### The Animus

### The Spirit of Inner Truth in Women

Barbara Hannah tackled the theme of the animus in women's psyche with a comprehensiveness unsurpassed in Jungian literature. Her insight and vigor stem directly from personally grappling with her own animus while integrating the experience and reflections of psychotherapists working directly with C.C. Jung. Her psychological analysis of the minims is presented here in two volumes in essays gleaned from her handwritten notes, typed manuscripts, previously published articles (as well as her notes for those articles) and from her own drafts oilier lectures, given at the C.G. Jung Institute in Zurich and to various audiences in Switzerland and England. The main objective of these two volumes is to present the reader with an all-inclusive synthesis of the many and complex essays and lectures Barbara Hannah presented on the animus while rendering the wonderful spirit and voice of Barbara Hannah herself.

### Mapping the Psyche Volume 1

### The Planets & the Zodiac Signs

**The Wessex Astrologer** In this first of three volumes, the basic building blocks of astrological language are presented, not in the dry, 'cookbook' manner which mars so many astrology texts, but in the lively and relaxed format of the classroom. Questions from students punctuate the teaching, making the material accessible, fluent and immediately applicable to everyday life.

### The Animus

### The Spirit of Inner Truth in Women, Volume 1 (Polarities of the Psyche)

Barbara Hannah was a straightforward, modest, yet a grand woman, a lover of literature, and a colleague and friend of C. G. Jung, Emma Jung, and Marie-Louise von Franz. A first-generation Jungian psychologist, she was an original member of the Psychological Club of Zurich and a founder of the Jung Institute in Zurich. She lectured extensively in Switzerland and England and wrote several books on C. G. Jung and Jungian psychology. *The Animus*, in two volumes, presents her psychological analysis of the animus, gleaned from handwritten notes, typed manuscripts, previously published articles, her own drafts of her lectures, and notes taken by those present. She tackled the theme of the animus with a comprehensiveness unsurpassed in Jungian literature. Her insights and vigor stem from personally grappling with her own animus, while integrating the experience and reflections of many psychotherapists who worked directly with C. G. Jung. Authenticity and comprehensiveness were priorities in editing this work, as well as the preservation of the excellence of her work on the animus--a complex and vexing topic--while retaining the wonderfully natural spirit of Barbara Hannah herself. Themes include the case of the sixteenth-century nun, Jeanne Fery; the animus in the Book of Tobit (or Tobias); literature in general (the Brontes in particular); and the meaning of the animus for modern women. *The Animus*, volumes 1 and 2 are part of the "Polarities of the Psyche" series from Chiron Publications. Other books in the series are *Lectures on Jung's Aion* and *The Archetypal Symbolism of Animals*.

### Analytical Psychology and German Classical Aesthetics: Goethe, Schiller, and Jung, Volume 1

### The Development of the Personality

**Routledge** In this volume, Paul Bishop investigates the extent to which analytical psychology draws on concepts found in German classical aesthetics. It aims to place analytical psychology in the German-speaking tradition of Goethe and Schiller, with which Jung was well acquainted. *Analytical Psychology and German Classical Aesthetics* argues that analytical psychology appropriates many of its central notions from German classical aesthetics, and that, when seen in its intellectual historical context, the true originality of analytical psychology lies in its reformulation of key tenets of German classicism. Although the importance for Jung of German thought in general, and of Goethe and Schiller in particular, has frequently been acknowledged, until now it has never been examined in any detailed or systematic way. Through an analysis of Jung's reception of Goethe and Schiller, *Analytical Psychology and German Classical Aesthetics* demonstrates the intellectual continuity within analytical psychology and the filiation of ideas from German classical aesthetics to Jungian thought. In this way it suggests that a rereading of analytical psychology in the light of German classical aesthetics offers an intellectually coherent understanding of analytical psychology. By uncovering the philosophical sources of analytical psychology, this first volume returns Jung's thought to its core intellectual tradition, in the light of which analytical psychology gains new critical impact and fresh relevance for modern thought. Written in a scholarly yet accessible style, this book will interest students and scholars alike in the areas of analytical psychology, comparative literature, and the history of ideas.

### The Concept of Woman, Volume 3

### The Search for Communion of Persons, 1500-2015

**Wm. B. Eerdmans Publishing** The culmination of a lifetime's scholarly work, this pioneering study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to the present. In her third and final volume Allen covers the years 1500-2015, continuing her chronological approach to individual authors and also offering systematic arguments to defend certain philosophical positions over against others. Building on her work from Volumes I and II, Allen draws on four "communities of discourse"—Academic, Humanist, Religious, and Satirical—as she traces several recurring strands of sex and gender identity from the Renaissance to the present. Now complete, Allen's magisterial study is a valuable resource for scholars and students in the fields of women's studies, philosophy, history, theology, literary studies, and political science.

