Bethlehem Books We know about Hippocrates, the Father of Medicine. But we owe nearly as much to Galen, a physician born in 129 A.D. at the height of the Roman Empire. Galen's acute diagnoses of patients, botanical wisdom, and studies of physiology were recorded in numerous books, handed down through the Middle Ages and Renaissance. Not least, Galen passed on the medical tradition of respect for life. In this fascinating biography for young people, Jeanne Bendick brings Galen's Roman world to life with the clarity, humor, and outstanding content we enjoyed in Archimedes and the Door to Science. #### THE QUIRKY HISTORY AND LOST ART OF DIAGRAMMING SENTENCES

Melville House "Kitty Burns Florey seems to write from a great wellspring of inner calm that derives from a gleeful appreciation of life's smallest details." —Richard Russo, Pulitzer Prize-winning author of Empire Falls Once wildly popular in grammar schools across the country, sentence diagramming has fallen out of fashion. But are we that much worse for not knowing the word-mapping method? Now, in this illustrated personal history that any language lover will adore, Kitty Burns Florey explores the rise and fall of sentence diagramming, including its invention by a mustachioed man named Brainerd "Brainy" Kellogg and his wealthy accomplice Alonzo Reed ... the inferior "balloon diagram" predecessor ... and what diagrams of sentences by Hemingway, Welty, Proust, Kerouac and other famous writers reveal about them. Florey also offers up her own common-sense approach to learning and using good grammar. And she answers some of literature's most pressing questions: Was Mark Twain or James Fenimore Cooper a better grammarian? What are the silliest grammar rules? And what's Gertude Stein got to do with any of it?
