AMERICAN MILITARY TRAINING AIRCRAFT

FIXED AND ROTARY-WING TRAINERS SINCE 1916

McFarland The U.S. did not become the world's foremost military air power by accident. The learning curve--World War I, World War II, the Korean War, the Vietnam War, the Gulf War, and more recently the war on terror--has been steep. While climbing this curve, the U.S. has not only out-gunned the opposition, producing superior military aircraft in greater numbers than its foes, but has out-trained them, too. This book provides a comprehensive historical survey of U.S. military training aircraft, including technical specifications, drawings and photographs of each type of fixed and rotary-wing design used over a 98-year period to accomplish the first step of the learning process: the training of pilots and aircrews.

JAPAN'S ECONOMIC PLANNING AND MOBILIZATION IN WARTIME, 1930S-1940S

Cambridge University Press "Although most economists maintain a mistrust of a government's goals when it intervenes in an economy, many continue to trust its actual ability. They retain, in other words, a faith in state competence. For this faith, they adduce no evidence. Sharing little skepticism about the government's ability, they continue to expect the best of governmental intervention. To study government competence in World War II Japan offers an intriguing laboratory. In this book, Yoshiro Miwa shows that the Japanese government did not conduct requisite planning for the war by any means. It made its choices on an ad hoc basis and the war itself quickly became a dead end. That the government planned for the war incompetently casts doubts on the accounts of Japanese government leadership more generally"--

iUniverse This book is a true adventure story, a love story, and a tale that has some meaning. How to survive in a changing world and society, and to become a pilot, flying airplanes for a living. The tale is not that much different than most life stories, having winnings and losses, success and defeat. It has a wide stage to work this out on, from Texas and the whole sweep of the United States, to Europe, and back. I have written this book to tell you something of the Aviation of the past fifty years, and what I learned in my journey through them. I would like to invite you on this 50 year journey. I will do my best to see that you enjoy the trip, and end up with a smile on your face. Now, please fasten your seat belts!