Increased attention is devoted to creativity in adulthood, to learning and memory, to marriage stability, and other topics. The book provides a focus for a Psychology of Adulthood course that encourages students to look at the evolving nature of their own lives. Particular attention is given to developing an extensive set of references (over 700 in this volume) as an aid to scholars. -- Publisher description.

### Polarities of Experience

## Relatedness and Self-definition in Personality Development, Psychopathology, and the Therapeutic Process

**Amer Psychological Assn** "This book presents a groundbreaking approach that establishes conceptual continuities among normal and pathological personality development, the classification of psychopathology, and the therapeutic process. Sidney J. Blatt proposes that psychological development is a lifelong personal negotiation between two fundamental dimensions in human affairs, relatedness, and self-definition. Psychological development, from youth to old age, occurs as a synergistic interaction between these two polarities, with most individuals favoring to varying degrees either the relatedness (anaclitic) dimension or self-definition (introjective) dimension, and with the two polarities existing in dynamic tension in normal functioning. Exaggerated emphasis on one developmental dimension at the expense of the other, however, is expressed at different developmental levels in a variety of psychological disorders. A broad array of empirical research supports this view of psychopathology, not as clusters of present or absent symptoms as in the current DSM diagnostic system, but rather as compensatory exaggerations of the normal polarities of relatedness and self-definition. This conceptualization has clear therapeutic implications. Anaclitic and introjective persons respond differently to specific dimensions of the therapeutic process and express therapeutic progress in different ways in a wide variety of the therapeutic approaches. Thus, clinical researchers as well as therapists, psychiatrists, and graduate students will find this book to be a rich source of new ideas for research and practice"--Jacket. ### Anthological Morphologies

## Collected Sequentially Structured Maxims

**John O'Loughlin/Centretruths Digital Media** With this anthology of his 'sequentially structured maxims', free thinker John O'Loughlin has finally arrived at the ne plus ultra of his philosophical oeuvre, which combines all the most logically consistent material from the last twelve original titles (2014 – 2019) in one definitive volume that, on account of the comprehensively exacting nature of his quadripartite structures and the way their theorizing evolves, must rank as the 'bible' of his philosophy, if not of all philosophy of a metaphysical persuasion, that yet allows for other categories, both atomic and pseudo-atomic, to be accounted for in such fashion that everything is, as it were, nailed into place the better to support the overall morphology of unrelenting logic.

### The Heart of Listening, Volume 1

## A Visionary Approach to Craniosacral Work

**North Atlantic Books** Originally published as a single volume, *The Heart of Listening* has been re-issued as two separate volumes because of public demand for a more concise, portable edition. Milne, a third generation Scottish osteopath, begins by explaining the visionary approach to healing, and how it may be applied to the realm of craniosacral work. He explains the importance of meditation, centering, and the cultivation of heartfulness in the development of compassionate practice. Milne introduces the reader to the story of visionary work—its genesis, evolution, philosophy, and practice—and explains how a grounding in meditation, sensitive touch, and intuitive perception can lead to a remarkable unfoldment in skill development.

### The Psychology of Prejudice

## The Ontario Symposium

**Psychology Press** This volume consists of expanded and updated versions of papers presented at the Seventh Ontario Symposium on Personality and Social Psychology. The series is designed to bring together scholars from across North America who work in the same substantive area, with the goals of identifying common concerns and integrating research findings. The topic of this symposium was the psychology of prejudice and the presentations covered a wide variety of issues. The papers present state-of-the-art research programs addressing prejudice from the point of view of both the bigoted person as well as the victim of bigotry. The chapter authors confront this issue from two major -- and previously separate -- research traditions: the psychology of attitude and intergroup conflict. The chapters are organized in the following sequence of topics: the determinants and consequences of stereotypes, individual differences in prejudicial attitudes, intergroup relations, the responses of victims to prejudice and discrimination, and an integrative summary/commentary. Illustrating both the diversity and vitality of research on the psychology of prejudice, the editors hope that this volume will stimulate further research and theorizing in this area.

