valuation can help stakeholders to express the values that water-related goods and services represent to them. It also offers a means for conflict resolution and planning, informing stakeholders, supporting communication, and facilitating joint decision-making on priorities and specific actions. This report confronts concepts from the literature on water valuation with practical experiences from three local cases where an effort was made to embed existing valuation tools and methods in ongoing water resources management processes. It uses the lessons from this exploration to provide a first outline for a stakeholder-oriented water valuation process. This is expected to provide a useful starting point to help water professionals and policy-makers improve the use of water valuation as a means to support participatory processes of water resources management.

The Blue Economy Handbook of the Indian Ocean Region

Africa Institute of South Africa As humanity enters the Anthropocene epoch the oceans are more at risk than ever before as a result of the increased exploitation of its resources. The Indian Ocean is the third largest ocean in the world comprising 20% of the water on the Earth's surface. The sea lanes in the Indian Ocean are among the busiest in the world with more than 80 percent of global seaborne trade in oil transiting through the Indian Ocean and its vital chokepoints and an estimated 40% of the world's offshore oil production comes from the Indian Ocean. The importance of this region cannot be underestimated and there is no doubt that there are many opportunities for economic growth and job creation presented by the waters washing the shores of the Indian Ocean Rim. In order to ensure a desirable

future for humanity it is necessary to make use of the ocean's resources in a sustainable and responsible manner. Climate change is affecting the Indian Ocean negatively, placing a strain on the ability to ensure food security and damaging the economies of small island states that depend on fisheries and aquaculture for their livelihoods. Increasing ocean temperatures and ocean acidification are taking a toll on ecosystems. This book is the first of its kind, providing fresh insights into the various aspects and impacts of the Blue Economy in the Indian Ocean Region: from shifting paradigms, to an accounting framework, gender dynamics, the law of the sea and renewable energy, this handbook aims at increasing awareness of the Blue Economy in the Indian Ocean Region and to provide evidence to policy-makers in the region to make informed decisions. The contributions are from a mixture of disciplines by scholars and experts from seven countries.

Environmental Valuation in Developed Countries Case Studies

Edward Elgar Publishing Environmental Valuation in Developed Countries will be of interest to policy makers and economist in search of a variety of methodologies related to environmental valuation. Political Studies Review This is the second of two volumes of case studies that illustrate how environmental economists place values on environmental assets and on the flows of goods and services generated by those assets. The first volume, Valuing the Environment in Developing Countries, illustrates methodologies and applications of valuation techniques in the developing world; this volume concentrates on developed or wealthy nations where the first examples of economic valuation of the environment were carried out. This important book assembles studies that discuss broad areas of application of economic valuation from amenity and pollution through to water and health risks, from forestry to green urban space. In this, his last book, the late David Pearce brought together leading European experts, contributors to some two dozen case studies exploring the frontiers of economic valuation of natural resources and environmental amenity in the developed world. Essays on the role of valuation in environmental policy, environmental justice and green accounts are presented, and case study topics include: valuing forestry benefits GM crops water use and quality externalities in the electricity sector renewable energy benefits electricity transmission line disamenity urban greenspace chemical risks noise pollution. Economic valuation has undoubtedly made an important contribution to the environmental debate, and the contributors illustrate how sophisticated techniques have become, and how powerful their application can be. As such, this significant volume will prove essential reading for academics, researchers, students and practitioners in the field of environmental economics.

Contingent Valuation

A Comprehensive Bibliography and History

Edward Elgar Publishing This major reference work the first of its kind provides a comprehensive and authoritative introduction to the large and growing literature on contingent valuation. It includes entries on over 7,500 contingent valuation papers and studies from over 130 countries covering both the published and grey literatures. This book provides an interpretive historical account of the development of contingent valuation, the most commonly used approach to placing a value on goods not normally sold in the marketplace. The major fields catalogued here include culture, the environment, and health application. This bibliography is an ideal starting point for researchers wanting to find other studies that have valued goods or used techniques similar to those they are interested in. For those wanting to conduct meta analyses, the book will serve as an invaluable guide to source material. For those wanting to conduct meta analyses, the book will serve as an invaluable guide to source material. In addition to the print edition we offer access, for purchasers of the book, to a website providing the contents of as a searchable Word document and in a variety of standard bibliographic database forms. *Contingent Valuation* is an indispensable reference source for researchers, scholars and policymakers concerned with survey approaches to the problem of environmental valuation.

New Metropolitan Perspectives

Trans Tech Publications Ltd Collection of selected, peer reviewed papers from the 1st International "NEW METROPOLITAN PERSPECTIVES. The Integrated Approach of Urban Sustainable Development through the Implementation of Horizon/Europe2020" (ISTH2020), May 6-9, 2014, Reggio Calabria, Italy. Volume is indexed by Thomson Reuters CPCI-S (WoS). The 96 papers are grouped as follows: I. The Integrated Approach in Europe 2020: Urban and Marginal Areas in Local Economic Development Strategies, II. The Integrated Approach of Sustainable Urban Development, III. Metropolitan City: Issues and Challenges, IV. Urban Regeneration: Community Involvement and PPP, V. Urban/Rural - The Role of Urban/Rural Regeneration in Regional Context, VI.