### Insane But Not Mad

**Centretruths Digital Media** All the titles in this collection of revised and reformatted weblogs were originally hosted by a number of blog sites, including, most especially, 'Wordpress.com', and date from 2011. As usual, the author been careful to ensure that the original chronology of weblogs has been, so far as possible, replicated, so that one can proceed through the material with a growing sense of continuity and even thematic enhancement, two crucial advantages of book publication over what may often appear to be the disjunctive if not chronologically unrelated nature of the blogging medium itself. -- A Centretruths Editorial

## Karl Barth's Theology of Relations, Volume 1

### Trinitarian, Christological, and Human: Towards an Ethic of the Family

**Wipf and Stock Publishers** This work, originally published as one volume in the Peter Lang series, *Issues in Systematic Theology*, is now available in two volumes. In the first volume, Gary Deddo shows how Barth grasped the nature of relations as intrinsic to the being and act of the Triune God and to God's relations to us and our relationship to God in Christ. Deddo then completes his comprehensive survey showing how Barth saw the reality of the divine relationships analogically pertains, by grace, to humanity and its creaturely relationships. Barth's doctrine of God, Christology, and theological anthropology are all intrinsically onto-relational (to borrow a term coined by Thomas F. Torrance). In the second volume, Deddo shows how Barth's relational theology is intrinsically ethical. As a case study Deddo explicates Barth's ethical teaching on the relationship between parents and children found in section 54 of his chapter on Freedom in Fellowship in CD, III/4. He further demonstrates the relevance and fruitfulness of Barth's theology of relations for critically engaging other theological and non-theological views of the family and for shedding ethical light on a wide range of contemporary issues facing families, especially in the North American context. Karl Barth is known for his insight into the inseparability of act and being in God. What is less recognized is that Barth's theological understanding of dynamic, covenantal relationship is also essential to his doctrine of the Triune God, his Christology and theological anthropology. God is revealed in Jesus Christ to be one in act, being and relation. Humanity is revealed in Jesus Christ to be essentially a unity of act, being and relation. The failure to see the ethical implications of Barth's theology can be traced in large part to the failure to grasp how Barth's understanding of God's being and act is also essentially relational. Deddo's work corrects this oversight and opens up the door to better comprehension of Barth's trinitarian doctrine of God, his Christology, anthropology and ethics.

## Sex Similarities and Differences and the Impact of Society on Gender

**Academic Press** The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences. Along the way, it was discovered that while women very often think and behave differently than do men, industrialized societies cater to masculine perspectives. The "Psychology of Women" emerged as a field of study focusing on just those areas in which women most often butted against assumed roles. And similarly, in the 1990s, the "Psychology of Men" emerged to focus on the same issues for men. The Encyclopedia of Gender covers all three areas under one cover, discussing psychological differences in personality, cognition, and behavior, as well as biologically based differences and how those differences impact behavior. Coverage includes studies of these differences in applied settings such as education, business, the home, in politics, sports competition, etc. Key Features \* Over 100 In-depth chapters by leading scholars in the psychology of women and gender \* Addresses critical questions of similarities and differences in gendering across diverse groups, challenging myths about gender polarization and the "Venus/Mars" distinction \* Broad coverage of topics from theory and method to development, personality, violence, sexuality, close relationships, work, health, and social policy \* Sensitive attention to multicultural and cross-cultural research \* Clearly written, readable, comprehensive, with helpful guides (outline, glossary, reference list) \* Raises difficult questions related to power, inequality, ethics, and social justice \* Challenges the reader to revise established "truths" and to seek further information \* Maintains a feminist and woman-centered focus

## The Concept of Woman

**Wm. B. Eerdmans Publishing** The culmination of a lifetime's scholarly work, this pioneering study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to the present. Volume I uncovers four general categories of questions asked by philosophers for two thousand years. These are the categories of opposites, of generation, of wisdom, and of virtue. Sister Prudence Allen traces several recurring strands of sexual and gender identity within this period. Ultimately, she shows the paradoxical influence of Aristotle on the question of woman and on a philosophical understanding of sexual complementarity. Supplemented throughout with helpful charts, diagrams, and illustrations, this volume will be an important resource for scholars and students in the fields of women's studies, philosophy, history, theology, literary studies, and political science. In Volume 2, Sister Prudence Allen explores claims about sex and gender identity in the works of over fifty philosophers (both men and women) in the late medieval and early Renaissance periods. Touching on the thought of every philosopher who considered sex or gender identity between A.D. 1250 and 1500, The Concept of Woman provides the analytical categories necessary for situating contemporary discussion of women in relation to men. Adding to the accessibility of this fine discussion are informative illustrations, helpful summary charts, and extracts of original source material (some not previously available in English). In her third and final volume Allen covers the years 1500--2015, continuing her chronological approach to individual authors and also offering systematic arguments to defend certain philosophical positions over against others.

## Human Trafficking

## Women's Stories of Agency

**Cambridge Scholars Publishing** This book explores women's stories of agency in a lived experience of trafficking. The idea of agency is a difficult concept to fathom, given the unscrupulous acts and exploitative practices which define trafficking. In response to the '3-P' anti-trafficking paradigm – to prevent and protect victims and prosecute traffickers – official discourse constructs agency in singular opposition to victimhood. The 'true' victim of trafficking is reified in attributes of passivity and worthiness, whereas signs of women's agency are read as consent in their own predicament or as culpability in criminal justice and immigration rule-breaking. Moving beyond the official lack or criminal fact of agency, this collection of stories adds knowledge on agency constructed with, on, and by, women possessing a trafficking experience. Based on the stories of twenty-six women, agency is seen to exist in relationship to women's victimisation under trafficking. Exploring well-being agency (women's physical safety and economic needs), and agency freedom (women's capacity to construct choices and the conditions affecting choice), women demonstrate agency in their identity, decision making, and actions. Acknowledging the existence of a migration-crime-security nexus in contemporary human trafficking, the narratives of fifteen anti-trafficking professionals highlight how official actions mediate women's achievement of well-being and agency freedoms. This book will be of interest to students undertaking courses in modern slavery, human trafficking, human geography, police studies, social work, and criminology.

## Lectures on Jung's Aion (Polarities of the Psyche) [Paperback]

Aion, a major work from Jung's later years, has long been a source of fascination for a wide variety of scholars and thinkers. Presented here are two substantial commentaries on this rich and complex text by two important figures in Jung's life and work: Barbara Hannah and Marie-Louise von Franz. Hannah delivered these lectures in 1957 at the C.G. Jung Institute in Zurich. She addresses each chapter of Aion, providing detailed, in-depth analysis of selected passages, while suggesting resources for further study. Well-paced and thoughtfully planned, she scans the work from beginning to end, illuminating many subtle nuances. In a private interview with Claude Drey in her home during the spring of 1965, Marie-Louise von Franz looks closely at chapter fourteen of Aion—"The Structure and Dynamics of the Self." Published here for the first time, von Franz offers a lively and free-flowing discussion of key passages in Jung's work. This is the first volume in a new series edited by Emmanuel Kennedy-Xyppolitas, "Polarities in the Psyche," focusing on the broad theme of the opposites in the psyche. The second volume will be The Archetypal Symbolism of Animals (also from Chiron Publications)."

## Relational Psychoanalysis, Volume 14

### The Emergence of a Tradition

**Routledge** Over the course of the past 15 years, there has been a vast sea change in American psychoanalysis. It takes the form of a broad movement away from classical psychoanalytic theorizing grounded in Freud's drive theory toward models of mind and development grounded in object relations concepts. In clinical practice, there has been a corresponding movement away from the classical principles of neutrality, abstinence and anonymity toward an interactive vision of the analytic situation that places the analytic relationship, with its powerful, reciprocal affective currents, in the foreground. These developments have been evident in virtually all schools of psychoanalysis in America, from the most traditional to the most radical. The wellspring of these innovations is the work of a group of psychoanalysts who have struggled to integrate aspects of interpersonal psychoanalysis, various British object relations theories, and psychoanalytic feminism. Although not self-selected as a school, these theorists have generated a distinct tradition of psychoanalytic thought and clinical practice that has become extremely influential within psychoanalysis in the United States. Relational Psychoanalysis: The Emergence of a Tradition brings together for the first time the seminal papers of the major authors within this tradition. Each paper is accompanied by an introduction, in which the editors place it in its historical context, and a new afterward, in which the author suggests subsequent developments in his or her thinking. This book is an invaluable resource for any clinical practitioner, teacher or student of psychoanalysis interested in exploring the exciting developments of recent years.

## Personality Theories of Women

## Semantics and Psychology of Spirituality

## A Cross-Cultural Analysis

**Springer** This book examines what people mean when they say they are "spiritual". It looks at the semantics of "spirituality", the visibility of reasons for "spiritual" preference in biographies, in psychological dispositions, in cultural differences between Germany and the US, and in gender differences. It also examines the kind of biographical consequences that are associated with "spirituality". The book reports the results of an online-questionnaire filled out by 773 respondents in Germany and 1113 in the US, personal interviews with a selected group of more than 100 persons, and an experiment. Based on the data collected, it reports results that are relevant for a number of scientific and practical disciplines. It makes a contribution to the semantics of everyday religious language and to the cross-cultural study of religion and to many related fields as well, because "spirituality" is evaluated in relation to personality, mysticism, well-being, religious styles, generativity, attachment, biography and atheism. The book draws attention to the – new and ever changing – ways in which people give names to their ultimate concern and symbolize their experiences of transcendence.

## The Coming of Lilith

## Essays on Feminism, Judaism, and Sexual Ethics, 1972-2003

Section II addresses her nuanced understanding of oppression and includes her important work on anti-Judaism in Christian feminism. Finally, section IV presents her writings on the significance of sexual ethics to the larger project of transforming Judaism.
